THE SCHOLAR AND THE FRIEND OF ORIENTAL SCIENCE

THIS WORK IS GRATEFULLY DEDICATED

BY THE

KDITOR

gested to me to supply the place of Wester-gaard's edition of the Avestå, already out of print, by a revised edition of the text, I undertook the work after some hesitation, encouraged, however, by the thought that a few years would suffice for the completion of the task. Such was my hope and expectation, but the mass of material which collected, and other circumstances more especially, have long deferred the wished-for completion of the task imposed. With the Vendidåd, however, the Avestå proper is at last concluded, and I hasten to finish the work, and with the present Prolegomena to give the clue to the whole.

If I may be allowed in the first place to say a few words regarding the work accomplished by my predecessor N. L. Westergaard, and the edition of the Zendavesta which he brought out in the year 1854. I think I am perhaps better qualified than any one else to pass judgment on this subject; for I have carefully examined anew, and have fully tested, all the means and resources which were at Westergaard's command. I may say at once that he succeeded marvellously in accomplishing that most difficult task, an editio princeps of the Avesta. So admirably did Westergaard work through the manuscripts that were known to him, and so model the text he provided, that without entirely new manuscript material, there would have remained little or nothing for me to do. A re-reading of the texts extent

in Europe, I found, promised but little fruit. It soon became evident, however, that in India there was hidden an unopened store of manuscripts, and I forthwith directed my attention to securing these. Through the kindness of friends I succeeded in procuring the greater number of them, and those the more important; this circumstance has placed me in a position to improve upon Westergaard in details, or in cases where he had already hit upon the right reading—as for the most part he had—to substantiate this by better authority. Taken as a whole, my work has remained, what was intended from the first, an improved reprint of Westergaard. Only the critical apparatus has unfortunately greatly increased in extent and compass.

Especially for the Yasna much new material became accessible to me. In the Yashts, the one ancestral manuscript has placed the text criticism on a firmer basis. In the Vendidad, on the contrary, I have not been able to get much beyond Wester kard's material. It is particularly to be regretted that some of the Yasna manuscripts came to hand late; some in fact even after the printing was finished. All the more unfortunate was this, as among the stragglers were some that at the outset were almost indispensable, as regards text criticism, for a proper classification and estimation of the manuscripts.

Before proceeding detailed account, I shall give a sketch, alphabetically arranged for easier survey, of all

the manuscripts that have been used for the edition, including also those that came to hand after the printing was finished. The latter are indicated by an asterisk (*).

B(ombay, University Library):

B1, Vendidad with Pahlavi translation, 439 foll., height 101/s in., breadth 51/s in., Devanagari paging, no date. The Ms., according to a notice by Haug on the inside of the cover, comes from Baroda; but according to Dastur Hoshang Jamasp's correction, it came from Baroach, where it was purchased in the year 1865. The latter statement is substantiated by Haug's Account of a Tour in Gujarat in 1863-64, p. 9. Wanting are foll. 72-73 (Vd. 4,2-5), 129 15,28-20) and the end; the Ms. breaks off in 21,9 with The beginning, which likewise is wanting as far as 1,0, is supplied by a later hand; the old Ms. commences at 1.7. In the middle of fol. 87 a (Vd. 4.38) a second and inferior hand begins, and runs as far as the second line of fol. 110a (Vd. 5.7); the old hand resumes at Par. 4. In this way Parr. 4 (from 44-) as far as 7 (1999) are written first by the second hand and then by the old hand. Toward the end of fol. 114a (conclusion of 5.7) once more the second hand begins and continues as far as the second line of fol. 116a (5,9). The Ms. goes back to Kt.

Ba, Vendidàd sàda, without date, a rather old Ms. of this class, shows much wear and is much patched. $9^{7i_3}:7^{5i_5}$ in. The Ms. begins with fol. 19, number of the last leaf is 381. The first 18 leaves are wanting except two (from Vp. 2), which are bound in after fol. 373. Likewise foll. 230 and 232 are wanting, while 231 is bound as the last leaf. Also the last leaves from 369 are several times misplaced in binding and wrongly paged. The conclusion is missing, as the Ms. breaks off in Yasna 68.

B3. Yasna såda and the two Sirózas, old, but very carelessly written and worthless, appears to be influenced by K5 or to be a poor excerpt from the Avestà text of K5. The writing recalls Lz7, both Mss. are likely from the same scribe. 189 foll., 9½: 6½ in., often misplaced in binding.

Bb (Mobed Burjorji Bomanji):

Bbz, Vendidåd såda, 368 foll., 111/2: 83/4 in.; the last leaves supplied by a later hand. The Ms. is better written at the beginning, but quite carelessly further on.

Br (Behmanji Rustamji Mullan Firoz, Dastur in Hombay);

Brz, Vendidåd såda, 332 foll., the last leaf of the text is wanting. Dated A.Y. 1118, Samvat 1805 (A.D. 1748). Carefully written, correct Ms.

Bra, Yasna såda, modern, undated and unpaged, 13:81/4 in., about sixty or seventy years old, imitated Iranian style.

C(ambridge):

C1, Yasna såda, Collegii Emmanuelis Liber. On the inside of the binding is written: "See Dr. Hyde's Religio V. Persarum f. 530. He calls the Book Yezishny and the Language Zendvista." And on the first page of the manuscript: "This Book is Called Ejessnney written in the Language Jenivista and Containes the Religion of the Ancient Parsyes." The Ms. contains 192 written foll., 12 lines to the page, 5%:4% in., undated. It breaks off at fol. 192 in the midst of Yasna 50,3a; there follow then eight pages of old paper, but not written upon. The first information we have regarding the codex is given by Hyde, as above. The Ms. was accordingly written before 1700.

D:

Modern copy of the Zamyad Yasht (19), made for Westergaard from a Ms. of Dhanjibhai Framji which was itself, however, not very correct.

Dh(anjibhai Framji Patel in Bombay):

Dhr. Vendidad sada, 324 foll., 10⁵/s: 7¹/s in. Dated A.Y. 1134 (A.D. 1764). Now in possession of the Indian Museum in Florence.

E(dalji Darabji Rustomji Sanjana, late Dastur):

Ex, Khorda Avestâ and Yasht codex. Two volumes comprising 542 foll., consecutively paged, 9½: 5½ in. Carefully written Ms. Contents: Avestâ alphabet ½; the introductory Nirangs; Nyâishes, Patits, Nirangs.—Āfringân 1-3; Yasht 1-21.—Gâhs; Sîrôzas; Bâzes; Āfringân Rapithwin fol. 530b (the latter appended by a second hand).

Ea, Khorda Avesta, modern, very handsomely written

J Such Avestå niphabeta originally stood at the opening of most Khorda Avestå and Yasht Mss. They have been destroyed, however, in almost all old Mss. and have been supplied sec. in.; consequently they are for the most part palseographically worthless.

copy, 559 pp. and an appendix of 18 pp., 81/a: 6 in. Contains many Avestà fragments.

F(ramji Fardunji Madan):

Fr. Yasht codex, 277 foll., 71/s: 43/4 in. Written in Nosari by Asadin Kākā Danpāl Lakhmidar of the family of Hormazyār Rāmyār, and finished on the day Din of the month Ardabahisht A.Y. 960, Samvat 1648 (= January 21, 1591). The first leaf is wanting; the Ms. begins with fol. 2. The last leaf with the conclusion of the colophon is likewise no longer in existence; a copy of the same by a later hand, and evidently made exactly according to the original, is appended to the Ms. Contents: Alphabet; the introductory Nîrangs (prayer formulas); Nyāish 1-5 (foll. 10-32)—Yasht 1-21 (foll. 35-274).—3 foll. Pāzand texts.—This neatly and very correctly written Ms. is the oldest that contains all the Yashts, and as being the ancestral manuscript of most of the Yasht copies it is of great value.

Fa, Iranian Khorda Avestà, very handsomely and carefully written, 97 foll. (7³/₄: 5¹/₈ in.) Avestà texts for the most part with Pahlavi translation, the remainder a modern Persian text. Written in Yazd by Rûstâm Gushtâsp Ardashîr, and finished on the day Zâmyàd of the month Dînî A. 20. Y. 1075 (A.Y. 1095 = July 21, 1736, or July 26, 1706).

According to Albirant, translated by Suchus, pp. 138, 184, a double era was in vogue in his time; the era of the Zoroastrians and the era of Yesdegeni. The former begins with the death of Yesdegeni, A. D. 651; the latter with his ascending the throne, A. D. 631. The era of the Zorosstrians is accordingly twenty years behind the era of Yendegerd. The Parsis of India always follow the era of Yendegerd. In l'ersia, on the contrary, the other era most have been up to a certain time the more common of the two, in the colophone it is often designated as Persian. In such cases the reckoning is made from the year 651, but generally with the express addition, "after the twentieth year of Yesdegerd," i. e. counting from the twentieth year after his ascending the throne. The oldest quotable instance for this era is the colophon of Milhvindild, first copyist of the Dinkard, A. D. 1020, a contemporary therefore of Albfrild (cf. West, SB.E. vol. sexvii, Intr. 34). The same formula is found in the later colophons to the Dinkard, in Jpr, Kr3, Fa, Mfr. Copylete who had emigrated from Iran sometimes employed this method of dating also in India, e. g. Mitrô-Apin in Kao fol. 51; but it is particularly in Kso that the confusion regarding dates is great. Moreover, even in certain cases where the older Persian Man. do not specifically add the twentieth year of Yezdegerd, we have nevertheless to accept that the calculation is nade from the year A.D. 651.

The Avestà texts contain Nyaishes 1 and 3, Hôrmezd Yasht, Afringan Dahman and Gahanbar, the lesser Sirôza (1).

Fl(orence, Indian Museum):

Fix, Vispered såda (containing the Yasna and Vispered in the form and arrangement of text of the Vendidåd såda, but without the Vendidåd), written in Iranian style, modern, but very correct. Originally in possession of the Dastur Khorshedji Bejanji. 271 written leaves, unpaged, partly written on blue paper, $9^2/6:7^{1/6}$ in.

H(oshangji Jamaspji, M. A., Ph. D., Dastur in Poona):

Hz, the Ms. consists of three parts which are separately paged: (1) Yasna såda with Kiriå, foll. 1-233, paged with Devanågari numbers; (2) the lesser and the greater Sîròza, 11 foll., paged with Arabic figures; (3) Vîspered såda, 85 foll. No date; very correct old Ms., the best of the Yasna såda class. 84:6 in.

Ha, Khorda Avestà with the Sanskrit translation, written in a peculiar character resembling that of J9 and closely akin to that manuscript. 186 foll., 9:7½ in. The Açîrvâda contains the number of the year 784 (A.D. 1415). The first leaf is wanting. Contents: Khurshêd Nyâish

In K43 we have in succession in three colophons of the same copylst three different datings, namely: A. 20, Y. 936, A. Y. 938 and the Paral year 943 A. 20 V. It is evident that all three dates in this order presuppose the same era, nearly, that counted from 651. Also Rusiam who emigrated from Iran, reckons in E7 according to the "Pånd Year" without mentioning the twentieth year. At a later period, or from about the year 1600, the use of the common Yesdegeril era became established in Iran by the side of the Zoronstrian. Mfs is dated A. Y. 987 (without the twentieth year). Now, since a brother of Khûnrôhô, copyist of Mis, namely Mitro-fipin, copied the Dinkord (West, supra, p. 38) in the year 1594 (Parsi year 943 after the twentieth year of Yesdegerd), it is much more probable that his brother wrote in 1618 (reckoned according to the common Yestlegerd era) and not in 1638 (according to the Zoroastrian era). After about 1700, the twentieth year appears to have become merely a formula no longer understood, and the common Yezdegerd era became the usual one in Persia. In F2 there are two copies by the same scribe, bound together (and in severae order), the first is dated 28. Dal A. 20. Y. 1075, the second 21. Dal A. Y. 1075. It is evident that a space of twenty years did not classe between the two copies. Both dates must therefore be computed as 1706 A. D. Nevertheless, as long as the various methods of dating have not been fully investigated and established, a certain caution is advisable. Therefore even in cases after 1700 where the Parsi year is expressly mentioned I have, nevertheless, left both possibilities open.

(Avestå-Sanskrit) fol. 1; the end of the Måh Ny. (Av.-Skr.); fol. 15 with the beginning has been lost; Åtush Ny. (Av.-Skr.) fol. 20; Yasht 1,2-23 (Av.-Skr.) fol. 30; Åfringån Dahmån (Av.-Skr.) fol. 43; Åfringån Arda-Fravash, only Yasht 13,49-52.136.157 containing (Av.-Skr.) fol. 49; Åfr. Gahanbår fol. 51 b-62 b. Then Påzand texts with Sanskrit. Very valuable Ms.

H3, consists of two parts which have been bound together; the first part badly written, paged, contains Yasht 10 on 64 foll.; the second, better written, contains Yashts 17, 18, 19; 50 foll, unpaged. 81/9:51/2 in. Modern manuscript.

H4. Mihir Yasht, 82 foli., 91/4: 44/4 in., dated Samvat 1877 (A. D. 1820).

H5. Fravardin Yasht, 42 foll., 63/4: 31/8 in.

J(amaspji Minocheherji Jamasp Asana, M. A., Ph. D., Dastur in Bombay):

Ji, Vendîdâd sâda, carelessly written.

Ja. Yasna with Pahlavi translation, copied by Mitroàpàn-i Kai Khusrob, finished on the day Vohuman of the month Fravardin A. Y. 692 (- January 26, 1323). The copyist gives no information regarding his predecessors, The Ms. is doubly paged, first with Devanagari numerals, then with Arabic. After fol. 333 the two pagings differ; altogether there are 385 foll, according to the Arabic pagination, but 389 according to the Devanágari count. Foll. 1, 2, 150 (from Y. 21,3 - to the end) and probably the last leaf are lost. Fol. 210a (Y. 33,4) to fol. 210b line 4 (Y. 33.4) appears to have been written by another, but still an equally old hand, so also fol. 212. The Ms. is much damaged by corresive ink and by white ants. 10%: 85/4 in., 15 lines to the page. The Ms. is now at Oxford and has recently been reproduced by the collotype process,4

J3. Yasna with Neryosangh's Sanskrit translation, 8%: 5% in. The old Ms., written by the first hand, breaks off with sars (Y. 54.1) at fol. 260a. At fol. 260b there is a Pahlavi colophon by a later hand and at foll. 261-263, likewise by a younger hand, a piece of the missing Yasna text is supplied. The Ms. has suffered much from damp and in passages it is in utter decay. Y. 11,3-8 are wanting

in Avesta and Sanskrit; instead of which, three pages are left vacant. Writing and paper old; cf. J4, K5, Prr.

J4. Yasna with Noryosangh's Sanskrit translation. 219 foll., 13¹/2: 8¹/4 in., without date, modern, goes directly or indirectly back to J2.

J5. Yasna skda, about two hundred years old, incomplete and very incorrect. There are still 136 foll. extant, these extend to Y. 36. 8%: 51/s in.

J6, Yasna såda, without date, according to the hand-writing about three hundred years old, very ornately written, much corrected by a second hand, 210 foil., $6^9/4:3^7/6$ in. The first three leaves and also the last leaf are missing. The Ms. begins in Y. I.7. It has been much damaged by excessive usage. Several lost leaves have been supplied by a second hand, e. g. in chapters 19 and 65.

J7, Yasna såda with Kiriå, 193 foll., 91/4: 6 in., not old, but a very careful Ms.

J8, 99 foll., 9½: 7½ in., unbound, contains: (1) Vispered såda, foll. 1-91, the first leaf is lost; (2) the two Sirôzas, fol. 92 to the end. The last leaves are quite destroyed. The Ms. is rather incorrect.

Jo. Khorda Avestá with Sanskrit translation. 8%:6 in. According to the Acirvada written after Samvat 1400 (samvatsareshu caturdaçaça(exhu amukadávarshe).1 The character of the writing of this Ms. is quite peculiar. The closely related Ms. H2 has also in its handwriting much likeness to Jo. Several signs recall the style of writing in Sz which is equally original. Avesta and Pazand are written in red. Sanskrit in black. In spite of its comparative antiquity this Ms. leaves much to be desired as regards correctness. The beginning is lost, the old Ms. extends from foll, 3 to 107. To the old Ms., however, there are prefixed modern leaves with a separate paging (foll. 1-24). The modern leaves contain: Neryosangh's usual Sanskrit introduction (1b-2a); Avestå alphabet (2a-b); Nirang-i Kusti (Av.-Skr.) 2b-9a; Srosh Báj (Av.-Skr.) ga-18a; Hóshbám (Av.-Skr.) 18a-24b. Contents of the old Ms.: Khurshèd Nyàish (Av.-Skr.) foll. 3a-13b; Mah Yasht (Av.-Skr.) 13b-17a; Atash Nyaish (Av.-Skr.) 172-25b; Mihir Nyaish 10-16 (Av.) 25b-26b; Aban Nyaish (Avestå, abridged) 26b-28a; Hörmezd Yasht 1-23 (Av.-

¹ A copy of this reproduction was not accessible to me.

¹ "It is contourny among us, even now, to insert in the Ashirvid the century though not the exact year, and the same mode is adopted in the printed tests." Remark of Dantur Jamanjii in a letter.

Skr.), 84-99, 31-33 (Av.) foli. 28n-41b; Nfrangs (Guj. with some Av. and Skr.) 41b-51a; Patits (Påz. and some Skr.) 51a-80a; marriage formula (Skr.) 80a-82b; Srösh Yasht Hàdhôkht 1-7, 10-13 (Av.) 82b-84b; Nfrang i bôi dàdan (Påz.-Skr.) 84b-88a; Dahman Āfringān Y. 60,2-7 (Av.-Skr.) 88b-91b; Āçīrvād Āfr. 1,8-12 (Av.-Skr.) 91b-94a; Āçīrvād-i Fravardiyān Āfr. 2,4=Yt.13,49-52.156.157 (Av.-Skr.) 94a-96b; Gahanbār Āfringān Āfr. 3,3-13 (Av.-Skr.) 96b-106b, a leaf is missing after 103; Nîrang-i sihānā 106b-107b.

Jzo, Khorda Avestå and Yasht codex, 540 foll., undated, 77/n: 51/s in., modern Ms., with ornamental writing, but very inexact. Contents of the Avestå pieces: Avestå alphabet; introductory prayers; Nyåishes and Gåhs entire; the entire Yashts; Siròza Yasht (= Sîr. 1 and 2); Åfringån Rapithwin, Åfr. Gahanbar, Åfr. Gåthå. In addition to many Nirangs in Påzand.

Jax, Vishtåsp såda, careful copy of K4, written by Jåmåsp Åså, who died 1753.

Jz5, Khorda Avestå and Vispered, both with Pahlavi translation, 136 foll., 8½: 7½ in. Contents: Åfringån Gahanbår, Åfr. Dahmån, Åfr. Gåthå, Åfr. Zartusht; Khurshêd Nyâish; Måh Yasht; Hôrmezd Yasht 2-22; both Sîrôzas; Srôsh Yasht Hådhökht; Vispered.

J16, Khorda Avestá, modern, 188 foll., 111/s: 71/s in., contains: Yasht 1-3, 11, 14, 16, 18; Gâh 1-5; Avestá fragments; Sirôzas.

J17, Khorda Avestâ, old, with handwriting of a peculiar character, but very careless. The Ms. proper comprises 187 foll., 61/4: 51/s in.; in addition there is a Pâzand-Sanskrit glossary of 34 foll., separately paged. Contains Avestâ fragments and other things.

Jb (Jamsetji Bomanjee Wadia):

Vendidad in Avesta, Pahlavi and Gujerati in five volumes, quite modern, used only for the beginning.

Jm (Jamshedji Månekji Unwalla, Mobed):

Jm1, Yasna sada, not paged, 71/2:4 in., badly written.

Jms, Vendidåd såds, 272 foll., 14⁵/s:11¹/2 in.

Jm3, Vendidåd såda, 355 foll., 105/a:91/a in.

Jun4. Khorda Avestâ (designated at first as Rx in consequence of a misunderstanding), 13:9% in. The Ms. contains in the Âçîrvâda fol, 68 the date A. Y. 721 (A. D. 1352), with which the handwriting and paper would agree.

The Ms. is in general carefully written. In spite of its antiquity, however, a number of the texts have much degenerated. The Ms. has suffered much in places and is much patched. Of the old Ms. there are still preserved only foll, 7-42 and 64-71, between which is a great gap. The first six leaves are supplied by a later hand. Contents: Introductory prayers (Kusti Nirang etc.); Khurshêd Nyaish. Thus far the modern leaves. The old Ms. contains: Mihir Nyâish fol. 7b, Mâh Nyâish 8a, Âtash Nyâish 9a; Hörmezd Yasht 10, Ardabahisht Yusht 13b, Haft Yasht 15b, Bahiram Yasht 17a, Khordad Yasht 22, Gosh Yasht 24a, Din Yasht 26b, Srôsh Yasht Hàdhôkht 28; Afringan i Gahanbar 35, Afr. Dahman 37, Afr. Fravardiyan ib., Afr. Srosh 38a; Pázand Afrin Gahanbar 38b, Afrin Gàtha 41a; abridged Sirôza 42; Avesta fragments 65b; Nirangs 67; Açirváda 68b; Abán Nykish 70.

Jm5, Vispered såda, 120 foll., 101/4: 65/4 in. The Vispered extends from fol. 1 to 106; there are also added Åfringån Rapithwin (foll. 106-108) and some Påzand texts.

Jp (Jamshedji Peshotanji Sanjana, Dastur in Bulsar):

Jpz, Vendidåd såda from Iran, Avestå with Nirang in Pahlavi, 319 foll., 15:9% in. Handsomely and carefully written, paged at first with Persian numbers in words, but later with Persian numerals. Foll, I and 2 are lost, The Ms., like many other Vendidad sadas, has a double colophon, after Vd. 9 and at the end. The copyist 1 according to the colophon is Frédûn Marzapân Frédûn Våhróm Růstóm Bôndår Shahmardán Dìnyar, who copied the Ms. from a Ms. of his father (Maryapan 1), who in turn had made a copy of the Ms. of Shatrò-èyar " Erdashir Aîric Rûstâm Aîric Kabâd. Frêdûn copied Jpz for Frêdûn Vch-mard Fredun Gopatshah Rüstom Bondar Malka-mardan Dînô-aiyyâr, and had at the same time the advantage of the advice of his father and of the latter's brother Vehmard Frédûn Vahrôm. The transcript was finished on the day Mânsarspend of the month Âtûr A. 20, Y. 987 (July 13, 1638). A second colophon, about a hundred

The same scribe, according to a communication from West, copied an Iranian Bundahish anno 1626 and another Ms. 1629.

This Marzapin wrote K35, a Ma. of the Diddistin-1 Dialk, A. Y. 941 (A. D. 2572), cf. West, S.E.E. vol. aviil, Intr. 16.

This Shatrô-ĉyŝr copied the Dinkard A. D. 1516, cf. West, 5.7.2. vol. sxxvll, Intr. 35.

years younger, says that Dastur Rûssâm Gûshtâsp Êrdashir (the copyist of Mfz and Ps) had looked the Ms. through, approved it, and had given the copyist Frêdûn his blessing.—It is only on the margin that this valuable Ms. is much damaged and patched.

K(openhagen, University Library).

This collection was for the most part acquired by Rask in the year 1830 in Rombay; 35-43 come from the property of Westergaard; cf. Collection Orientales Philothecus Regime Humanusis Part 1 p. 181.

Kr. Vendidad with the Pahlavi translation, 340 foll., 111/4: 81/4 in., 16 lines to the page. Written by Herbad Mitrô-apan Kai Khûsrôb and finished on the day Dên of the month Tir A, Y, 693 (May 17, 1324) at Cambay. Before giving his own postscript, Mitrò-àpan copied in the colophon of his predecessor Rüstak hm! Mitrò-àpàn Marsapan (dated on the day Spendarmad of the month Fravardin without the year) and also that of the latter's predecessor Adrdashir Vohûman Rôj-vêh Shah-bûrjin Shahmard (dated on the day Srosh of the month Tir of the year 554 = May 10, 1205).—Foll. 1-92 (to Vd. 5,26) are entirely wanting, the Avestà text begins at fol. 93a with sion good; foll. 184-303 = Vd. 8,74-18,71 which were not bound up with the rest of the codex, were so much damaged that they could not be collated. In the year 1840, however, Westergaard had made a very accurate tracing of these damaged leaves. The outlines of the gaps and worm-eaten places are designated in it with exactness. This tracing I have used and have denoted it as K1a, except in cases where the agreement between the tracing itself and the old copies from Kr preclude all doubt as to the reading of the old codex. The confusion in the eighteenth Fargard is the same as in L4.

K2. Vendidad with Pahlavi translation, 677 pages, pp. 644-647 are wanting; transcript and text-revision of Dastur Darab; without value for text criticism.

, fragment of the Vendidàd with the Pahlavi translation, 39 pp., 12 1/4:7 1/8 in., 15 lines to the page, contains the beginning of the Vendidàd as far as 2,32; much abridged at the end, also considerably damaged. The Ms. breaks off at 2,32 in the middle of a page, it is therefore a copy of the Vendidàd that was begun but not finished. Above the Pahlavi translation a Modern Persian interlinear version is often written.

, likewise a fragment of the Vendidid with Pahlavi translation, 17 foll., 11¹/4: 7²/4 in., 15 lines to the page. The Avesta text is written in red ink. In the Pahlavi text there is also in this Ms. the Modern Persian interlinear version. The last page is written in full and breaks off in the middle of 2,18. The continuation appears to be lost. K3b appears to be older than K3s.

E4. Vishtåsp såda (containing Yasna, Vispered and the eight Fargards of the Vishtåsp Yasht). Written in Kirman by Véh-mard Frédûn Véh-mard Frédûn Véh-mard Gópatshah Rústóm Böndár Shah-mard Dénó-yár and finished on the day Vohúman of the month Vohúman A. Y. 1093 (July 26, 1723). The copyist mentions both his predecessors by name. Subsequently a favorable judgment was passed on the Ms. by Jámásp Irdishír Anoshak-rúhán, to whom it belonged. 230 foli., 9½: 7½ in., 15 lines to the page, begins with fol. 4. Carefully written Ms. from an excellent source.

K5. Yasna with l'ahlavi translation, 327 foll. (paged with Devanâgarî numbers), 10½:8½ in., 17 lines to the page. Double colophon in Pahlavi and Sanskrit, fol. 326 b. According to this, Herbad Mitrô-àpàn Kaî-Khûsrôvô Mitrô-àpàn Spend-dàd Mitrô-àpàn Marzapàn Bàhrâm copied the Ma. in Cambay from a Ms. of Herbad Rûstâm Mitrô-àpàn to order for Càhil Sangan in the aforesaid city. Finished on the day Àsmàn of the month Dên A. Y. 692, Sanvat 1379 (November 17, 1323). The first leaf and foll. 70-77 are wanting; foll. 70-77 (Y. 9,29-10,21) still existed in Westergaard's day, but were in utter decay; he made a tracing of the same in the year 1840, which I have designated as K5b. The Yasna proper begins at fol. 5a of the M4.

K6, Yasna with Sanskrit translation, 437 foll. Careful copy of J3, extends to Y. 57,29.

E7, a collective codex consisting of three parts of different ages bound together, 81/4:43/4 in.

The first and most valuable part contains the Vispered in double form, first the Vispered sada with Nîrang (K7b) as far as fol. 104, and then the Vispered in briefest form with the Pahlavi translation (K7a) from fol. 108 b-159. The first 22 foll. are wanting, so that the Vispered sada begins with Chap. 4; likewise foll. 71 and 80 (containing parts

¹ His great-great-uncle.

of Chaps. 19 and 24). In Kya there are 2 foll. (=Vp. 1.s-3 and Vp. 9.3-4) missing and supplied sec. m. Between the two Vispereds are found the Nirang i Åtash fol. 104b, an Avestå fragment fol. 106b and the colophon. Both the Vispereds apparently come from the same scribe. The name of the same is given in the colophon in fol. 107 an Herbad Rûdastakhm¹ Mitrô-âpân Marzapân Dahishn-alyyâr in the land of the Hindus in the city of Ankalèsar. The postscript at the end is dated on the day Åsmân of the month Spendarmad of the Persian year 627 (=December 28, 1278). The Ms. actually could be so old. The ugly style of the handwriting is very antique.

The second part (K7c) is a Khorda Avesta with Bhasha translation, without date, ornately written, following contents: Khurshed, Mah, Åtash Nyaishes; Hormezd and Hom Yashts; Patits; a fragment of the Åfringån Dahman, Åfr. Arda-Fravash and Gahanbar (last incomplete).

The third part contains a Persian treatise on the Barashnom, dated A.Y. 1009 (A.D. 1640), in it an Avestâ fragment.

K8, Iranian Vispered såda, 128 foll., 8:6 in. Very handsome manuscript.⁸ It appears to be an extract. from K4.

Kg, Vendidåd såds, 703 pp., 11%: 10% in. Careful copy of Mfs, according to Westergaard copied by Mobed Darab Sohrab A, Y. 1115 (A. D. 1746).

K10, Vendidad sada, 294 foll., 15½: 11½ in., belonging to the twelfth century of the Yezdegerd era and nineteenth century of the Samvat era, must therefore have been copied after the year 1743. The last two numbers of the year are not filled out in the colophon. The Ms. is much worn and soiled. Foll. 3-6 are wanting.

K12, 317 foll., 97/a: 81/4 in., A. Y. 1016, Samvat 1703 (-A. D. 1647); contents are the same as in H2, namely, (1) Yasna såda; (2) Sírôza; (3) Vispered såda. The Yasna in particular is much corrected by a second hand.

K12, Khorda Avestà with the entire Yashts, 378 foll., A.Y. 1170 (A.D. 1801), contains: the introductory prayers, Nyâishes, Vîspa Humata, 5 Gâhs, 23 Yashts, Afringâns, both the Sirôzas. The Ms. is very slovenly written. At the end several leaves are wanting.

K13, Fravardin Yasht, from fran, 55 foil. including the colophon, 8:4% in., carefully written by Jâmâsp Ḥakim Ardishir. The date of the colophon is A. 20. Y. 1080. Instead of 80, however, 90 is intended, as the scribe tells us in a Persian gloss placed above it. The correct date of its completion is accordingly: day Srôsh of the month Din 1090 A. Y. (x July 11, 1721).

K14. Fravardin Yasht, 41 foll., 7¹/₂: 5⁷/₈ in., written in three columns, very careless and incorrect; without date, but modern.

Kz5, collective codex, containing pieces from the Yasna and Khorda Avestå; five parts bound together, namely, (1) Fragment from the Yasna with Neryosangh's Sanskrit translation, 39 foll.; (2) Åfringån Dahmån with Sanskrit translation (incomplete), 8 foll.; (3) Patit Peshmano and Khurshêd, Mâh, Åtash Nyâishes with Sanskrit translation, 45 foll.; (4) Namaskåras and Nirangs, Avestå fragments among them; (5) Tir and Mihir Yashts, 93 foll.

K16, collection of smaller Yashts, 63 foll., 47/8: 51/4 in., without date, modern, but not worthless; contains Yashts in the following order: Bahiram (fol. 1), Awerdad (fol. 36), Din (fol. 44), Ashtad (fol. 52), Ram (fol. 58) and here breaks off in the middle of Par. 46. There is partly a Persian interlinear version above the Avesta text.

K17, Khorda Avestà from Surat, dated Samvat 1738

¹ The copylat of the antecestent of Kr. Kg and 265 (A. V.).

According to Westergaard written by Dastur Khus, son of Feridan A. Y. 1149 (A. D. 1779), but according to West's notice this Dastur who in 1736 came from Iran to Surat and later became the first Kadmi-Dastur, died in 1778.

^{*} The colophon gives the history of the origin of the Ms. The Panis in India about a thousand years after their immigration were no lunger in possession of the genuine Hôm plant nor of the Frohardm Yasht. James accordingly prepared this copy for his Indian co-religionists, at the special request in fact of Mohed Rustamil, as we may read between the lines. According to the colophon in M5 (dated 21/1 1003 = October 18, 1723) Jämisp arrived in Bombey on 1 . [7 1091 - April 6, 1722; he heard there that Rustamp means like had died. After some days be travelled to Sunt where he was received by the three soms of Rustamji. Here he presented to the Parals the Fravardia Yasht which he had brought with kim, and the Hôm plant. On May 5, 1723, he returned again to Bombay and there transcribed the Fravarilla Yasht in Persian characters (preserved in M5). On a6/1 2093 (= October 23, 1723) he started once more for his home. Immunch as according to M5 he must have prepared the copy in Iran before he left home, the correct date must therefore he 1721. The uncertainty in the writing of the Pahlavi number renders the conjecture possible that we have to do with a very early copy of the Jamasp manuscript. The postscript of Jamasp in K4 should be carefully compared with the handwriting of K13.

(= A. D. 1681), 208 foll., 91/4: 41/4 in.; contains many Bâjes; among the Avestâ texts are the two Sirôzas and similar litanies.

K18, consists of three Khorda Avestas with Pahlavi or Persian translation bound together; namely, K28a with Pahlavi translation, contains the introductory prayers, the Nyâishes 1 and 3, Hôrmezd Yasht, the small and the great Sirôza, Âfringân Gahanbar and Dahman, Yashts 11 and 3. This part is dated A. Y. 1160 (A. D. 1791). K28b (from the same hand as K28a) contains the Nyâishes: Âtash, Abân, Mihir with Pahlavi translation. K28e with Modern Persian translation contains the introductory prayers and the first three Nyâishes.

Kig, part of a complete Khorda Avestå and Yasht codex, the greater part of which has been lost; without date, modern, 318 foil. Contents: the introductory prayers; the five Nyalshes; Gah I (beginning is wanting as some leaves have been lost), 2-5; Yasht 1-5,50. Furthermore Vispa Humata and other fragments, all the Afringans.

Kso, old Pahlavi codex, consisting of loose single fascicles (10: 6% in., 20 lines to the page), fully described by Haug and West, Introductory Essays (to the Ardá-Viráf) p. 5, and West, S.B.E. vol. v, Intr. 27. Altogether there are fifteen fascicles besides a later fascicle Ksob. In addition to the Bundahish and other Pahlavi texts the Ms. contains a fragment of the Srôah Yasht Hâdhôkht (from Par. 6 on) with Pahlavi translation, on fol. 156 fragments from the Yasna, the Avestâ fragments from the Hâdhôkht Nask with Pahlavi translation (in the fourth fascicle) and the Farhang i oim (in the seventh fascicle). This Ms. coming from a single copyist contains several colophons of Mitrô-âpân of different dates, samely A.Y. 590, 720 and 700 (cf. West, supra).

K21, carcless copy of K20, 173 foli., 101/a: 87/a in.

Kas, contains the Mainyô i Khard (48 foll.), and the Srôsh Yasht Hàdhôkht with Pahlavi translation (5 foll.), without date, 10¹/₄: 6⁷/₈ in. Cf. the description by West, S.B.E. vol. xxiv, late. 19.

K36, Khorda Avestå from Iran, 167 foll. (of which the first and 101-115 are wanting), 6½:4½ in., A. Y. 1073 (= A. D. 1704), contains: the introductory prayers; Nyaish 1-3 fol. 7; Åfringån Dahmån fol. 17, Åfr. Gahanbår fol. 20, Åfr. Gâthå; Åtash Nyaish fol. 25; Hörmezd Yasht fol. 29 (l'arr. 1-7 supplied by a second hand); Ardabshisht fol. 38;

Sroch (Y. 57) fol. 43; Sroch Yasht Hådhökht fol. 52; Bahram fol. 54 (added by a second hand); Gåh 2-5 fol. 60; Yasna 16 fol. 68; both the Sirozas fol. 71; Maya Yasht (with Y. 65) fol. 109; Yasht 2 fol. 131; fragments etc.—Designated by Westergaard as M1.

K37 (Ma of Westergaard), Iranian Khorda Avestă, without date, modern, 6: 3% in. Contents: Yasht 1.3.11.14 in Persian script pp. 1-86; Yasht 13 in Avestă script p. 251, Yasht Gâhân (Y. 28-34) p. 399; Yasha 23. 26; Åb zôr (Y. 65) p. 481; Åtash Nyâish p. 490, all in Avestă script.

K38 (M3 of W.), Iranian Khorda Avestá, according to Westergaard A. Y. 1183 (A. D. 1814), 108 foll., 71/2:41/4 in. Contents: (1) Yasht 14,6-53 (12 foll.); (2) beginning of Yasht 9 (1 leaf); (3) Darún Yasht (containing Yasna pieces); (4) Fravardin Yasht (foll. 30-90); (5) Síróza, Máh, Gáthá, Gáh 1, Yasht 2, fragments. Valuable Ms.

K39 (M4), contains only Yasht 18 (foll, 1-9) and Patit Irani is Pazand, the first is dated according to Westergaard A. Y. 1188 (A. D. 1818). Worthless Ms.

K40 (M5), modern copy of Yashts 3. 6. 7. 10. 14. 15, made for Westergaard in the year 1842 by the same scribe as W2.

E43. old valuable Pahlavi codex, fully described by West, S.B.E. vol. xxiv, Intr. 18, and vol. v, Intr. 39 seq.; contains a Yasna fragment (Y. 57.2-6) tacked on at the end.

Kh (Khorshedji Bejanji, Dastur):

Khz, Vispered såda with Yasna complete, written in Iranian style, modern.

Kha, consists of two parts bound together. The first part on white paper contains the Darûn Bâj, 45 foll. The second part on blue paper contains the Vishtasp Yasht and Pàzand texts, 36 foll. 9%: 69/4 in. Iranian style.

L(ondon, India Office, de Guise's Collection):

Lz, Vendidåd såda, 250 foll., 11%: 9% in. A.Y. 804 (A.D. 1435), but the genuineness of the date is doubtful, because fol. 246, on which the date is found, is modern and the date itself is a subsequent insertion by another hand and in different ink. Nevertheless the Ms. is very old. The text itself ends at fol. 247a.

L2, Vendidåd såda, 350 foll., 141/4:11 in. A.Y. 1129, Sanvat 1816 (A. D. 1759), written in Surat by Rustam Vähräm Dåråb Söhråb. Carefully written Ms. L3, Vendidåd såda, 294 foll., 14: 10% in. Less carefully written.

L4. Vendidâd with Pahlavi translation, 10½: 8½ in., 15 lines to the page. Of the old Ms. there remain only foll. 33-56 (= Vd. 3;14 end of the P.V. as far as 4,29) and foll. 153-292 or 166-304 (extending from Vd. 9,1 as far as 22,19). The last part is doubly paged, by an older hand with foll. 166-304, and by a later hand with foll. 153-293. Fol. 190b is not written upon, but the text does not show any break. Chaps. 3 and 18 are partly in great disorder. After Vd. 3,25 comes 3,29-32; 26-29; 32 to the end. In Vd. 18 the order of the paragraphs is: 1-7 (to

16-44; 19-16; 45-51; 7-11; 58 to the close. Parr. 52-58 (to ا برسم المعالم المعالم have entirely fallen out. As the transpositions begin in the midst of the page and are found also in Kx, the true order must have been already disturbed in an older copy. The last leaves in L4 were considerably misplaced before the paging was done. For instance, fol. 288 belongs between foll, 278 and 279. After fol. 280 the leaves are to be arranged thus: 203, 200, 201, 202, The Ms. has since been rebound and some of the misplacements of leaves have been done away with.] The very last leaf with the colophon is wanting. The colophon of L4, however, has been copied in Pt2 (q. v.). The copyist of L4 accordingly, as the Ms. itself in fact long since showed, is the well-known Mitro-apan Kai-Khûsrôb Mitrô-apan, who copied the Ms. in Nosari and finished it on the day Khurdad of the month Avan A.Y. 692, Samvat 1378 (= August 28, 1323). The old Ms. has been seriously dumaged in the middle of the leaves by damp and by corrosive ink, and has been restored by a later hand upon paper that has been pasted on. The lost foll. 1-32 and 57-152 have likewise been supplied by two later scribes. These modern supplements are designated as L4a.

L5. Vendidåd såda, 387 foll., tt¹/2:9¹/2 in., written in Hombay A. D. 1792, modern, quite careless. Attached to the Ms. upon a separate sheet is a copy of the Vishtasp Yasht by another scribe.

L6. Yasna with Modern Persian interlinear version, 198 foll., 101/4: 57/n in., written 1741. Quite worthless Ms.

L9, Khorda Avestà with translation in Bhàshà, 214 foll., 8: 41/4 in., according to the Âçîrvâda dated Samvat 1701 (A.D. 1644). First leaf lost. Contents: the introductory prayers; Nyâish 1-5 (foll. 29 seq.); Hôrmead Yasht (foll. 84

seq.); Nîrangs and Patits, Âfringân Dalımân (foll. 149 seq.). Arda-Fravasha, Gahanbâr; Âçîrvâda.

LII (No. 21 of the E. I. Library Catalogue), Khorda Avestà of Dastur Dàràb, 277 foll., 85/4: 51/8 in., written in Nosari A.D. 1723, as far as fol. 88 by a later hand than the rest. Contents: the introductory prayers; Nyàish 1-5 (foll. 15 seq.); Åfringån Dahmàn (foll. 80 seq.); Gàthà, Gahanbàr; Gàh 1-5 (foll. 97 seq.); Vispa Humata (140 seq.); the Yashts: Hòrmezd (143), Ameshåspend (160), Ardabahisht (168), the two Sròshes (179. 191), Hôm (201), Vanand (203), Bahírâm (206); various Bàjes and Nìrangs, among them several Avestà fragments; the small and the great Sirôza (260, 260).

Lza, Khorda Avestă with Pahlavi translation, 113 foil., 71/s: 53/s in., A. Y. (11?)24 = A. D. 1755. Contents: the introductory prayers; Khurshêd, Mâlı, Âtash Nyàishes; Hôrmezd Yasht; Yasna 57; both the Sîrôzas; Srôsh Yasht Hâdhôkht. All with P.V. Carefully written Ms.

L13, Yasna såda, handsomely written Ms. of medium age, without date, $8\frac{1}{4}:4\frac{1}{2}$ in. The old Ms. begins at fol. 22 with Y. $4\frac{1}{4}$ and ends at fol. 255 with Y. $71\frac{1}{120}$. The beginning which is wanting has been supplied by a later hand, on 24 foll, and the remainder on 3 foll. Also foll. 249 and 250 (Y. $71\frac{1}{100-13}$) of the old Ms. are wanting.

Lz6, the Nyàishes and Scôsh Yasht Hàdhūkht, modern and quite worthless.

L17, Yasna såda, 198 foll., 91/a: 61/4 in., finished A.Y. 920 (A.D. 1551) by Lierbad Ardishir. A careless copy from K5 or a transcript of it, without critical value.

L18 (Cat. No. 20), Khorda Avestà and Yasht codex. The end which is missing is supplied by a second hand. The order is considerably disturbed. The disturbances were probably in the earlier copy which lay before the scribe. The old Ms. comprises 490 foll., 97/a: 68/a in. Contents: Avestà alphabet (sec. m.); the introductory prayers; Nyâish 1-5; Âfringân Dahmân (fol. 98), Gahanbâr (fol. 109), Âfringân in Pâzand (fol. 126); the Gâhs (fol. 155); Yasht 1-4, after Yt. 4 there follows immediately on the same page (fol. 203) Yt. 11, then 11a. 14 (fol. 223), then on a new page (fol. 241) Yt. 5, then 6-10. 12. 13 to Par. 16, then on fol. 385 Parr. 64-123, then Parr. 16-89, then 123 to the end; after that Yt. 20 and 21; Avestà fragments (foll. 452. 455-468); shorter prayers; Yasht 16 (fol. 491a). 18. 19 (the greater part by a second hand).

L20 (Cat. No. 18), Yasna såda with Kiriå, modera, 169 foll., 9½: 5½ in.

L25, Khorda Avestà with Modern Persian translation, written by the same scribe in two different styles of writing, from fol. 32 in Iranian style of script. 84 foll., 9%: 5% in., A. H. 1233 (= A. D. 1803). Contents: the introductory prayers; Nyâish 1-5; Hôrmezd Yasht; Âfrîngân Gahanbâr, Gâthâ, Dahmân.

L27 (older signature: Persian 2642), Vispered sada, 121 foll., 644: 544 in. The Vispered ends at fol. 86. Then follows the last part of the Yasna with many abridgments.

Lb (London, British Museum).

Cf Ed. Suchan, Contributions to the knowledge of Parste Literature. Journal of the Royal As. Soc., New Ser. iv, 1879, p. 289 seq.

Lbr (Signature 16 BVI, in Sachau No. 4, from Hyde's collection), Khorda Avestà, A Y. 1042, A.D. 1672, 67 foli. Contents: the introductory prayers, the five Nyaishes, the five Gahs. Collation of M. A. Stein.

Lbs (Signature 16 BV, Sachau No. 2), Yasna såda from liyde's collection, mentioned in Hyde's Veterum Persarum Religio, Oxford 1700, p. 530 (Appendix), 154 foll., 91 x: 6 in., A. Y. 1030 (= A. D. 1660), written by Herbad Dáráb Hirá Cándá. Collation of E. V. Arnold.

Lbg (Sachau No. 5), Khorda Avestå in Iranian style, without date, modern. Contents: the introductory prayers; Darán Yasht, Fravardin Yasht (foll. 56a-149a); Áfringån Gahanbar, Gáthá, Rapithwin (foll. 149a, 153b, 164b); both the Sirózas (foll. 170-203). Collation of A. V.W. Jackson.

Lb16 (Signature: Orient 1588), Khorda Avestà from Persia, Sir Henry Rawlinson's MS., contains Måh Nyåish (fol. 37), Åfringån Dahmån (fol. 45), Hörmead Yasht (incomplete). Collation of M. A. Stein.

M(unich, in the Kgl. Hof- und Staatsbibliothek, Haug's collection):

Mr. Yasna with the Pahlavi translation, 768 foll., 67 s:41.2 in., A.Y. 1103 (A.D. 1734); from fol. 697 to the end by a second hand. Transcript of E5.

M2 (Signature: Zend 47), Vendidåd såda, 266 foll., 91/4: 71/8 in., Samvat 1713 (A.D 1657), good Ms.

² Anquettl saw the Ms. in Oxford at Dr. Hunt's, cf. Zend-Access, 1, 2 p. 8. I have no collation of a second Value in the Rr. M. (A. V. 1405 = A D 1736 No. 3 in Nachau).

. Vendidåd with the l'ahlavi translation, 287 foil., 101/s:61/s in., without date, modern, goes back to K1.

M4. collective codex with various datings, 246 foil., 81/a: 4% in. Contents: Hôrmezd Yasht transcribed and translated into Persian (foil. 24-33), A.Y. 1179 (A.D. 1810); Vishtåsp Yasht; Khurshèd Nyâish with P.V., Śróah Yasht (Y. 57) with P.V., Srôsh Yasht Hâdhôkht with P.V., both the Sirôzas with P.V., Vispered with P.V., these five texts dated A.Y. 1107 (A.D. 1737); Bahirâm Yasht with Persian translation; Khordâd Yasht, Âfrin Myazd and Yasht Ameshâspend, 8-15, all three with Persian translation.

M6, collective codex of Pêshyôtan Râm Kâmdin, two volumes (M6a, M6b), contains Pahlavi texts partly accompanied by Avestâ texts. The Ms. is accurately described by Haug and West, Introductory Essays (to the Ardá-Víráf) p. 4, and West, S.B.E. vol. v, Intr. 29. Only the first 13 foll. are probably from another hand. To several texts Pêshyôtan has appended a special post-script. The order of succession of the dates is the natural one, there is no doubt therefore as to the genuineness. M6a comprises 149 foll., 11%:7 in., and contains the following Avestâ texts: Kharshêd Nykish (by the other hand); Vispered (dated A.Y. 766 [A D. 1397]); fragments from the Gâthâs; three Fargards from the Hâdhôkht Nask, all with P.V. M6b comprises 104 foll, and contains among other things the Yashts Ameshåspend and Khurdâd.

M7, collective volume, 235 foll, 8½, 6½ in., dated A. Y. 1178 (A. D. 1809), cf. West, S.B.E. vol.v, Intr. 31. The volume contains the following Avestà texts: Fragments from Yasna 45, Vendidåd 1 and Yasht 17.

Max, collective volume, 152 foll., 51/2: 41/2 in., with different datings, contains Ghh 1-3 (these not dated).

M25, collective volume, contains fragments from Yasht 8. 14. 3. 4. 2, Yasna 35. Quite worthless.

M26, Fragments from the Yasna.

M35, a bundle of Avestá fragments, contains fragments from the Yasqa and Vendidad with P.V., Yasht 11. 3. 20. 21 and Rapithwin Gah.

Mb (Mancherji Barzoji Powri, Mobed):

Afor, Khorda Avestå, 153 foll., 71/a: 48/4 in. In the Agirvada the Ms. has the date Samvat 1745 (A.D. 1689) corrected to 1717 or 1777. The beginning of the Ms. is lost; it begins with fol. 22. Contents: Nyâish 3-5

(foll. 22-33); Yasht 1. 2. 3. 6. 7. 11. 20. 21 (foll. 33-65); Nirangs, Patits in Paxand; Åfringån Dahmän, Gåthå, shash Gahanbår (foll. 82-93); Påzand Åfringåns (fol. 95); våda (fol. 123); Gåh 1-5 (foll. 128-137); Avestå fragments, Påzand formulas.

Mb2, Khorda Avestâ with Sanskrit or Bhàshâ translation, very neatly written; 267 foll., 67/a: 42/4 in. The first leaves appear to be wanting. Contents: Avestâ alphabet (fol. 20); introductory prayers; Nyâish 1. 3-5 (foll. 50-97); Hôrmezd and Hôm Yasht (foll. 116. 143); Pâxand texts (foll. 146-213); Âfr. Dahmân, Gâthâ, Gahanbâr (foll. 213. 224. 228).

Mf (Mulla Firux Library in Bombay).

Cl. Catalogue of the Arabic, Handestone etc. NSN on the M. F. L., compiled by Edward Robatsek, M. C. E., Bombay 1873, p. 259.

Mfr., Iranian Yasna with Nirang (latter in Pahlavi and written in red ink), 145 foll., 9½: 6½ in., unbound, paged with Persian numerals, written by Rüstam Güshtåsp Ardashir for his son Väliröm Rüstam and finished on the day Zamyåd of the month Åvån A. 20. Y. 1090 (May 18, 1741, or May 23, 1721). Excellent Ms.

Mfa, Iranian Vendidåd såda with Nirang, 324 foll. paged with Persian numerals, 15:9% in., with double colophon, after Vd. 9 and at the end. Written by Khûsrôb¹ Anôshirvân Rûstam Shaharyâr Mâh-vindåd Vâhrâm Mihir-âpân Anôshirvân Rûstam Shaharyâr Vâhrâm Dahishn-yâr Mihir-âpân in Turkâbâd in Vilayet Yazd and finished on the day Âtûr of the month Âvân A Y. 987 (May 29, 1618). Handsomely written valuable Ms., many corrections by a later hand.—Westergaard designated excerpts from this Ms. by R.

Mf3, Iranian Khorda Avestå, modern, but very correct. The Ms. comprises 228 foll., 5 1/4:3 3/4 in., in addition to these, 4 foll. of newer paper. Contents: Hörmezd Yasht, the five Gåhs, Måh and Åtash Nyåish, Mayà Yasht (with Y. 65), single prayers, the two Sirözas, Khurshèd Nyåish, Åfringån Dahmån, Darûn Yasht, Fravardin Yasht, litanies in the style of the Sîrôzas.

*Mf4, Yasna with the Pahlavi translation, 357 foll., 11:71/a in., undated and probably somewhat younger than Pt4. Both are copied from the same original.

¹ Brother of Mitrā-āpān who was the writer of K43, cf. West, S.B.E. vol, xxiv, Intr. 18.

Mi (Manekji Limji Hataria in Tcheran'):

Mir, Vendidåd såda, seldom used.

Mila, elegant modern codex, a collection of all the Avestà texts and of many Avestà fragments in Modern Persian script, put together for the most part from Iranian manuscripts.

MI3, Vendidåd with the Pahlavi translation, 322 foll., 9½: 6½ in., written A Y. 963 (A.D. 1594) by Ardashir Zivå Viká Ardashir Râm Kâmdin in Broach. Careful copy from K1. Before his own colophon the scribe has copied also the first colophon of K1. Many leaves have been supplied by a later hand, namely foll. 65-80 (= Vd. 4.37 to 5.4), 84-85 (Vd. 5.7-9), 124-125 (Vd. 6.40-46), 148-149 (Vd. 7.59-74), 187 (Vd. 9.9-11), 194 (Vd. 9.25-27), 275-284 (Vd. 17.11-18.12), 288 (Vd. 18.9-59²), 293 (Vd. 18.74-19.1). The disorder in Chaps. 3 and 18 as in L4 or K1.

M14, Vendidåd with the Pahlavi translation, 245 foll., 115/n: 86/n in., written A. Y. 1227 (A.D. 1858), by Söhråb Peshyötan Ratanji Söhråb, goes back first to a somewhat older Ms. of Barzör Pahlan Peshyötan Kavas Söhråb A.D. 1833, the colophon of which is included in copying. In the later Fargards the younger copyist has been sometimes influenced by Spiegel's edition.

O(xford, Bodlelana):

O1, Yasna with Kiriå (Signature: O 384), erroneously designated in the title upon the binding as Vendidåd såda, from the collection of Ouseley, 200 foll., 97/8: 58/1 in., written by Bhikhà Rustam Bahram Khurshêd in Nosari and finished on the day Rashn of the month Ardabahisht A.Y. 1105 (December 11, 1735). Carefully written.

O2, Vendidåd såda (Signature: Bodl. Or. 321, olim Arch. 85), 350 foll., 111/n:91/n in., A.Y. 1050, Samvat 1737 (A.D. 1681), brought to England by Rich. Cobbe in the year 1723. Anquetil saw this Ms. fastened to a chain

Since the death of their owner these Mss, are in the hands of a committee in Bombay.

^{*} With the great confusion of the text.

In fact misprints of Spiegel are found in Mil4: """ 13.8, and corrections of Spiegel: "" 18.4, non-million 18.46.

⁴ Anquetil (i, 2 p. 9) mentions a Yasna from Surat A. Y. 1105 (A. D. 1735) preserved at Oxford in his time; this, together with a Ravaet, had been purchased by Frazer for five hundred Rupees and brought to England. This is probably not Ox, but the Yasna of the Br. M. No 3 in Suchau.

in the Hodleian, cf. Anquetil i, t p. 458; i, 2 p. 3. On the inside is written: "Donum Das Geo Bowcher Mercat. in Surat, in usum Biblioth. Bodleianae apud Oxonienses Anno Domini 1718."

O3, Khorda Avestå (Signature: Frazer 258), 294 foll., 8½: 5½ in. and 5 foll. table of contents prefixed, A.Y. 1015 (A.D. 1646). On the inside by an old hand: "The Zend of Zeratusht in the ancient Persie character. Fras. p. 35." In the codex it is furthermore noted that Anquetil had seen it and had made mention of it, cf. Anquetil i, 2 p. 6. Contents: Avestå alphabet; Nyåish 1-5 (fol. 17); Åfringån Dahmån, Gåthå, Gahanbår (foll. to3. 108. 113); Påzand Gahanbår; Gåh 1-5 (fol. 163); the Yashts: Hörmezd (fol. 180), Ameshåspend (193), Ardabahisht (200), Khordåd (208), Gösh (212), Srösh Hådhökht (221), Rashn (230), Bahiram (239), Din (256), Ashtåd (261), Höm (264), Vanand (265); Båj, Nirang with Avestå fragments (foll. 269 etc.).

P(aris, in the Bibliothèque nationale)

1 to 530, i, 2 p. 2, also in the Journal des Savants, Juillet 1762,

1 474 224.

P1 (du supplément d'Anquetil, new No. 27°), Vendidad sada, A. Y. 1083 (A. D. 1714). A lithographed copy of this was edited by E. Burnouf, Paris 1829-43, and again reprinted by H. Brockhaus, Leipsic 1850. The Brockhaus edition has been used with occasional consultation of the lithographed copy.

P2 (du suppl., new No. 26), Vendidad with the Pahlavi translation, copied in Surat by Dastur Darab A.Y. 1127 (A.D. 1758). Of this Ms., only a careful copy by Olshausen was accessible to me

P6 (du suppl., new No. 32), Yasna såda, rather old, but without value for text criticism. (Olshausen's collation.)

Pro (No. 1 du fonds, new No. 25), Vendidåd with the Pahlavi translation. (Obhausen's collation.)

Pri (No. 2 du fonds, new No. 28), Yasna with Sanskrit translation, copy from Ia. (Copy by Obhausen.)

P12 (No. 3 du fonds, new No. 30), Vispered såda, (Olshausen's collation.)

P13 (No. 4 du fonds, new No. 31). Yashta and Khorda

1 For the correspondence of the present numbering I am indebted to a lind communication from Darmesteter.

Avestà, sometimes wrongly designated as P4 in the first numbers. (Copy by Olshausen.)

P14 (No. 5 du fonds), collective codex in three parts, the first part contains the Nyhishes, Afringans and Gahs, Hôrmerd Yasht with Pahlavi translation; the middle part contains the Vispered with the Pahlavi translation. (Copy by Olshausen.)

Pd:

Iranian Khorda Avestà in the Royal Library at St. Petersburg from the Dolgorukic collection, fully described and with extracts by C. Salemann, *Uber eine Parsenhandschrift*, St. Petersburg and Leiden 1879. Salemann had the kindness personally to communicate to me certain readings from Yt. 1 besides.

Pt (Peshotanji Behramji Sanjana, M. A., Ph. D., Dastur in Bombay):

Ptr. Khorda Avestå with all the Yashts, 543 foll., 83/a. 51/a in., the first to foll are lost and have been supplied by a second hand. The old Ms. begins at fol, 11a with the Hosh Bam. Also the colophon has been renewed by a second hand, but copied at all events from the original which is gone; it bears the date A. Y. 994 (A. D. 1625) and names as copyist the Herbard Darab in Surat, a descendant of Hormazdyar Rannyar. Contents: the introductory prayers; Nyaish 1-5 (foll. 15-45); Dua Shataish (Fragment iii in W., fol. 46); Patits; the five Gahs (fol. 105); Åfr. Dahman, Gathabyo, Gahanbar, Rapithwin (foll. 134, 138, 143, 150); Pazand Åfrins, Avestå fragments (foll. 203, 207, 208, 238, 248); Åfrin Zartusht (fol. 218); Niranga; the entire Yashts in the customary order (foll. 256 to the end).

Pt2, Vendidåd with the l'ablavi translation, 315 pp., 11½: 9½ in., transcript from L4. The lost colophons of L4 are here preserved in copy. As in the case of K2 there are three colophons. The two oldest are with slight variations identical with the first two in K2, namely the colophon of Aèrdashir and that of Rûstakhm. The third is the postscript proper of Mitrô-àpàn to L4 (q. v.).

Pt3, Yasna and Vispered, 319 foll. (last leaf sec. m.), 83/a: 51/a in., without date, contains: (1) Yasna såda with Kiriå (foll. 1-226); (2) Vispered såda (foll. 227-319). The Ms. is carelessly written.

Pt4. Yasna with the Pahlavi translation, 567 pages, paged with Arabic figures, 13%: 81/s in., without date, but

apparently by the same copyist as Pta. According to the family tradition of the present owner, this Ms. was copied A.Y. 1149 (A.D. 1779-80) by Dastur Kâvasji Sohrâbji Mihirji-rânâ in Nosari and from an old Iranian Yasna. The latter is confirmed by the Pahlavî introduction to Pt4. Dastur Kâvasji later presented the Ms. to his teacher, Dastur Sâhib Rustamji Behramji Sanjânâ, the great-grand-father of Dastur Peshotan. The copyist of Pt4 reproduces the introduction of the Ms. before him, the scribe of which was named II ôshâng Siyâvakhsh Shatrôyâr Bakht-âfrîd, and gives interesting information about the descent of its antecedents.—In spite of its youth Pt4 is one of the most important Yasna codexes.

Ri see Jm4.

B(urat):

Sr. Yasna with the Sanskrit translation of Neryosangh. Excellent old Ms., of great independence and accuracy. The peculiar style of the writing is not always uniform, it often resembles the ordinary type of script. The scribe appears accordingly to have imitated, but not consistently, the style of writing of the Ms. before him. The first three leaves are wanting; the Ms. begins with with the territory in Y. 1.6. In Y. 26 the antecedent Ms. appears to have had a gap. The Ms. breaks off with with in Y. 46,19, the rest is lost. The remainder of the Sanskrit translation has been supplied by a hand that is quite modern. The entire Ms. has later been paged with Devanagari numbers; last leaf is 160, 121/4; 91/4 in. The Ms. is not bound; the margin is much damaged and patched; the middle of the leaves is well preserved. The owner of the Ms., as I subsequently learned, is the Mobed Mancherji Barzoji Powri.

S2, Vendidåd såda, modern, without special value.

*W(ilson).1

From the collection of the Rev. Dr. John Wilson, now in the private presentation of Lord Crawford in Wigne.

W1 (old No. 6), Khorda Avestå from Persia, written in Iranian style, without date, belonging to about the beginning of the present century, 208 foll., 41/2: 215/16 in.,

some leaves are missing, others misplaced in binding. Good Ms., akin to K36, Mf3. Contents: Avestà alphabet; Nyāishes 1-3. 5; Mayā Zôhar (= Mayā Yasht in Mf3); the five Gāhs; Yasht 1. 3. 11. 11a (Y. 57 written out in full); the Āfringāns Dahmān, Srôsh, Gabanbār, panjak Gās, Rapithwin.

W2 (old No. 4), modern transcript of various Yashts, made for John Wilson, 394 foll., 7¹/₈: 4⁶/₁₈ in., probably from the same copyist as K40. Contents: Yasht 1. 3. 5 (Λνάη Yasht). 12, 11a, 13.

W3 (old No. 5), Khorda Avestâ, 293 foll., 57/n: 37/n in., on blue paper, without date, according to the colophon copied by Mobed Bézan Rustam in Surat. The Ms. appears to have been transcribed from an Iranian one, the style is true Iranian. Contents: the two Sirôzas; the Afringâns Dahmân, Gahanbàr, Gàthâ, Rapithwin; lesser Afringâns; the Nyâishea Khurshêd, Mihir, Mâh, Âtash and Âvā yazat Nyâish (begins with the words: po number and and Avā yazat Nyâish (begins with the words: po number this is the beginning of the Mayâ Yasht in Mf31; Yasht 13 (foll. 187-291).

W5 (old No. 7), Khorda Avestå, modern copy. Contents: Khurshèti, Mihir, Mâh Nyâishes, Åtash Behrâm Ny., Abân Ardvi Sûr Ny.; the fragment Vispa Humata.

W6 (old No. 8), Khorda Avestå, modern copy, contains the two Sirôzas, Srôsh Yasht Hàdhôkht and two Âçîrvàdas in Pâzand and Bhâshâ.

Most of the manuscripts, irrespective of the corrections of the copyists themselves, are corrected by a second, and sometimes by a third hand. The distinction between manuscripts of franian and of Indian origin is important. The Iranian manuscripts are easily recognized by the characteristic features of the script and by the uniformly well-marked letters with heavy horizontal and light vertical strokes. The Indian writing varies considerably according to the scribe and the time.

The classification of the manuscripts may best be begun with the Vendidad, for in this the relationship of the manuscripts is simplest and clearest. The manuscripts with Pahlavi translation are to be taken as the basis. This class of manuscripts is represented by Kr-L4. I have not succeeded in finding, even in transcripts, the trace of a third cognate ancestral manuscript of the Pahlavi

In the edition the readings of these Mos, have all been taken from Westergaard; a renewed collision would yield a number of corrections; as an example, Ws at Vi. 5.7 reads not would but herefore attested by the Mas. is 70%.

Vendidad. Anquetil's statement (i, 2 p. 4) that all extant Pahlavi Vendidads come from two copies has so far been substantiated.

Unfortunately both manuscripts are incomplete. Only a little over half of L4 has been preserved, and about three quarters of Kz, and if the part that now can no longer be used be deducted, Kz is almost reduced to a third. Only from Chap. 9, or rather from 18,71, are both manuscripts comparable. There are extant, however, copies of the complete manuscripts, and these serve as a tolerable substitute for the missing parts. The descendants of Kz are numerous; to these in the first rank belong Mig. Bz. Mg. Ps and the two fragments Kga and Kgb.

The mutual relationship between these manuscripts will become clear from the following details.

(1) Mig, Br, Pr (pr. m.), Mg have characteristic mistakes and peculiarities in common with Kr, thus the numerous omissions, e.g.:

ty, a throught to territory); 14,23 (Applied), 19,24 (Applied), 14,22, 19,24 (Applied), 18,24 (Applied), 14,22, 19,24 (Applied), 18,24 (Applied), 18,24 (Applied), 18,24 (Applied), 18,24 (Applied), 18,24 (Applied), 19,24 (Applie

(2) M3, B1, P2 (pr m.), M3 have a series of mistakes in common which K1 does not share:

HOLE OF	THE REAL PROPERTY LIES AND ADDRESS OF	194.100 AS \$11.00
K 1	3. Br. Pa. M3:	261;
سؤسيه	Colongharder	F 3 47
GENAND	(F) Annya	ft 57
دباه	بهير	4.
-Brights	ad Mirror s	7 *1
Services (Company)	Stage	7 4
THIP	TO 1994	13,* -
ووسدأدسج	Grandy ald	8 ,-
444	الإجاما	13 -
سطافو	ببلناس	17 1
- Agran	مشدوس	13.40
terror de	er maenio ,	7 *2 10
ψ. (j. length.	ioer iongenes, i	·Ps

 $^{^{2}}$ As may be inferred from Ptn, this was probably the reading also in L4

34	lg. Br. Pa. Mşr	Ka:
8,56 -6	لندودى كسلكما	لمدريدش مقطعك
6,18	-16	√ime_
8,46	\$/messar	-fivesis -ioe
14,15	washing.	- سيوسوسو
9.14	فاستأغورك	-Challista
15.24	-appropriate	· Bendere die
		(and above it - added).

In all four is naming in 16,2 the sentence view to graphy, in 13,32 the fast the property in 15,34 are in 15,44, while in K1 all is in good order. The sentences of 9,47-44 are in Mig sie in great disorder, in K1 quite correct.

Now since Mil3 is undoubtedly the oldest of these four manuscripts, it is the source of these errors and at the same time the mother of the three others.

Conjecturally also in the following cases the blunder first crept into the text through Mig, though the control by means of Kz is here wanting

from the two words arounding around the instead of it there stands game, 4,10 all read brought for templet

(3) Br. Pa, M3 show corresponding variations from M3 (Kr). The readings are:

D 1.	Pa (pr. m.). Mat	Migr	Ktt
19,4	ar aryansi	إحماده أمداده أشأه	
19.1	and the same	demondrate demondrate	
		(1	p struck out sec. m)
7:24	apriliant.	مناكف	
8,000	- openio	Calenda	defective
X,ca	و الهجر مصحصه	ग्यानका निर्मात	
5.27	شستسطش	بكسحاساتش	مكسحاتاتي
		_	

Wanting also pr. m. in L4!

^{*} Pa from the very first hand rower follows to then corrected to 5. Ma more cased were partly

30:	. Pa (pr. m.). Mg:	Mist	K::
3,44		66-	vacat
6,33	ىلىدىيى <u>بىلى</u>	فأسروسلامه	
6,27	Saturate State	وأفائد بعدهدية	چم الک عددات .
8,94		-4 <u>6-48</u> 677-	defective
13,16	النجهدوب	البطوره.	المحهدية.
5.=	(Justille)	344	vacut
11,10	شسواسة.	- Agreement	
E,sy	ا زيداديمية.	doest	vacat

All three must therefore have a common source of errors.

(4) Ps and M3 stand together in closer relation and in opposition to B1, M13 etc.:

	Ps. M3:	Br. Ml3:
4:49	In the Contract of the Contrac	- District State of the Control of t
3.34	Man variables	-10-th-min-
3.20	بهميا لسعه مطاطئ ال	my Comments are
8,34	mynyfy ygy ns ept m	e Amyldebure areen
3.41	المحض لحراضات فلأ	المت حسراناونان

In both there are wanting at 5., the words my gray gray of the series which are found in Mis, Br. ?

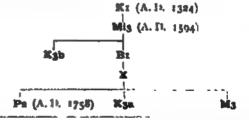

Ps. M3 accordingly stand in a dependent relation to Bz, but are reciprocally co-ordinated. M3 cannot have been transcribed from Ps. otherwise in 7.44, for example, the descent of the reading would be:

Hopenholes K: Hopenholes MI Hopenholes B: Hopenholes M: Hopenholes M: Nor can Pa, on the other hand, spring from M3, for that would give at 7.35, for example, the unnatural sequence:

Furthermore, M3 cannot have been directly transcribed from Bx, for the copyist of M3 must have found a gap or an illegible passage at 5.52 in the manuscript before him, while in Bx the passage appears to be quite in order. Nothing remains for us but to assume a missing link between Bx on the one side, and Pa, M3 on the other, from which P2 and M3 descend. Such a link is presupposed also by the Vendidad fragment K3a. The two fragments K3a and K3b by no means stand on the same plane. K3b is a correct copy of M3 or Bx, but K3a agrees with M3. P2 in the following important points:

s, a Br has grown, M3, Pa grown, K3a grown Finally it is especially to be emphasized that K3a, M3, Pa in unusual manner agree in abbreviating the passage 2.59, namely was S was set, while M13, Br write the whole paragraph out in full.

For the descent of KI the following genealogy may therefore be set down:

Above this sec. m. - Grape . All other facts contradict the summption that the copyist of M3 made use of the corrections in Pz.

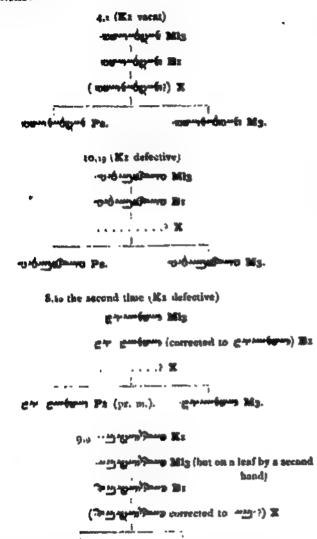

In Br and Ps added sec. m. as correction.

² Ps has the entire paragraph sec. m. in marg. This is to be inacrted in the notes to the passage.

Whether the sentence which is omitted by Pa, M3 in 4.44. -fore to making, but which stands in Mi3, was already manting in B2, is uncertain, for just here there is a rather large gap in B2.

[&]quot;This cannot accurately be decided as the extent of the fragment is too small, and, besides, in Br the beginning of the Vendhild, as far as 1,5, is by a second hand. The greater probability, however, is in favor of the descent from Mig. In Mig. as in K3b at 1,27 which is altogether wanting, while Br has in Mig. (so Mg. in Mig. Pa sec. m., K3m) from a later hand. Vol. 2,3 in Mig. K3b and is wanting, in Br in all and stands pt. m.

This scheme may be further illustrated by some specimens:

Among all the complete manuscripts above described, P2 appears to be the least accurate copy of the original. The Vulgate has oftener crept in; in other places, however, it looks as if the copyist had occasionally compared M13, or that X in some places had been collated with M13 and corrected accordingly. Thus at times agree:

The appendix corrected to may Ma.

M	is and Ps in opposition to:	Br and Mg:

Print Statemente	Salestin
مالعم لتعرض ١٠١	سكاللمه فأسادعن
5.m 48.65	1969

16.6 Mig has find of and to corrected pr. m. to g. Ps for ...

By for; I spec Mr and Mg have fight, but Ps with Mis and Kr for; I spec Mr and Ps pr. m. formally, By for Mr. tops the second former as far as former stands in Mr and in Mg, but is wanting in Mis and originally in Ps; the same is true of for formally in St.3. Quite poculiar is the following case: \$4.28 Mis originally has for the following case: \$4.28 Mis originally has saded above the line as correction, Mr. Mr read we added above the line as correction, Mr. Mr read we, but Ps pr. m. for Mr. Also the scribe of Mr appears sometimes to have recurred to Kr. 19.5 the chase warm as far as former is wanting in Mis; Kr has for with the reading who Mr has the clause again restored and in fact with the reading who Mr has the clause again restored and in fact with the reading who was a say Mr. Ps).

This will be still plainer if the Pahlavi Vendidåd of Dastur Jamaspji, which according to him is descended from the Teheran Ms., be also compared.

With Ps is connected K2 the well-known revision of the Vendidâd text which Dastur Darab prepared at the instigation of Dastur Jamasp.⁴ This is much influenced by the Vulgate and is of no value for text criticism. A peculiar composite, finally, is the Ms. P10, which according to Anquetil should be a transcript of the copy of Dastur Jamasp. The basis of this Ms is not a Ms. of the K1 series nor of the L4 line, but it has taken its readings from both alike.

The following readings, for example, point to L4: The galance purple 3,121, there's 3,41, aphanests 9,01, requirely 8,4, the transposition of both centences beginning with res 8,74; conversely, the following point to Ex etc.: throughput 9,24, the corruption in 8,23, result 18,46, refere 9,24, the confusion in Chaps, 3 and 18, must of the amissions on in 7,22; 19,41 seq.; 19,45; 16,16, 15,2; 3,20,33 have remained, other gaps are filled up, e.g. in 15,2; 14,1; 13,26. The

¹ From My I have noted nothing.

³ The corresponding emission of the three Avesth words at 4,43 in Mily, Ps. Mily opposed to Bx does not come into consideration, because in Bx as in Mily the emitte passage is due to a younger band. Bx, however, has instead of the P.V. a half line blank.

According to a communication from West who has a copy of the colophon, this Ms. bears the date of the year 1767 and appears to be a further independent copy of 203.

⁴ Augustil i, 1 p. 326.

⁸ This, however, is also the Vulgate.

extensive abbreviations and abridgments of Kx in \$,80 seq. are cleared away by the aid of the Vendtidid aids.

As the only direct transcript of the complete codex Kz there remains, therefore, Mi3. If Mi3 be minutely compared with the part extant of Kz, one soon becomes convinced that Mi3, taken for all in all, is a carefully prepared copy. The copyist, to be sure, has now and then absolutely misread or has wrongly transcribed, besides making small blunders. The text of Fargards 1.2.5 and of the close of 4, therefore, as based in the first place upon Mi3, cannot lay claim to the same degree of certainty as that of the other Fargards based upon Kz or L4.

More scanty is the substitute material for the missing parts of L4. A complete transcript of L4, or from the L4 line, is Pts. The following exact correspondences of L4 and Pts prove this:

_	L4. Pts:	K: (M13):
3.40	-foreita	-fidrie
18,70	maphe	June 2/101.
18,76	سرُسندهید،	ساوسدهود
19.20	همرش	يوسائد
19,34	عادمان	مقدمتون
14,8	mit a series	withmen with
14.9	ميروالدنب	مناثه وبدعق
15,00	Metalling.	spanification of a
15,17	·** FORD	-Game - Stores
16,7	Sta Minds	-Marvellin
18,34	-HON-MINIST	Spliterensessifely
14,5	- (Mintellige)	(Markethyn)
24.7	megulung.	Ayes and
13,40	كاستد يسالمدن	-Johnson C
19.5	Contraction and	Generalista
22,3	Gerold George	ساوالمعاط
18,46	-Application	ستنصفق
17,5	wheel the refillment of	فاستوالكم فالدماه
15,43		Oliv
13,39	واد ومحاله ،	desperte.

L4 and Pts conform in having a 4 added as correction over fundament 15,12; L4 at 3,32 has 1932 instead of 15,12, but 10 corresponding to this has 1932. In both Mas. 1940 is wanting in 16,2, and 100 in 16,10.

Secondly, the numerous corrections of P2 come into consideration. According to Anquetil's authority the copy of Darab had been collated with a Vendidad of Dastur Bilch (Bhilcha) in Surat. The value of this collation was first recognized by Spiegel. While P2 is descended from the K1 line, the Ms. of Bilch belonged to the L4 line. A few examples will suffice:

	Pa:	corrected to:	Xt:	I-4:
19,4	, allege	Apple	ويدائد	Synth
13,17	الإسطالة الد	Springing let.	الأرستراكاء اعلى	المرسالالكان امان
13,-0	-distante :	-GP9 sevado	1403344440	-402 service
19,4	: Industrial:	Internet:	Internet	امؤمعاش

Or where L4 is defective the corrections agree with Pts: 7,4 comon is corrected to "Pundo", Kx manda", Pts "Pundo", 4,17 Pts and Ps (corr.) have in Property, Min 40 Panages

The corrections, as far as I have compared them, are pretty exact, but they are not complete, and sometimes other corrections slip in. Westerguard (Pref. p. 5) has doubts as to Dastur Bikh's copy having been L4 itself; my own investigations fully corroborate his view. Between L4 on the one hand and Pta, 1 as well as the corrections in Pa, on the other, we must assume an intermediate link (Y).

At 9,14 L4 still reads rightly any Ps has an Appendicular corrected to any Pte has any pure. This reading accordingly crept from the Vulgate into the copy (Y) upon which Pts and Ps (corr.) are based. 19,15 L4 and Ps have approximately, the latter has added as correction between 1 and 4; Pfs: approximately 14,15 L4 has are 100 feet. Pts decrees to the correction.

Thirdly, the modern supplements of L4 come into consideration. When the Ms. was sold to Guise the first 152 leaves had not yet been lost, but according to an extant note, they were in wretched condition with the exception of foll. 33-56. Instead of most carefully preserving what was extant, the collector knew no better than to have these pages transcribed by a Dastur's "from another copy." Whether or not the copyist made use of the leaves now lost, or whether he confined himself to the other copy, he showed tact at any rate in employing a Ms. of the L4 series. L4a, as I designate these supplements, exhibits the latter type throughout, and in the

³ Ptn is younger than Pn and also certainly younger than the collation with the Mn. of Rikh.

In fact there were two, as may be inferred from the handwriting.

decisive variations it agrees with Pts. Pa (sec. m.), eventually also with Pto. Examples:

1,1 form Las. Pro. 10. 11 form Las. Pro; 2,0 form Las. Pro; 2,1 form Las. Pro; 4,1 form Las. Pro; 6,1 form Las. Pro; 6,1 form Pro. Pro (Corr.). Pro (Kr. formali), 7,14 and 19 for Las. Pro. Pro (Corr.) (Pro 1721), but Kr. formali), 4,17 formali Las. Pro. Pro; 5,19 for Las. Pro. Pro (corr.). Pro; 8,10 formali Las. Pro. Pro (corr.). Pro; 8,10 formali Las. Pro Pro.

On the other hand, the pieces of paper pasted over the old text of L4 and written sec. m., are for the most part worthless. The repairers of the Mss, were accustomed to paste such patches on before they were written upon, and then the words were supplied from a modern copy. These patches can in part be easily loosened, and underneath can be seen the old reading which is often quite different. Many important variants have in this way been obtained, e.g. examples in 13.35.

Finally, to this line also belongs the modern copy Jb (Avestà text with Pahlavi and Gujarati translation) seed in the first chapters. The only complete copy of L4 that comes seriously into consideration is Pta. But since Pta cannot be directly transcribed from L4 and has already been much influenced by the Vulgate, it stands after Ml3 in merit and reliability. The small gaps in L4 are frequently supplied by Pta after the Vulgate, e.g. 3.31.33.35; 13.30.47.48; 14.7, 15.13; 16.8. Other gaps the copy is that allowed to stand, e.g. 15.18; 17.8, especially the large ones in 19.41 seq. and the confusion in chapters 3 and 18.

I now come to the two old Pahlavi Vendidads Kr and L4. According to the statement of the colophons m Kr, the history of its text can be traced back some distance. Kr was written by Mitró-ápán i Kai-Khúsrób in Cambay (finished May 17, 1324) and copied in fact from the Ms, of Rústakhm i Mitrô-ápán. This Ms, of Rustam was written after Rustam 3 arrival in India, therefore after 1269, in which year he copied the Ardá-Viráf Námak in Iran.³

Mitrô-âpân, furthermore, recopied before the colophon of Rustam a still older colophon from his predecessor. This is dated May 10, 1205 and it notes that Aêrdashîr î Vohûman made a transcript from the Ms. of Hômâst in Scistan, and that he intended this as a present for Måhyår î Måh-Mitrô, a priest of Aûcak (Uchh in Punjab), who for six years had studied holy science with the priests of Scistan.—From this it is to be inferred that Måhyår returned to India with Aêrdashîr's Ms. of the Pahlavi Vendidâd, ca. 1205, and that the Ms. of Rustam was copied ca. 1270. From this unknown Rustam Ms. descend the two lines of the l'ahlavi Vendidâd, at the head of which lines stand K1 and L4.

All doubt as to the fact that L4 is a second transcript of the Rustam manuscript, co-ordinate with K1. is removed by the colophon of L4, copied in full in Pt2, which carries more weight than a whole page of original mistakes common to K1 and L4. Upon the basis of this almost undoubted fact we may form a sure judgment in regard to Mitrô-àpàn as a copyist. Although the two manuscripts often show striking agreements in readings which are as good as they are peculiar, never-

Here also are found the readings: (15) 1,1; 4 (10) lb.; everyway (1,1; Super 6 4,17.

² In this respect the copylist shows the influence of the revision of the test made at Jamasp's instigntion.

⁵ This is to be inferred from the mention of a Nishtpfir Ms. in the colophon to the Ardi-VirM and Godd-i Fryano (ed. West p. 266).

I Tradition will knew of this Pastur Adriashir of Salatan in Anquetiles day (cf. i, 1 p. 423; 2 p. 4). According to this tradition the Dastur
Adriashir himself had brought the Ms from Seistan to India about four
handred years before Anquetil. Two copies were there made of Adriashir's Ms and from these descended all Pahlavi Vendhilds in Gujarnt.
According to this, it must be assumed that Rustam had prepared two
transcripts of the Adriashir Ms, and provided them with identical colophone, and that Mitro-Apian had copied both of these. Against this,
first of all speaks the identity in the day of the munth (day Spondarmad
of the mouth Fravactio) in both Rustam colophons in K2 as well as
in Pta. The year is omitted in both. The tradition which makes a
mistake of one hundred and fifty years may easily have entirely forgotten the one copy of Rustam lying between Lq-K2 and the Adridashir manuscript.

² ho Westergaard (Fref. p. 3) already conjectured.

^{* (}Immounts in common of entire paragraphs, clauses, and of several mords occur in 9.46; 13.848, 15.85; 16.14; 17.8; 18.6, 19.13.41 req. 45. 20.7; 22.85 etc. (at 20.6 L4 control one word more than K1); of single words in 9.43-53; 13.16.45.52; 15.45; 16.1; 17.6, 18.13.10.31.55; 19.10.20.41; 20.5, 21.4, 22.7 atc. Striking dittographies are found in both at 13.10.30. 19.11, identical invertions 9.58; 13.18; 18.63. The evident corruptions in 9.34; 15.43 are alike in both. Also the great confusion in Farg. 18 arising from the misplacement of leaves, and the slighter confusion in Chap. 3, by which Para 19.36 (half) are inverted hafare 16, existed already in the text that Mitro-Aplia made one of.

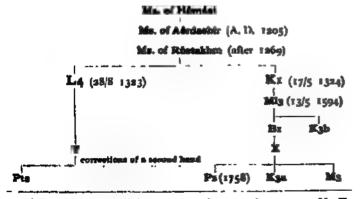

theless the two tend constantly to diverge from each other. Differences of the following kind are frequent:

	L4:	Mx:
20,9	دورالهنه.	DA-Ki)
13,81	ووعودات	ومالب
19,15	-a-qth-aa	. Ֆ. Հ. ա. ա. ա.
19,19	الدووب	السيوسوس
19,16	- Marie and the	(Cenno)
18,70	ر) ، دور اه	phanty
13,36	ستنهماش	والدياسي
14/13	ووسائطين	-sacksbury
E9,47	- CORTHANDO	- Comments

i. e. variants with at least two points of difference. In 19,5 out of 33 words 22 agree, 11 are differently represented; in 18,32 the relation is 7:5, in 21,4 as 15:9. In 20,6 in the case of the peculiar names for diseases, only one has been kept the same; five of them differ. Each of the two Mss., moreover, has a large number of special omissions of its own: Kx in 9,9,16; 10,1; 15,3; 16,14; 18,36; 19,24,34; 22,4; L4 in 14,35; 15,13; 16,8; 18,44; 19,80; 20,4; 21,7,22; 22,419.

After all, Mitrô-àpàn cannot be counted among the accurate scribes. This disadvantage offsets in large measure the advantage which he possesses in being the oldest source of the most important Avestà texts. It is only where both Mss. agree that the reading may be looked upon as well established, so far as other considerations do not speak against it; a single one of the two Mss. is alone not a positive authority. Mitrò-àpàn requires a very careful control by means of another class of manuscripts.

Genealogy of the Pahiavi Vendidad.

⁴ For this reason, if for no other, the somewhat younger Ma. Kz cannot have been copied from L4.

The second class is composed of the Mss. of the so-called Vendidåd såda, in which the Yasna, Vispered and Vendidåd are all combined, without the Pahlavi translation, into a single book for liturgical use. Among the great mass of Vendidåd såda Mss., the Persian ones are distinguished by differences so marked that Westergaard even set up two distinct classes, namely, the Indian Vendidåd sådas and those from Persia.

The arrangement of the texts in all Mss. of the Vendidåd såda, including the Persian, is the same. In the case of repetitions, while the Pahlavi Vendidåd prefers abbreviating or abridging, the Vendidåd såda, especially in the Vendidåd, avoids this; the text is given by the latter almost always in extenso. In general, in the case of greater divergences, the text of the Vendidåd sådas is the fuller, that of the Pahlavi Vendidåds is the more brief.

By no means rare is the case where all the Vendidad sådas agree in a majority of single words or clauses as opposed to a minority in the Paklavi Vendidad. In the case of the single Vendidåd såda Mss. differences arising from omissions or additions are very rare. All Mas, of the Vendidad sada ultimately presuppose a common archetype. There seems to me to be no doubt that this archetype in turn was excerpted and compiled from the l'ablavi Avestà Mss. We can hardly conceive of the Vendidad of the Sassanians without the Pahlavi translation. As a direct proof of this may be instanced numerous Avestà glosses of the Pahlavi translation which have crept into the Avestà text of the Vendidad sada. In separating the Avestà text from its Pahlavi setting several mistakes may have been made by the compiler of the Vendidad sada, namely in cases where the text was abridged and he tried to give it complete. Our Pahlavi Vendidads often leave us in the dark as to the extent of an abridgment, for they forget to give the catchword after the sign of abbreviation & (ved "as far as").

² The Yanna forms the basis of the Ventilikad sada. In the first part of the Yanna the chapters of the Vispered alone are intermingled, and in that case they are either inserted in the Yanna chapter or they are added at the end. After Chap, 27, i.e. from the beginning of the Gathas, the Vendiddd also is inserted as well as the Vispered, four Furgards at first and then regularly two. With Yanna 55, i.e. at the end of the Staota Yennya, all insertions absolutely cease and the Vasna alone is recited to the end.

At all events, however, the assumed archetype of the Vendidad sadas lies farther back than our oldest Pahlavi Vendidads in point of time, or before the Ms. of Rustam. Its independence of the latter is proved by a series of diverging readings which all the Vendidad sadas, including the Persian (Mfz. Jpz), have adhered to as a common class sign. Such readings as:

	Vendidād sādas:	l'ablavi Verelldids:
6,7	Ç upyleşmay) yıc.	-reference (Kr. Pta)
18,00	g v bis	greier (Kr. La)
6,43	witer Good	min me (R1)
14,13	- figh while had	44. mattern (2:4)
13 v	(Abmeti)	formation (Kr. Lq)
13.44	-¢Q-my	tipe (Kr. Lq)
14,9	gummum	Bryanni (Kr. L4)
3 **	موطاريههم	-meetinger (Eng. Mil3)
6,44	althretti imt	pamen wé (Kr. Pre)
13.16	Salmh z	Biograffic. Lag.
ib.	(int. dilenda pares). Estendiferent a	(mough (Mx. Eq.)
4:17	פרלים ואים	-grafighte (L4. Mis)
1,1	(message 2	financing (Milg. Ptm)
16,±	יצי טיפני	mAw (Kr. Lq)
4-17	specify of	-10mg/d) (Mis Pin)
\$120	set game	wanting Ks. Pts
13	tes famin	wanting Kt. L4
13.25	المعاقب مديات	۵4. س(کی (۲۹)

Between the two groups of the Vendidád sádas there are often only minor orthographical differences. Thus:

the I	ndian Vil. stalas:	Mfc. Jp::	the Mos, with PA	r
8,4 (46	r) mengenide	-10412_1000Pb	ىۋىنىچھورىيۇد.	(R1)
14.9	- juganger	بالكسوي	-40-4 tod	(L4. Ml2)
2,40	Warningeria	Manner of the	· Le Gallerandia.	(Mig. Pes)
14.15	emele Grandens	enstrongerens	partidupar.	(L4. K1)
5:24	فالسوساوسدهاد	والمأكاء فلحد محكا	قشيد سيرحد عود	(Mig. Pts)
5.44 An	d everywhen			
	فالكني وببالات	الالالثونياللة	SIBLE SHIPETER	
8,10	र्शकार निर्मा	ਜ਼ਿਲਾਤਰ ਜਿੰਨੀ	-termo-resty	(Kt. Pts)

On the contrary, the Persian group stands no less often in opposition to the Indian and in most exact and significant accord with the Pahlavi Vendidads. Here are a few examples:

th	ie Tudium Vd. abdas	: Mie. jpz: the	Pahlavi Vendidåda:
19,17	1997*()	·94g/9·	•
19.19	-free-w-tp	Shift shift	,

10.17	-frament-	. (Selec ation)	سوسمبسويين.
3.30	astallong	الماهاتين	
10,6	Bhec.	・金子より 金子	Urafile has Ur
11,10	·Sugante	اسمرياء	
7:16	# first specific	6m-19-00	•
9.47	-40 galdinia.	ا همانوران ممانوران	همخابق کا
5.04 (timest) timeset	البادسة	.
8,25	addum	-سن dees	1
8,14	addust g 	- dees	l.
Somet	imes all three	classes go a di	fferent way:
1G,s	- (101-1-101-4	· (Ingraving M g	·4cu/~~~
27.0	-en-Gree	an Alberta	mafflett
16,14	(ישטי (ישטי	بإسويت	מייטרי
14.0	هدرتش	-refrie	-จังสู้วาย

These few examples are sufficient of themselves to lead to the conjecture that all the Indian Vendidâd sâdas have come ultimately from a common source, from one ancestral manuscript, younger and specifically Indian. Other constant variants of a quite uncommon character, such as seem in 13,11 for seem; when 3,8 for when; many 2,12

The mintake in Kt. L4 is occasioned by the falling out of the preceding 400

² Confirmed by the P.V.

¹ Except Pr. Ba.

² So also Dhy, but in this probably an accidental alip.

³ Except Os. Be.

for mut, which can be explained only from a single accidental misreading, render this assumption indisputable.

The Indian Vendidad sadas represent the Vulgate of the three books mentioned. Their value from the critical standpoint has not been highly esteemed from the outset in Europe. It must be remarked, however, that the Paris Ms. Pr which was the first made generally accessible is among the very worst Mss. of all. Practical necessity may have called forth many such copies in India. The material that I made use of was but a fragment of what exists. I must refrain therefore from setting up a genealogical tree. But very few of these Mss, are dated before last century. So much only may be said, that the Indian Mss. of the Vendidåd såda known to me, fall into two groups, a better group, represented by Brz, L2, K10 (all three written in the preceding century), and an inferior set, represented by L1, Ma. O2, B2, P1. The Ms. Dh1 holds an intermediate position.' I shall first give a number of Shibboleths for testing connection with this or with that family. Thus:

In 17,0 after -wonged the -w is wanting in Brr. Ls. Kto, but

stands in Lz. On. Ma. Dat.

In the group represented by Br1, L2, K10 the text is generally more carefully handed down than in the other. The latter in its younger members more especially represents the Vulgate. The Mss. Brz, Lz are probably copied directly from the same original, whereas K10 stands a step farther removed.5 The London Ms., L2, which is some years younger than Brx, cannot be transcribed from the latter, as it sometimes has preserved the correct old reading, whereas in Brz the modern Vulgate has intruded itself. At 6,27 Le rightly reads 4,000 Brz with the Vulgate ஞாடில்கா; likewise in 2,31 ஆயும் வரும், Bri again வரும் manuscript of this group has the old reading or that which corresponds with the other group; thus Kro Applysmen in 16,7; Brr spong in 14,10; برام أوام المرام أوام (but not 8,34); معلى أن أن المرام أن أن المرام ال Brs may be regarded in general as taking the precedence among all the Indian Vendidad sadas that I

The position of Lx in the other group is instructive. Although the date at the end, placing Lx in the fifteenth century, is not genuine, this Ms. is nevertheless certainly considerably older than the other Indian Mss. of the kind. This explains why, in spite of its decided relationship to the inferior group, Lx nevertheless in certain cases stands opposed to Mz, Oz, Bz etc. and harmonizes with a Ms. of the other group. Thus:

Often Lx alone agrees with the other class or rerembles it in opposition to the other Indian Vendidad sadas:

From the last examples we can see how an old reading at some point of time may disappear and that, too, everywhere, without regard to the line of descent. This disappearance from all must have some common cause: this is, the intrusion of the more corrupt or al text into the written transmission.

From the last of the above lists it is evident that Ms stands upon an older stage in the Lz group than do O2, B2, Pz. Likewise in 13.45 M2 reads with Lz grown, while B2, O3, Pz agree in having the corruption of the three latter manuscripts B2 and Pz stand in closer connection with each other. They are both copies of a manuscript into which, as I conjecture, corrections from L4 or K1 had been inserted. Especially striking readings from B2-Pz are:

instead of Many; In the words Indian; was to ample it is a solution of the other vd. sides); where of Many; Indian 19,30 (for Instead of Many); Indian 19,30 (for Instead of Many); Indian 19,30 (for Instead of Many); In the words Indian to Any in 13,30.

As to the date when the ancestral manuscript of all the Indian Vendidåd sådas was brought to India we have no

definite information. It may, however, be shown without much difficulty that already in the first half of the four-teenth century the Vulgate text was in existence in India. Herbad Mitro-apan is by no means rarely led astray by the Vulgate. Thus at 21,2 in L4 he writes apandous against Kx and all the Persian Vendidad sadas, but with the Indian ones collectively. A very marked case is 8,97. There instead of week he writes in Kx at first week and then we over it as correction. This extraneous he is again met in the Lx group, in fact in Lx, Ma, Ba, Px.

A problem, indeed, is furnished by the third class of manuscripts, the Persian Vendidad sadas. This class is represented in Westergaard by Ko; but for Vd. 1-9 he had also at his disposal collations and a transcript of its original Mfs (designated by him as R). The Ms. Ko. written in Surat A.D. 1746, is a very true copy, to be sure, of Mf2. But apart from small blunders its value is materially impaired by the fact that, according to a habit of copyists, the corrections by a second hand are often copied instead of the original readings.1 It was my good fortune not only to be able to compare the valuable manuscript of the Mulla Firuz Library, but also, thanks to the efforts of Dastur Jamasoli, to have sent to me in Jps an equally valuable fellow-countryman of Mfa, which also gives some information regarding the age of this class. Mfs was copied in 1618 by Khûsrôb who does not mention his source. The history of the Ms. Jps, which is about twenty years younger (see above). can with the help of the colophon be followed back to the third member, namely to Shatrô-èyar Erdashir, for which copyist the year 1516 is elsewhere attested.

The agreement between Mfa and Jpz is most striking. Both these manuscripts accord with each other almost regularly in omissions, mistakes, original readings, and in the many additions and repetitions which are characteristic of this class. Whether both are copied from the Ms.

^{* 18,72} Pr reads with L4 regions Es. The corrections were accordingly taken from the L4 series. From Ha I have nothing noted for this passage.

² Ominion in common to both are found s. g. in 3,10; 5,103; 19,3; 20,6, aborter or longer additions or repetitions in 2,11; 3,10; 5,10 seq.; 6,16; 5,10, 5,10 seq.; 9,11; 13,21.40; 15,10; 16,11; 15,16; 19,14; 20,6; 22,1 seq. Rare miniakus, s. g. Georgius—Ausgrup 9,14; 2,14; 20,6; 23,4; 43,210; 3,11; 3,21; 3,11

of Marzapan, or whether they are copied from a separate original, is a question that can only be answered with the aid of K4 and must therefore be reserved for the Yasna. The text of both Mss. is in part still more full than that in the Indian Vendidàd sàdas, in which respect undoubtedly too much has been done on the side of generosity. On the other hand the text is almost entirely free from the embarrassing glosses. A glance is sufficient to show that in details both Mss. give a considerably better text than the Indian Vendidàd sàdas. The question is whether this is due to their standing so much nearer to the common archetype, or whether we are to assume for Iran a materially better transmission of the Vendidàd sàda than in India.

Their peculiar intermediate position between the Pahlavi Vendidåds on the one hand and the Vendidåd sådas on the other has already been made clear by the series of examples above. The cases in which they harmonize with this side or agree with that, or where they even go out of their way, would pretty nearly balance. Where L4 and K2 are at odds, Mfs, Jp2 remain wholly neutral, inaunuch as they agree just as often with the one as with the other. Thus the readings:

In these readings they represent in 17,5; 19,19; 14.9; 13,50; 9,12; 22,3 the Anti-Vulgate. The comparatively

rare cases in which Jpz, Mf2 differ materially from each other are interesting. Their relation is then often analogous to that of Kz-Lą. Thus in 14.7 Mf2 has 44.4 which agrees rather with 44.44 in Kz; Jpz, however, has 44.44, and L4.444. Further readings are:

From the last examples especially, we can plainly see that there existed also in Iran a Vulgate text, generally inferior, which here and there influenced the copyists. Taking them for all in all I should be inclined to follow the view of Westergaard, that in the Iranian Vendidad sadas we have the descendants of a critical revision, or new reduction of the text. This revision was at first an external one. Certain orthographic principles which also the younger convists in Iran followed, were carried out. Among these I count the preference for instead of injury injury instead of injury injury instead of injury injury instead of injury for 4-w, 4my instead of 4cw; for at the end instead of Sometimes the editor may have allowed himself to be influenced by the Pahlavi translation, e.g. my in 8,13. In cases, however, where the revision goes deeper we need hardly assume mere arbitrary changes1 which their author made in accordance with his better knowledge, or because he thought he knew better, but may rather ascribe these to strict adherence to a Pahlavi Avesta codex now lost.2 L4, Kx represent the tradition in Seistan, Jpz. Mfa the old written transmission of Yazd. Both transmissions, however, are still quite close to each other. If it were our task to reconstruct the text of the archetype of the Vendidåd sådas, an eclectic use of Mf2-Jp1

الله بالله عندان المستوالية عندان المناهدي المناهدي المناهدي المناهدية الم

⁴ Westergaard Pref. p. 8.

^{*} The same holds good of course for the Vasna and Vispered of the same Mss.

would appear from a critical standpoint a very hazardous proceeding; but when we are in search of the best written transmission of the Vendidad these two manuscripts are of inestimable value for text criticism.

More extensive in material and at the same time more complicated is the manuscript transmission of the Yasna. Like the Vendidåd, the Yasna has been handed down in a twofold form: first, the text combined with the old commentary; second, the sada-text with the ritual preacriptions (Nirang or Kirià). As to contents both forms of text are exactly alike. The external difference is even Jess than in the Vendidad, except so far as the Mss. with the translation give the numerous repetitions by no means rarely in extenso, and on the other hand the sada-text is by no means sparing of abridgment. Along with the Pahlavi translation we have also, for the greater part of the Yasna, the later Sanskrit translation by Neryosangh The latter, however, is based throughout on the Pahlavi translation; the Sanskrit Yasna Mss., therefore, form only a special group under the first class of manuscripts. The såda-texts, however, fall into two separate classes, for in this case the regular Yasna sadas stand over against the Yasna of the Vendidad sadas.

Only one manuscript of the Yasna with the Pahlavi translation was accessible to Westergaard, namely, the old Copenhagen Yasna, Ks, which he rightly regarded as his best codex. In details, however, he stood in need of a correct standard for testing the trustworthiness of the manuscript. Such a standard is afforded in the first place by the Pahlavi Yasna Is which is only a few months older. According to the characteristic handwriting and the colophons, both Mss. are by the well-known copyist Mitrò-apan, the scribe of both old Pahlavi Vendidads. In K5 the copyist even mentions his source, the Ms. of his great-great-uncle Rüstakhm, scribe of both the Vispereds in Copenhagen and of the original source of K1, L4, who must have prepared the manuscript about 1270. In Js, on the other hand, Mitro-apan, contrary to his custom elsewhere, is utterly silent as to his source."

Ja and K5 are two closely related manuscripts. Characteristic mistakes and peculiarities which belong only to these two, are, for example, the following:

31,44	- Salanini	instead of	وسوسونيس
8,4	4~~	M	·Simme
19.7	- Carabbarde	10 (-MM-	
46,11	الإستالات	=	بالمحويم.

33.7	- Janjung	14	فسكسنا اطل

At 28,8 Kg reads gramman, Ja gramman; both insert in 71,9 among ; again in 20,4; 48,5; 53,8; 68,8 both pr.m. omit respectively two, five, four, four words. As to the degree in which the two Mss. are related to each other, and whether Ja is also a copy of the Rustam Ms., a comparison of the two manuscripts alone is not able to give any answer.

During my work upon the Yasna a second class of manuscripts of the Pahlavi Yasna appeared. But unfortunately the material in my hands during the printing was incomplete; the youth, moreover, of the members preserved did not at once lead one to imagine their real importance. Representatives of this family are, in the first rank, Pts. Mfs. Mfs. and in the second. Fix and Brs. Pt4 came to hand when the first sheets were already in press; Fix and Brs could be used only for the last sheets: and Mf4 did not reach me until after the entire Yasna was completed. The important keystone in Yasna criticism was accordingly wanting to me. The history of the Ms. Pt4 itself has been recounted above. Dastur Peshotan, according to a private communication to West, inherited also another Ms. which is said to be transcribed from the same old original as Pt4. This second copy, I have not even seen, but it ought to be made accessible. The copyist of Pt4 is evidently identical with that of Pt2. The further statement of Dastur Peshotan that Pt4 is copied from an Iranjan Pahlavi Yasna is substantiated

¹ K5 and J2 were written at the order of a certain Cibil Sangan.

² The Pahlavi colophon in Ja tills the last page of the Ms; a page with a bankrit colophon (after the manner of Ks) may have been

by the elaborate Pahlavi preface in Pts. By the aid of this preface the history of the codex may be traced back quite a considerable distance. Pt4 is based upon the Ms. of Hôs hâng 1 i Sîyâvakhsh i Shatrôyâr i Bakht-âfrîd i Shatroyar. Hoshang had copied the Ms. of Herbad Mitrô-apan i Spêntô-dàd i Mitrô-apan (the grandfather of the copyist of Ja, Kz, K5, L4) and the latter had copied the Ms. of Herbad Mah-panah i Azad-mard. Further on in the preface there are still older colophons of Mahpanah's predecessors in part recopied verbatim, but their connection is not quite clear. This much, however, may be gathered from them, that Mah-panah's Ms. is based upon a Ms. of Farnbag. This Farnbag, in turn, had combined his Ms. out of two Mss., viz., from that of Mahyari Farukho-zád and that of Mah-vindád i Naremáhán i Våhråm-Mitro, one of which Mss. contained the Avestà text and the other the Pablavi explanation. This Mahvindad i Naremahan is one of the oldest authenticated copyists. He wrote the earliest colophon to the Dinkard A.D. 1020.1

A second copy of the old 110 shang Yasna is Mf4. This Ms. appears to be somewhat younger than Pt4, but the difference in age cannot be much. At all events they are both independent copies of the same original. Pt4, Mf4 read in

8,7		instead of	Saple
50,1	ip-npo-e	**	Marale 10
57:24	MONTH MONTH	90	- ካላሴ ነውው
9.3	خۇرسىۋات.	**	wid- wi d-
13,1	سهائسها	и	سيهواند
45,8	(den years)	**	وسدسي.
11,6	Calle Leader.	**	Charleston.
48,10	-majgregen	18	mappan

Pt4 has 62,4 How Many, Mf4 How, but I struck out pr. m.; both read "TANDA" 40.3.

In some places where a blank space in both Mas, indicates some damage in the original, Mf4 omits some more words than does Pt4, e.g. in the Pahlavi to Yasna 68,7.21; 71,8.12. The injury to the Höshång Ms. which already

existed in the year 1780 had therefore advanced still further by the time that Mf4 was copied.—In Pt4 there are wanting in the Pahlavi to 3,8; 10,9; 28,4n; 33,13n; 37,3; 45,2r, respectively eight, six, five, one, nine and three words, all of which stand in Mf4. Conversely, Pt4 gives eight Pahlavi words in 51,3n and six l'ahlavi words in 53,1b which are forgotten in Mf4. This proves sufficiently the mutual independence of the manuscripts. They both reciprocally rectify each other. In general, however, Pt4 surpasses its sister manuscript in correctness.

We do not know when the codex Hoshang was brought to India. It must still have been in its native land anno 1741, for in this year we have a third descendant from it, namely, the Iranian Yasna sada of Rustam, Mfr. In this the copyist has excepted only the Aventa text. omitting the Paldavi commentary. Nevertheless there is not the slightest doubt as to Mf1 being descended from it. The introduction which precedes the Yauna proper is verbatim the same as in the Pahlavi Yasnas, and is not that of the Vendidad sadas nor Yasna sadas. The small punctuation mark - contrary to the custom of the sådatexts is frequently employed, and that too chiefly in cases where in the original the Avesta text was interrupted by the Pahlavi commentary. Besides this, Mf1 participates in many of the characteristic readings of the family of manuscripts represented by Pt4-Mf4. Thus Pt4-Mf4-Mf2 read in

51,4	Property of	instead of	وسيمهم
41,4	turnelija.	1)	henremblyn
9,1	page-in-	14	raffer 10 miles
10,11	ويهسمار.	11	a) angg

63.2	Mr. Billion.	10	فإسلامكانها
44.19	mafferd	41	Buffwill
32,1	· (cycle)	10	سورادورية

All three alike read Duckeren 35,7; . Goodmiding 53,3.

Mfr is a manuscript executed with great care. But whereas the two others, Pt4 and Mf4, are purely objective copies, Mfr is the work of a scholar who often endeavoured to adjust the differences between the Pahlavi Yasna and the Persian såda-manuscripts known to him. We thus have to distinguish a double element, Hoshang readings and the intruding Persian Vulgate. What has

¹ There are other Mss. written by this Höshäng A.D. 1478 and brought from Sharf-didd near Yand to India by Narisan Höshang, according to West, S.B.E vol. xxxvii, 428 n. 3 and a private communication from West.

² Cf. West, S.B.E. vol. axavil, Intr. 34-

been said will become clearer from the following comparisons. Thus:

	Pt4. Mf4:	MEX:

44.02	-G starfetti val-	gew क्षुल्ल (acc to Jpz. K4 and Mfa)
71.41	السكاء نؤسة	embagy with Jpc. R4

The thought naturally suggests itself that Rústam made use of Jpz in his revision, for according to his autograph postscript to Jpz this codex was in his hands. But from some of the specimens already given, especially from 43.12; 9.5; 34.7, he must also have had other materials at his disposal. Mifz was revised again by a second hand, making use in fact of Höshäng's original. The points in which it differed from this were partly removed by erasures, etc. Thus in Mfz and to a total has been corrected to proof. Pt4 and Mf4, to be sure, both have the Vulgate proof, but in the latter proof is made out of this by a personal correction of the copyist. This, accordingly, must have been the reading of the old Iranian Yasna in harmony with the Pahlavi translation. Thus are explained the erasures and corrections in

32.0	gsfire Mit () omed) gsfire Jpr. K4	1	Wife Pra
31,13	न्तुमुर्कान Mfr (= corrected to *) न्तुमृक्तान Mfr. Jpr. K4		ન્દ્ર સુર્વે જમ P 14, M 14

Sometimes, however, it is the correction that has given rise to the difference, e.g. in 38,5 Mfz has pr. m. welcome in agreement with Pt4, Mfa, but this corrected to workloams by the second hand; likewise with wayness.

With the help of these three transcripts which might be increased to four by the addition of l'eshotan's second manuscript, the reading of the original codex of Hoshang may in many cases be restored. It was first by means of the codex Mf4 that I got much light on the subject where a mere comparison of Mf4 and Pt4 led to no result. The late arrival of Mf4 is all the more to be regretted because it is quite an exceptional case that we have more than two direct copies of a lost codex and that codex a standard one as Hoshang's was, and which would have had to be made the basis of the Yasna text if a happier fortune had been allotted it. In the following I give some specimens of the text restoration. Thus:

Furthermore, two younger descendants of the same family are known to me; they are likewise såda-texts, namely Bra and the Yasna text of the Vispered såda Flx. The latter is probably a direct transcript of Mfx, corrected in passages according to the Vulgate; the corrections in Mfx are partly made use of in Flx, partly ignored.

That Fix belongs to the class of the Pahlavi Yamas is proved by the readings and 51, sec. (with "); - 20, cm (with "); - 20, cm 9, se;

the special connection with the family of the Hashing codes is shown by readings like function 32.3; which met 48.10; where There's 9.27; and the direct descent from Mfx by the following comparisons:

Pt4. Mf4:	Mfs. Fls:	
નુવારદિ,	egenthe	10,11
my Frit	يُحلُ الأهلات.	46,22
بديها مدد بابد	"mp-zarefin	9.47

30,8	مستوبو		ممكادو
46.10	بهموسم. دواي		-

Pt4-Mf4 on the one side and Ja-K5 on the other are the offshoots of two independent but cognate lines of the Pahlavi Yasna which have branched off from one common original manuscript. Whether this original manuscript falls among the predecessors of the Hôshang codex that are enumerated in Pt4, may for the present remain an open question. This common origin is attested by a series of readings. Such are.

Meanwhile, in consequence of their long separate development the points of difference between the two groups preponderate. Pt4-Mf4 approach rather the Persian sadatexts, Ja-K5 the Indian Vulgate. In general Pt4-Mf4 give a more antique text than J2-K5 in spite of their being four hundred and fifty years younger than the latter. I give a small selection from these differences. Thus read:

20.4 tenden de la constitue de		Pt4. Mf4:	Ja. K5:

The younger line (Pt4-Mf4) serves not only to rectify the elder in many instances, but also gives a sure test for estimating the mutual relation of Ja-K5. From my extensive collection of differences between the two Mitròâpân Mss. in comparison constantly with Pt4-Mf4 I have taken at random fifty examples. Thus read:

To sum up, J2 agrees thirty-one times with Pt4, Mf4, and K5 agrees nineteen times. According to the impression which I have received from a comparison of the two Mss., these numbers correspond to the relation of the codexes throughout. Before I communicated this result to West I asked him for his opinion as to the relation

⁴ The reading substantiated by the P.V.

^{*} With Pt4. Mf4.

⁴ More to Pt4. MI4.

¹ With Pts. Mis.

¹ More to Pt4. Mf4.

of the Pahlavi translation in Ja-K5 to Ptq. The result which West came to is still more striking. For K5 Spiegel's Pahlavi text edited after this codex had to be substituted.

			Hå: 43-46:	
Pt4 agrees only with Sp.	& times	52 timer	58 times	118 times
Pt4 ., ,, ,,]2	16 ,,	136 ,,	tog "	260 m
Pt4 differs from both	25	140	138	303

Such results, to be sure, are not infallible. Inspection shows how the same mistake may spontaneously arise within two separate families, e.g. such readings as

When furthermore, e.g. in 19.15 Ja reads with Ptq. Mfq. The against the in K5, or in 34.7 the same Msc. read there against the property one must be on his guard against wishing to draw special conclusions from such mistakes, for they are mistakes that are made quite involuntarily by the pen of the scribe. Taken for all in all the balance appears to stand less favorably for K5, and in the descent K5 apparently stands a step lower than J2. The codex J2 would then neither be transcribed from the Rüstam manuscript nor from a sister manuscript of it but directly from its original. And this original must in fact have been without signature, for Mitrò-àpàn does not mention his predecessor in J2, nor does he mention in K5 the predecessor of Rüstam, although such was his custom elsewhere.

The descendants of the Mitró-ápān manuscripts are few in number. No copy from Ja, as it appears, has been preserved. From K5 the Munich Pahlavi Yasna M2 is descended. Furthermore, the Avestà text in the two older but wholly worthless Yasna sàdas, L27 and B3, is excerpted from K5 but in a very inaccurate and faulty manner.

Between these two families stands the family tree of the Yasna with Sanskrit translation by Neryosangh. Westergaard for the Sanskrit Yasna made use of the two closely related Mss. **K6** and Prt. He conjectured that both were copies of the same original, in fact of Neryosangh's own personal copy. The original of both copies has since been found in J3. But through the discovery of a second Sanskrit Yasna, Sz, independent of J3, the original text of Neryosangh has been moved a long distance back and the state of the case has been completely altered.

These two oldest representatives of the Sanskrit Yasna, 13 and Sz, are not dated. According to the paper, Sz may belong to the fifteenth or even to the end of the fourteenth century. In has suffered so seriously from dampness that the paper does not permit of any conclusion being drawn as to its age. Destur Jamespil's estimate (almost six hundred years) would be too high. Sx breaks off with the next before the last line in 46.70. At the beginning three leaves are missing. The Ms. appears never to have been bound. Now, if we assume that the tooth of time has destroyed, as in the case of most unbound Mss., about as many leaves at the end as at the beginning, the complete Ms. would have once extended to the end of Chap. 47, i. e. exactly as far as Neryoxangh himself had carried the translation. Spiegel* has clearly shown that Neryosangh's work ends with Chap. 47, and that at that point a much less skillful hand undertook the continuation of the work. Ormazdyar, son of Râmyar, a relative of Neryosangh is regarded as the continuer.1 With respect to this continuation Is is instructive. In this Ms, the first hand goes only to some in Y. 54.1. Chap. 55 and the beginning of 56 are supplied by a later hand. Furthermore, a still younger and inferior hand has added a piece out of Chap. 57. In K6

....

The variants are especially to be compared at Chap. 10. B3.
L17 read 11.6 frequency from R5 free compared at Chap. 10.

All the rest of the Sanskrit Vasnas that are known to me go book 10 J3, these are P21, K6, J4, P3 and the fragment in K25. To these probably belong also the Ms, which was in the private possession of Burnoul. The Mss. however, are hardly co-ordinate with one another. Only P22 and K6 are careful direct transcripts of J3; on the other hand J4 appears to be transcribed from K6, and K25 from P21, cf. 53,6 n. 7. In 31,5 J3.4 (and K61) read assumptions to, P22. K25 assumptions instead of assumptions. Also P3 is probably a copy of P22. In case maxious inquiry should be made whether P22 may not be older than J3, I remark that at 27,18 J3 reads assumption. P22 research; 7,24 J3 assumptions; 20,3 J3 from (instead of from), P22 from; 44,20 J3 has fire with a rather long t, P22 fro; 43,10a in P22 four words are missing which stand in J3.

² Introduction to Nerioteoph's Sanskrit-Cheretisung p. 12.—The gap which all Msa, have in Y. 11,3 seq. may be explained from an early loss of some leaves of the archetype, but more likely from a gap in the copy used by Naryoungh.

^{*} Darmesteter i,call.

PROLEGOMENA

the text goes to Y. 57,29; in PII to 65.5. In PII the last part of Chap. 54 is likewise from another hand. Consequently, the immediate continuer of Neryosangh did not go farther than to Chap. 54; the remainder of the Sanskrit translation, from Chap. 54 onwards, is merely the more awkward efforts of younger copyists.

It is needless to say that Neryosangh based his work upon a Pahlavi Yasna; such a text, however, was just as much a rarety in his time as to-day. Certain readings of Neryosangh which may be inferred from the agreement between J3 and S2 are found elsewhere only in the Pahlavi Yasna Mss., e.g. \$6+45,1 (instead of \$66+66+66+66+66). On the other hand with reference to the Avesth text Neryosangh does not appear to have held strictly to his copy any more than in his translation of the commentary. So far as we can reconstruct his own written text out of J3-S2, it contained numerous readings of the Vulgate and corrections or oversights of Neryosangh himself.

To the readings of the Volgate belong "To the readings of the Volgate belong "To the readings of the Volgate belong "To the second of Total 32,16; "To the emundations: "The opening 30,1; "The opening 45,1," to the emundations: "The opening 30,1; "The opening 45,1," to the emundations: "The opening 30,1; "The opening 45,1," to the emundations: "The opening 30,1; "The opening 45,1," The opening 45,1," to the emundations: "The opening 30,1; "The opening 45,1," to the emundations: "The opening 30,1; "The o

To the orthographic peculiarities of Neryosangh belongs the habit of writing 1 for equinternally as well as final. In dividing sentences Neryosangh sometimes departs from the traditional division of the Pahlavi translation, cf. 20,1,2,3⁴; 21,1; 38,4; 40,1; 44,2 etc. The omission of four words in 44,18 is likewise probably only an oversight of Neryosangh.

It is not superfluous to illustrate from every side possible the relation of the two old Neryosangh Mss. and of the representatives of the two families of the Pahlavi Yasna. So far as Sz and J3 agree and permit us to draw inferences as to Neryosangh's archetype, this latter occupies an independent position between the two, but inclines rather to the more conservative group Pt4-Mf4.

Br. Js in 32,3 read - 4395000 with K5 (Ja), not - 539405000 with Ptq. Mfq; furthermore Sr. Jq. Prz (J3 defective) in 19,6 with Js. K5 - 74950, not - 2015(1) (Mfq. Ptq).

On the other hand Sz. Ja read with Ptq. Mfq: but Ja. K5:

म•ेल	-1941	46, r	
مسكاة لاذهر	مضدفةمان	34-1	
-Manierlinan	-ilithaniamii silm	9.44	
· (a failis)// ··	-6600	43,10	
ψ	(g(c) - y(c)	32,6	
ئىدە بەرى»	-walled	31/181 44/19	
الظرائعو (-بدس)	3-differen	44,15	
وتبوالمه	Meanin)	10,15	
أبيويت	پ ارده س ه (پاره د	46,17 (
Assugges	Hyeroldives.	9,41	
appendud	westing	40,3	

51-J3 have, besides, a number of older and better readings which are no longer found either in Pt4-Mf4 or in J2-K5. To these belong:

summing Pts. Mfs. samueling Ja. Ks.

-सुम्बर्ग्यन्त्रः, न्युम्बर्ग्यन्त्रः 44,त्र agalast न्युम्बरक्ष्यः कार्यः । 44,त्र against निर्माणेत्रेः, वर्षन्, वर्षा 10,त्र अध्वास्तरं नार्धा सदः

In general, however, the Avestå text varies considerably in the two Sanskrit Mss. and it is interesting to observe the reciprocal relation. In case of differences between Sz and J₃, Sz leans strikingly towards Pt4-Mf4, but J₃ on the contrary to J2-K₅:

			-	•		
	Bz:			Ja:		
12,4	-Sharmfalfact	with	Pu, M4	անութագուր	with	ja. Ks

41,3	-64604	30	Pt4. Mf4	(NEXT	**	ja. Ks
0.1	سجي.		Pts. Mis	مورامية	31	Ja. K5

¹ Neryosangh expressly states in his introduction that he has rendered the Yassa into Sanskrit from the *Publicity and a*, cf. Splegel 1. c. p. 2.

⁸ Of course it is also possible that the two lines represented by \$1 and J2, as they recode, converge not in Neryamungh's original text but in a copy of it, and that many mistakes have first crept into that copy.

^{· 10,6 -} меночийные Ва, - челийные ја; при зВ.3; при 46,14.

⁴ Here Pt4 also differs from Js-K5 in the division of the sentence, St-J5 have the same as Pt4. In two of the following examples the sentence division of Neryoungh has been restored ucc. m. in Pt4.

	8::			Ja:		
12,3	- Moto	witi	Ptq. Mfq	سومي.	whi	h Ja. Kg
29,4	-Defile-	98	Pt4	4 Alphani		Ja. Kg
	-194 -4ga			مالهاش:	ψĐ	Ja. Kg
42,6 **	-پامرانههم	99	Pt4. Mf4	مۇمۇرىيورىد.	10	Ja. Kg
10,11	f " 	PB	Ptq. Mfq		-	J»
32,16	Subigan	p9	Pt4	Emong:		rer to Ja. Kş
44.3	gorffyge.	90	Pt4. Mfq		wit)	i Ja²
42,4	Surra Chales	77	Pt4. Mf4		99	Ja. K3
43.20	ن٠-ن	11	Pts. Mile	-10	98	ja. Kg.

The opposite case is much more zero; thus in 34,10 St reads with Ja. Es troiw, Js with Pt4. Mi4 troiww; 43,5 St with Js. Es two-my, but Js with Pt4 troiww, in which connection it is to be noticed that troiww, transport is the Vulgate.

Where Ja-K5 themselves in turn differ, &x inclines as a rule to J2, J3 to K5:

43,1 vérant Ez. Ja. Pt4-- gérant Ks. Ja.

Where the Vulgate and Pahlavi Yasna stand in decided opposition to each other, Sz often agrees with the latter, I3 with the former:

8 s t	Ja:
32,1	*****
43(10 1702**	-6489**
31 to -44 hand	- Annaha
46.15 -460 9-40	-676-14-6

The text of the Sanskrit translation has remained in both Mss. more alike. With reference to the Avestà text, however, the general impression is that Sz gives a much more correct and santique text than J3; the latter stands much below Sz in value.

St offers readings which are alone of their kind, e. g. gradumins 12,5, or are better than the readings of all Pahlavi Yasnas, e. g. who up 9,5 (: "The up Pre. Mile; "mandings" Kg. Ja.2). The text of J3 is often much dialogued by grave blunders and had readings, e.g. "mangifity 9.44 (Sz - mangifity); -m "mangifity 9.44 (Sz - m "pi-man).

When \$x\$, therefore, in the case of a conflict between Pt4-Mf4 and Ja-K5, throws its weight in the scale in favor of Pt4-Mf4, and when again in a conflict between Js and K5 it favors for the most part Js, this Ms. serves to corroborate completely the judgment passed above in regard to the relation of the four Pahlavi Yasnas.—\$z must be regarded, if not as the direct, at least as the truest continuation of the Nervosangh text. In favor of this also speaks the presumable compass of the Ms. to the end of Chap. 47 and likewise the palaeography, for palaeographically \$z\$ stands next to the two old Nervosangh Khords Avestås, J9 and Hs. In J3 on the contrary the text appears to have passed through a second recension.

While the cases of accord between J3 and Ja-K5, especially K5, down to Chap. 47 inclusive, appear more sporadic, they increase on the contrary in a very marked degree from 48-53. I give a small selection of such cases:

It follows as a necessary consequence of this, that the continuer of Neryosangh's Sanskrit translation must have used K5. In fact he made K5 the basis of his continuation of 48-53, and with the help of this Ms. he revised at the same time the text already translated. Now since Mitrô-àpân, however, wrote his Yasna in 1323, the continuer of Neryosangh cannot possibly have been his cousin Ormazdyâr, for Ormazdyâr, the son of Râmyâr, lived eight generations before Pêshyôtan who, in the year 1397, wrote

¹ So to be corrected in the edition as the reading of \$1! The readings from \$5 in sheets 7 and 8 could not be inserted except in the proofs.

² So to be put into the text itself in the edition!

⁶ K5 quite similar.

^{*} This rule of course has exceptions: 44,8 graph Mg. 82-

the colophon of the Munich manuscript of the Gosht-i Fryano. If, with West, we reckon the medium length of a generation at twenty five years, the result brings us to the end of the twelfth century as the date of Ormazdyar. This must also be about the date of Neryosangh.

A further question now arises: which manuscript of the Pahlavi Yaana can Neryosangh have used for his work, and had the Pahlavi Yaana already in his time split up into two groups? The latter question I think must be answered in the negative in consideration of certain inferior readings which are common to both, while Neryosangh has the right reading. Some of these corrections Neryosangh may himself have made, but in other cases this is improbable, for his Avestå knowledge was not at any rate profound. The most important are:

P	ahlavi Yasta	Neryosangh
9,22	استانج.	السجاسي.
32,6	withill	mhrmfin
44.41	المعرغرات أأ	المحتر والدحان

The Ms. in which the two lines converge as they run back, cannot therefore be placed before Neryosangh, but it must be placed before 1280, at which time the Ms, of Rûstam and probably also of his nephew Mitrôapan-! Spend-dad were written. Between the Ms. of the last named Mitrô-Apan and that of Farnbag, there intervenes only a single Ms., that of Mah-panah-i Azadmard. This, after all, must be the ancestral manuscript of both families of the Pahlavi Yasna and at the same time a sister manuscript of Nervosangh's original source. Regarding Rûstam, we know from the second colophon in Kz, that he came from Iran to the land of the Hindus and there copied the Pahlavi Vendidad. He likewise copied the Vispered in 1278, in India. The Gosht-i Fryano, " however, he probably copied in Iran. Now, did he copy the Yasna in Iran or in India? If he copied it in India this cannot have been done directly from the Ms. of Mahpanah, for the latter's Ms. remained behind in Iran where it was transcribed nearly contemporaneously with Rûstam, by Mitrò-àpàn-i Spend-dàd. Rûstam in that case must have brought with him to India another copy of the Mah-panah Ms., a Ms. X from which the Indian Pahlavi Yasna is

descended. If he copied it in Iran, then the Ms. written by him must itself be the ancestral manuscript of the Indian line. The former supposition that he copied the Yasna in India receives material support from Jz. () the two nearly related Indian Yasna Mss., Jz and K5, only one, namely, K5, is positively a copy of the Rûstam manuscript. As to Jz, however, it may in a measure be made probable that this Ms. is copied from an older Ms., thus from the original source of the Rûstam Ms., which still existed in India in the year 1323. This would be the X assumed above.

According to what has been said, all the Mss. of the Pahlavi Yasna, as far back as the Mah-panah Ms. inclusive, are later than Neryosangh (ca. 1200). As in all probability he could derive his originals only from Iran, there comes into consideration, so far as he is concerned, only the Farnbag Ms. (ca. 1110). The Farnbag Ms. itself, however, he cannot have used, for this remained in Iran where it was copied by Mah-panah about the time of Neryosangh. He must have had before him another copy (Y) of the Farnbag Ms., consequently a sister copy of the Mah-panah manuscript. The mutual relation of our manuscripts is fully in harmony with this supposition.

The last question is this: how did Farnbag come to combine his Pahlavi Yasna from two different Mss. instead of being content with a single original? Probably because in his time an Avestá-Pahlay! Yasna was no longer aurylving, or rather had not yet come into existence. The ritual of the Yasna, as shown by positive evidence. goes back as far as Sassanian times; the Yanna texts themselves, however, with the Pahlavi translation, were inherent in the various Naaks, especially in the Stod-Yasht Nask. The compilation of the text book Yasna may have been first undertaken even at a very late period. Might not the two Dasturs Mah-yar and Mah-yindad (about 1020) have first separately undertaken this work and Farnbag have united their newly edited texts for the first time into Avestà-Pahlavi Yasna?1 In that case the Introduction in Pt4 would disclose the entire history

A Darmesteter i, exil.

³ Cf. above p. avili.

Since the above was written, West has drawn my attention to the fact that this same Milh-vinded is several times cited as commentator in the Public's Yassa; compute West's note in S.S.A. vol. v p. 244. The final reduction of our Public's tempelation of the Yassa may accordingly be due to Familing.

PROLEGOMENA.

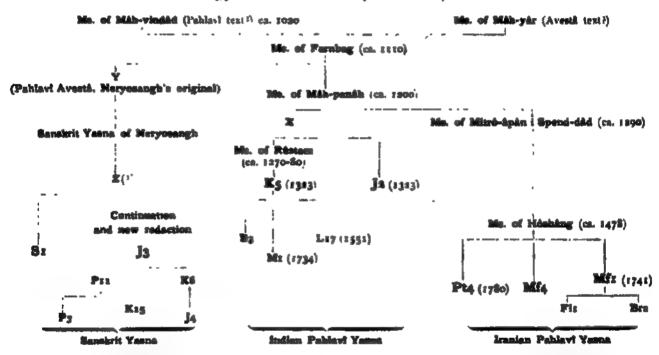

of the Pahlavi Yasna. A tentative rough draught of a genealogy of this entire class is given in the middle of this page.

As to the two classes of såda-texts, the first, or that of the Vendidåd sådas, falls into the two sub-divisions which are already familiar from the Vendidåd, namely, into the Persian and the Indian. The Persian Mss. do not offer so rich a store of original old readings for the Yasna text as they do for the Vendidåd, inasmuch as the other sources are in this case also more abundant. But they are very important as a control. Associated,

They often agree with the Pahlavi Yasna in opposition to the Indian Vulgate; more often still they agree only with the Iranian line of the same; sometimes they each go their own way. Their agreements and their differences as regards one another are manifold, yet K4 inclines somewhat more to Jpz than to Mfa. All three read in agreement with the Pahlavi Yasna and in opposition to the Indian Vulgate;

45,0. They leave out the glosses which have crept into the Vulgate, v. E. 55.5.

Genealogy of the Pahlavi-(Sanskrit-)Yasna.

furthermore, with the two Mss. Mfa and Jp1, above discussed, is the Ms. K4. K4 is not a real Vendidåd såda, but it is a Vishtåsp såda, in which the eight Fargards of the Vishtåsp Yasht are inserted, instead of the ten sections of the Vendidåd, between the portions of the Yasna augmented by the Vispered. The places of the eighth and tenth sections of the Vendidåd (Farg. 17-18 and 21-22) are left vacant. The arrangement of the text is otherwise the same as in the Vendidåd såda. How far Mf1 also shares in this class has been discussed above.

The three Iranian Mss. known to me, namely, Mfa-Jpz-K4, give a Yasna text independent of one another. All three agree fully or substantially in original readings:

They altimately therefore go back to a common archetype.—All three differ:

The numbers of the above examples give just about the actual relation.

As to the original history of K4 we are well informed from the colophon. Véh-mard, the son of l'redûn, copied the Ms, in the year 1723 from the Ms, of Vahrom Marzapan, second cousin of his great-grandfather (about 1610). Våhröm used as original the Ms. of Khusrö-malka Anoshag-rûbânů, son of his great-uncle, who wrote about 1585. Jp1, which stands nearer to K4 and which has also in common with it the last paragraph of the colophon, goes back in the first place to the Ms. of the father of its convist. who in the year 1592 copied the Dadistan-i Dinik in Kas. It is therefore very questionable whether Khûsrô-malkà could have used the text of the father of the copyist of Jpz, and whether both did not rather make use of the same original, the Ms. of Shatrô-dyâr. A very problematic genealogy might be outlined in the following manner:

The successive stages in the genealogy correspond exactly to the relative merit of the three manuscripts. If at the outset the supposition that Mfa, Jp1 are copied from the same original, presents itself on account of the close agreement of these two Mss. (cf. p. xxii-xxiii), and if on the other hand, the common origin of both has to be moved farther back on account of the appearance of K4, this is merely an additional proof that in Iran copies were made with a care that can hardly be paralleled in India.

In the list of the Indian Vendidad sadas I made use of some additional Mss. for the Yasna, S2 and in passages MII, L3 and Bbz. On the other hand, the important and

¹ Cf. West, S.B.E. vol. xvlii, Intr. 15.

good Ms. Bri 1 have not yet used. Traces of the two manuscript families (cf. p. xxi) are found also in the Yasna:

Mix, Sz assume an intermediate position similar to Dhr. In general, however, the Yasna text in both manuscript families is reduced to greater uniformity than that of the Vendidad and the distinction destroyed through the all-corrupting modern Vulgate. The latter in fact often upsets the relation entirely:

The text of the Yasna sådas in many passages resembles that of the Vendidåd sådas. In general, however, it represents still more faithfully the oral Vulgate of India. Thus at Y. 58.6 the better Ms. family of the Vendidåd sådas, represented by L2, reads passage, the other reads with the Vulgate passage which is the reading of all Yasna sådas. Readings which belong to the Yasna såda alone are therefore to be received with caution. But here and there in the old copies a choice bit of grain is to be found. In respect to orthography they are actually

more consistent than the Mas. with translation, e.g. in distinguishing on and on.

The Yasna sidas which were accessible to me fall into two families; one of these is represented by Cx, Kxx, Lbs, the other by Hx, J6.7, Jmx, Lx3, Ox. The rest of the Yasna sâdas, like J5, Lso, are so incorrect that they might have been left wholly out of account. The Mss. of the first family all belong to a younger period in which the Vulgate, ever farther encroaching, has already extensively levelled the family distinctions. I first give some characteristic catchwords for the two groups:

•	1	-66∜ Hz. J6. Jm:
48,7	fiful Cr. Krr. Lba	416 hard 37
	1	4660 Lz3
44,00	4y⊂ Cr. Krr. Lba	4, Hr. J6.7. Jm:
48,5	multinger Ct. Kill	
40-3	fo Ct. Ktt. Lbs	r∳wa Hz. J6.7. Janz
49,4	nowh Cz. Kzz. Liba	જાઈ J6. Jm: -જાઈ H2. J7
50,5	Were Kir. Lbs	Muse Hr. J6.7. Jun. L13
43(11)	any . Cr. Kit	H1. J6.7. L13 أسامل الآخر
440	enge Ci. Ker(pr.m.)	ल्क्ष्म् सः, J6.7, Jmr. Lr3
46,5	Marine C:	And Anti-
	अभिनाद् स्टब्स	Hr. J6 7. Jmr. Lr3. Lbs
48,r =	mannoppe Ct. Ktt. Lbs	
45.0	everyon Cz. Kzz	

in general the smaller group Cr-Krz is the more conservative. Sometimes only one Ms. has preserved the older reading, the other has the Vulgate, e.g. in 25,4 only Cr still reads sough, Lhy sough and Krz sough with Mr. Jr. Lrz; Cr at 26,15 south, Krz with the others south pC, in 31,5 Cr sough, Krz with the others south pC, in 31,5 Cr sough, Krz with the others south pC; in 39,5 Cr still reads for south sith so the south product in 39,5 Cr still reads for south sith so the south product in 46,49 only Krz still has research, Cr with the rest south possible. Krz in 46,40 still has research, Cr with the rest south production with the rest south production of the still has research.

Certain indications point to the fact that C1, K11, Lb2 ultimately go back to a Yasna which was subsequently imported from Persia.

¹ Ma abridges the Yawas for the most part.

In its copies, however, this presupposed Iranian codex has been almost completely Indianized. Thus Cz, Kzz share with the other Yasna sadas in most mistakes, e.g.

An Indian ancestral manuscript appears to lie at the basis of the other group. In this set Hz, J6 seem closely connected; both must have been copied from the same original. Hoth read

From J6 again Jmz is copied, and from Hz the Ms. J7 is transcribed with many corrections and improvements:

49.9 نستان الحدث التربيط المناطق المن

9,000 יליתיה Hz. J7, 56,3 ישיאשיישיים J6. Jmz; 56,4 יייז J6, יייז Jmz; 55,6 ייינישיים J6, איין Jmz; 55,6 יינישיים J6, איין Jmz; 55,6 יינישיים J6, איין Jmz; 55,6 יינישיים J6, איין Jmz; 57,0 יינישיים של both; 47,3 (in Chap. 18) ייייישיים both; 50,9 יינישיים both; 58,6 יינישיים is originally wanting and has been supplied sec. m. in both.

Often only one of the two old Mss. Hz, J6 has the good reading, whereas this has been displaced in the others by the inferior Vulgate.

Thus J6 in 44,18 reads pr. m. remew (with C2. K22), H2 and the rest remew; 9,10 J6 whose, the rest reduction; hat especially H2 e. g. 9,2 whose, the rest resumpt; 20,2 removes, the rest resumpt; 10,4 remew rising, the rest resumption, 53,6 reformus, the rest resumptions; 44,19 resumption (C2. K22), the rest resumption (C2 resumption), the rest resumption (C2 resumption), the rest resumption (C2 resumption).

Hz is in fact the most respectable Ms. of the entire class of Yasna sådas.

Or is a very exact transcript of L13. This itself ultimately flows from the same source as H1-J6. The direct original of L13, however, must have been extensively corrected according to J2-K5.

Lzs with Ja and K5 has at 9,50 جستان instead of ستانن وربته instead of بالمانية: طويعة بالمانية المانية المان

-friends and innerts at 72.9 temperature. On at 49.4 has with both researchings (in Les the passage is wanting pr. m.). At 49.5 Les reads with Ja research guide (Ja research guide); 50.5 organism (Ja research of research); 49.41 Friends (Ja research guide); 49.41 Friends (Ja research guide); 48.6 friends is inserted with Ja.

More rarely there prevails a remarkable agreement between Liz and K5 alone, as an 29.11; and 29.11;

The same is true in a still greater degree of the incorrect Paris Yasna såda P6. Although its basis is an Indian Yasna såda, still it is constantly influenced by K5, as the numerous citations from the codex show. In this case also we must not assume that the same copyist combined his text simultaneously from two different Mss.; he made use rather of a Ms. that had been extensively corrected after K5.

The Vispered is not an independent book of itself, but it is a collection of supplementary pieces to the Yasna which are inserted in certain chapters of the Yasna or appended to them in the ritual or so-called service of the Vispered. The Vispered has the three classes of Mss. in common with the Yasna or book which forms its basis. In the first class, or that with translation, however, there is wanting the sub-group which in the other case is constituted by the Sanskrit Yasna. The difference between the text accompanied by the old commentary and the sada-text is most striking in the case of the Vispered. The former aims at the greatest possible brevity, omitting all that has already been given or is perfectly easily understood. The ritual text of the sada

In Jd and can also be read.

In Js the error arose from the copylist's first having written

^{*} Also K5 originally had Progerty - no see

Mss., on the other hand, is overladen with formulas and repetitions. The Pahlavi Mss., however, give the pith of the chapters complete, so far as this does not consist of repetitions.¹

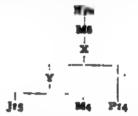

All Pahlavi Vispereds descend from the old Copenhagen Ms. K7a. This is the only independent Ms. of the entire class. As it is well preserved with the exception of one or two missing leaves, we have to resort to the younger substitute Mss. only in small measure. The copies that go back to K7a are M6.4, Jz5, Pz4. The relationship of these Mss. will become clear from the following points.

(1) All five Men. read 16.3 -tilegrößele (instead of industrial); 19.2 Insus -adaly; 22.4 to twice); 22.5 conservatory; 5.0 -tilegraph turnt Kya. M6, insustant is M4. J25. P24; 7.5 -tileunite Kya. M6. Insustant is M4. J25. P24; 7.5 -tileunite Kya. M6. P24, turntunite M4. J25; 15.6 anti-unite Kya. M6(3). P24, anti-unite M4. J25.

The abbreviations agree almost exactly in all the manuscripts. As **K7a** is undoubtedly the oldest and in general the most correct Ma, it must be regarded as the mother of the others.

- 12) M6 stands nearer to K7n than to the others. K7n. M6 in 17,0 have where, the others where, both at 7,0 freshes, M4. Jzg. -6,194has, Pz4 -6,194has; 18,0 mbore is nanting pr m in K7n and in M6, but stands in P14 and Jzg. *
- (3) M6.4 Jrs Pr4 vary uniformly from Kyn. 11,19 26-192-2020 Kyn. 2004-2021 M6, no or supplied the real: 22,1 generally kyn. 275-2021-2021 M6, 2 discountly be presented by the control of the control of
- (4) Similarly M6.4. J15: The words of the small engage of 21,3 stand in K7a, are wanting in M6.4. J15, but are found again in P14: likewise 21,5 through in wanting in M6.4. J15, but stands in K7a and as one-frage in P14.
- (5: M4. Jrg. P24 have mistakes in common in apposition to K7a. M6: 22,1 P24C K7a. M6: 4222 M4. Jrg. P24. At times the agreement extends only to M4. P24, e.g. in the omission of the words well, manager construct in 6,1.

The three younger Mss. M4. J15, P14 must accordingly be traced back to K7a through the intervening link M6. They are, however, neither direct nor fully co-ordinate copies of M6, inasmuch as they have similar mistakes in opposition to M6, and as M4. J15 in turn mutually have special points of variation from P14. Presuming therefore that neither of the Mss. M4 nor J15 is a transcript of the other, which is unlikely I think, then two missing links in the descent must be assumed:

The Paris Ms. No. 14 of Dastur Shapur, who was still known to Anquetil (i, 1 p. 460), evidently bears the marks of the text revision which has been popular with the copyists since the time of Jamasp and Darab.

Up to this point I have silently assumed that the old Copenhagen Ms. 7a is the Ms. of Rustam, the greatgreat-uncle of Mitrò-àpàn. It must not, however, be passed over in silence that Westergaard (Pref. p. 13) expressed doubt as to the authenticity of the Ms., and that even to-day his doubt does not appear to be wholly unjustifiable. Let us briefly present again the facts in the case, The old portion of the Ms. K7 begins with the Vispered såda (K7b); to this a Nirang and an Avestà fragment are appended as closing prayers; then follows on fol, 107 the colophon with the name of the copyist, namely, Rudastakhm (Růstam), son of Mitrô-àpán, and the date 627 of the Persian era (A. D. 1258, or more probably 1278). Then follows on fol. 108 by the same hand the Pahlavi Vispered without any special postscript. The position of the colophon is striking. One may conceive that Rústam at first copied only the sàda-text and finished it, and that later a Pahlavi Ms. of the Vispered came into his hands, and that he added a copy of this to the former. In this event the colophon of K7b would count also for

¹ Everything that is omitted in the Palilavi Vispered is designated by †† in the edition. I take this opportunity of remarking that the note to Vp. 20,3 is not quite right. The words cited from Kya are not wrongly inserted in place of 20,3, but rather 20,3 is left out in the Pahlavi Vispered as not requiring any explanation, and then only this clause (page 28h line 8) is brought in from the long introduction to Chap, 21 and translated because it has not occurred before in the Vispered.

² From M4 I have made no note, the word therefore apparently stands in that.

Kya, at least so far us the copyist is concerned; not, however, of course with reference to the exact date. The Ms. accordingly would be sixty-five (or forty-five) years older than the four well-known Mas, of Mitro-apan of 1323 and 1324; yet in spite of this, the Ms. has come to us in far better condition than the other four. This may have been Westergaard's special ground of objection. It is chiefly the bad ink, however, that has worked destructively in the case of Mitrô-àpan; as an actual fact the paper of K7a-b could be so old. If Westergaard be in the right, then the Rûstam Ms. existed only in a younger copy and the copyist transcribed the colophon of the original without adding his own postscript. In this case the colophon would count of course only for the sada-text and there would not be the slightest ground of proof to the effect, that the Pahlavi Vispered also goes back to a Rüstam manuscript.

The question as to genuineness arises also in the case of the old composite codex Kso whose style of writing in many respects recalls Vispered E7. The Ms. K20 has a series of colophons for the various texts, and among them are three with names and dates. In all three the well-known Mitrò-àpan is mentioned as copyist. The first, on fol, 384 after the Gosht-i Fryand, is dated on the day Rashn of the month Din of the year 690 A.Y. (= November 8, 1321); the second, after the Hådhôkht-Nask, on the day Rashn of the month Atur of the Parsi year 720 + 20 after Yezdegerd (= August 28, 1371); the third, after the Shayast-ld-shayast, on the day Adar of the month Mihr of the Parsi year 700 (= July 30, 1331). Consequently an unnatural order 1321, 1371, 1331. The middle date is particularly striking on this account, that in such case Mitrô-apan would have done the copying full fifty years after his earliest work of the year 1321, whereas West reckons the sixtieth year of age as the extreme limit of activity of a copyist. The date must therefore rest upon a mistake in writing. Moreover, the long interval between the first and second colophon is in contradiction to the entire Ms. which appears to be written in a single style, and that not the characteristic handwriting of Mitro-apan. In this case therefore Westergaard (Pref. p. 3 n. 1) was unquestionably right in believing that K20 was not written by Mitrô-âpân himself, but it is certainly a very old copy of a scribe who copied in one composite codex a scries

of smaller Mss. and among these certainly three of Mitróâpân and transferred the colophons of his originals without making additions.

Kso has a series of texts in common with M6. The Ms. M6, likewise a collective codex, comes from the copyist Pêshyôtan and is dated A.Y. 266 (A.D. 1392). West has treated of the relation of these two in S.B.F. vol. v. Intr. 30. Both Mas, are nearly related and are either copied from the same original, and Kao in fact some years earlier than M6; or K20 is transcribed from an older copy of the original of M6; but in no case is M6 copied from K20. For some texts Peshyotan certainly used a Rústam manuscript. His postscript to the Arda-Viråf and Gösht-I Fryåno (cf. Haug and West, The Book of Arda Viraf p. 266) bears witness to this. Now since the Pahlavi Visnered in M6 is a direct and very exact conv of K7a, the fact just mentioned would again speak in favor of the genuineness of the Rûstam manuscript. But as no second Rûstam Ms. has been preserved which would render possible a comparison of the handwriting, the question remains unsolved. The fact that K7a is the Pahlavi Vispered which is to be taken as a basis, remains established, for the converse relation -K78 a copy of M6 -is excluded: M6 has several slight inferiorities in the text as opposed to Kya, but never an older, better reading than the latter. The Ms. X7a must under any circumstances therefore be placed before 1397.

The såda-texts which I have made use of for the Vispered have been partly disposed of above. There remains only the question as to the relation of the old Copenhagen Vispered såda K7b to the ordinary Vispered sådas, namely, Hz, J8, Jms, Kzz, L27, Pt3, Pt2.

A common archetype lies at the basis of all Vispered sådas. Ht etc., however, are neither directly nor indirectly to be derived from the older Copenhagen text, but they form rather within the såda-class an independent group. The signs of the common archetype are:

In Hz, Fty, Kzz the complete Yanna side, to which the Visperel is a supplement, precedes the Vispered side, with Kirls. In Hz, Kzz the Sirdea is furthermore appended. All Vispered sidea by citing Vasna chapter openings at particular places point accordingly to the Yanna text which is always presupposed for the Vispered. The two Persian Vispered sides (or those copied in India after a Persian original), namely Fix and Khz, on the contrary give the Vasna in extense, infact with the Vispered.

All read 15,3 and instead of wit; 12,4 the transport instead of with the color manuscripts. All offix 10 twice in 14,2.

On the other hand Hz etc. converge into a separate ancestral manuscript which is independent of K7b. Proof:

	H1 etc.;	Kyb:
26,1	was (except	X11)
14.5	مايهرېديد. آسمبريوب	manifered fragituses
10,0	andgrams, (apalyspens)	وند گاؤاست.
19,5	mangeres grang	المهمجر والمدايات
12,=	بالمسورة مال	طسريانة
14.5	Trep.	- Printer
21,3	(except discount	J\$. K11) - ተሚታሳ
12,0	Swy- inserted	deest
150	دارمن ۱۵ مادولانحس ، بازان	material algebra
11,1	ero inserted	deest

In general the manuscript group Hz etc. is far more permeated by the Vulgate than is K7b.

K7b frequently gives the better text and inclines to K7a and to the l'ersian Mac (e.g. 480 *02) 9,0, 4998 *27,0; 4808 *41, 12,0].

Among the ordinary Vispered addas, H2 is undoubtedly the oldest manuscript. It plays here a rôle similar to that in the Yasan, inasmuch as it alone has sometimes preserved the old reading, cf. """" in 22,2. A proof that the rest are not descended from H2 itself is furnished at 12,3, where H2 reads """" but the others with K2a K7b) read """ In regard to the rest so much only may be said, that Jm5 and Pt3 stand search to each other, cf. """ 12,2; along 60.4.2.2.

I must mention that I did not have at my disposal the entire Iranian material for the Vispered. The catalogue of the Mulla Firuz Library records a "Yzeshne with Nirang and Vispered, made in Eran A.Y. 1080" which was not accessible to me.

All the texts that remain of the Avestà proper, after excluding the trio Yasna-Vispered-Vendidàd, are comprised for the most part under the collective name Khorda Avestà, although the application of the term in so extended a sense is not justified. These texts contain a twofold

element: the Yashts and the minor prayer formulas. The latter make up the chief contents of the Khorda or small Avestå is the proper sense of the term, which is a book designed for the use of the laity. A sharp line of distinction, however, no longer exists. Certain Yashts which were already contained in the Bakan-Yasht-Nask, the real Yasht book of the Sassanian Avesta. form an integral part of most Khorda Avestas, Conversely, the Yasht codexes are preceded by the same pieces (alphabet, prayers, Nyaishes) as the lay-breviaries. It is only for the texts of the Khorda Avesta that we can assume a continuous oral transmission and a consequent development of a "Vulgate"; whereas the great Yashts have been preserved almost exclusively by written transmission. The texts of the great Yashts are far less common, but inasmuch as the scribe has not been constantly influenced by a memorized text, they have been far more accurately handed down from transcript to tran-

If we first divide the respective Mss. according to their contents, we shall have three groups:

- (1) the pure Yasht Mss., the chief representative of which is Fz, the old Ms. of Asadin;
- (2) the Khorda Avestas in the strict sense of the term (one of the most comprehensive Man. is O3);
- (3) the combined Mss., a combination of No. 1 and 2 into a great collective volume (a type of this group is Pt1).

Only No. 1 and No. 3 call for detailed description. In order to make clear the relation of the first group to the third I shall begin with the sixteenth or Din-Yasht. At first glance the text of this Yasht appears to be split up into two recensions. In reality, however, the one recension is merely the very corrupt Vulgate of the same text which is fairly correctly transmitted in other manuscripts. This corrupt Vulgate may be traced as far back as the fourteenth century. It is to be found already in Jm4 (A.D. 1352), although the corruption had not yet so far advanced. The corrupt Vulgate text is the text of the Khorda Avestá transmission, but the better text is that of the Yasht transmission. Fr. Ex. K16 share in the latter,

As is well known, the Khorda Avestin are by no means exclusively confined to Avestit texts, but contain also Pland and Modern Persian texts.

⁹ Cf. especially West, S.B.E. vol. xxxvii, Intr. 45.

whereas Ptz, Lz8 as well as the Khorda Avestås participate in the former. I shall give in the first place a few specimens:

Ya	sht transmission:	Khorda Avestă transmission:

Sometimes, however, as often elsewhere, it is the Vulgate that has the better reading:

10,15 -mw Fr. Er. X16 -0 7mw Ptr. L18.

Or the Vulgate creeps into all later Mss. without distinction as to class:

In this Yasht Ptz is independent of Fz; in most of the other Yashts on the contrary, Ptz like Ez is a true transcript of Fz. Readings which bear witness to the close relationship of these three manuscripts are e.g.:

ન્યુક્સન્યું Yt. 10,81; ન્યમ્બર્સ્યુક્ષમ્પ) 10,33; વેમ્બર્ગમર્થી 10,94; મર્જીક્ષમામ નીમાર્જ 10,111; ન્યાસ્ત્રું (instead of ન્યાસ્ત્રું) 8,43.

Certain mistakes in Ptz, Bz can be explained only from Fz. In Yt. 13,134 for example, the scribe of Fz had space in the line only for range and forgot to add the number in the next line; both transcribers have consequently made apart in the next line; both transcribers have consequently made apart in the next line in £3,200 the fifth name was mutilated in similar manner. The line ends with the Fz and is continued in the next line by numbers; the 1 therefore was accidentally omitted. Ex makes of this appropriate for the special property in £9,67 Åsadin Kākā started quite correctly to write the by as he was accustomed to do, but 2 got a little too next the preceding 1 and became indistinct. In order that there might be no doubt about the matter he wrote 2 a second time above it between

the two bs. Both copyists misinterpreted this emendation. The scribe of Ptz saw in it a correction of h and wrote white; the copyist of Ex misepplied the h and wrote white. In 19,07 Pt has sauding the party is but in, as sometimes in old Man, very closely resembles P. Ptz copied correctly, but Ex misread the mas M. At Yt. 19,11 Pt rightly has will used 17,36 wrightly has will that at first glance it looks like h; and that is the way both copyists took it. Conversely, at 13,121 in Ft the how looks like an m; accordingly Ptz, Et have nothing. In 13,25 with may be read in Ft, although the P looks very like a V; both copies have nothing.

Ex cannot be a copy of Ptx, for the peculiar numbering of Fargards which begins with the Bahiram Yasht and which is found, with the exception of Fx, only in Ex, is wanting in Ptx. In addition to this, the list of instances in which the Asadin Ms. alone can be the cause of the misunderstanding, may be extended specially as regards Ex.

At 13.46 in Fx the f of 100 months of is made too small and straight; Ex makes of this 100 months. At 13.148 Fx apparently had originally regardinate, but to corrected pr. m. to 33. The transcriber initional this correction and copied regardinate. At 13.59 the " in Tombi is written an close to the 1 that for the hasty reader it looks like while ligature; Ex has Tombi. In 9.18 Fx has 61400, and above is m is in virtue; Ex the Tombi. Px 45400. In 14.18 Fx and Ex have from my, and is added above as a correction.

The corrections which run through the entire Ms. Fr. and which are evidently due to different reviewers, are partly made use of in Br. At Yt. 16,1 Fr has pr. m. -(m²) -(m²), eec. m. and Br. -(m²), in 26,2 there is legible in Fr from the first hand only 189° 180°, and at ... a very marked ensure, above it stands sec. m. -(m²) Er has 180° -(m²). At 16,6 Fr has 181 and 182° -(m²), added sec. m.;

Just as little can Ptz be copied from Ez, but rather it presupposes Pz in most Yashta as its immediate antecedant, as the following instances show: Yt. 8,17 the line ends in Fz with anti-drawnly and the following begins with an area in Fz with anti-drawnly and the following begins with an area in Fz with accidentally dropped out, Pzz anapomethematy. 13,18 Fz has always (so Ez), but the top of it somewhat heavily marked; Pzz anapomethe Fz and Ez always, is in Fz are crased or accidentally damaged; Pzz analogue 13,60 Fz anapomethe; likewise Pzz (Lis, Pzz). 17,11 Fz in another in the punctuation mark very close to "; Pzz makes of it and property. Star Fz, Ez analogue, to the right of in Fz, however, a slight ink aplash; Fzz analog. Fz has analogue, but above the line;

added as correction and the caret erroncously inserted between and ?

Ptz 10 paper 10.30 Pt pr. m. and Ptz read form. 10.50 Pt in a paper has the m and a crowded together; Ptz 11 paper. Likewise the parent manuscript at 13.70 in 3 paper has the m and 20 so close together that m at first glance looks like m; Ptz 3 paper. Most palpable is the following case: Yt. 13.37 in Ft the in 30 C has not into the long drawn-out tail of the 4 in 3 paper of the preceding line, no that a looks like ? The copylat of Ptz read it so and wrote 3 page.

The lack of uniformity in the relation between Ptz and Fr in different portions of the text was for a long time very troublesome to me, and led me at first to believe that Ptz and Fz were two independent sister manuscripts, until I discovered the real state of the case. The copy ist of Ptr at first took as the basis of his copy one or more Khorda Avestå Mss., but completed the Yashts by drawing also upon Fz. The Yashts which stood in his original source, namely, the Khorda Avesta, he took from that copy instead of from the far more solid Asadin manuscripts. The relation of Fx to Ex-Ptx may now be thus represented in detail. The Nyaishes in Et are probably copied from Fr but are influenced by the Vulgate; in Ptz on the contrary they are taken from the Khorda Avestà copy. Yashts 1-3 in E1 and Pt1 descend from a common original, related to Fz but not identical with it.1 Beginning with Yasht 4, Ex is based throughout upon Fr; but in Ptr the Ms. Fr is the basis only in Yashts 5-8, 10-13, 15, 17-19,9 whereas Yasht 4, 9, 14, 16, the favorite Yashts of the Khorda Avestå, follow another tradition.

It must be romenbered that in Es the Afringins stand between the Nyhishes and the Yashis. In the case of the Afringins, the copyint must at all events have made use of another source for they are not found in F1 at all. With regard to the first three Yashia the following evidences may suffice:

	Fr:	Pts:	Br:
Yt. 1,27	-tirggero	-4	سووسن
1,00	Berganh	э	ig sup
1,19	4134	42.	· Align
2,13	· g or formed former	·gh-fam-	Mensur "

3,43	ۋائىۋە ۋىيوسىيە.		46-4
3,4	Same	Jan est	
3,5	- ~264	-10 0** 10	chillo

The last two Vashts are so unimportant that they may practically be left out of account. Also the Srooth Vasht with V. 57 complete (Yt. 11 a), is copied in Ptz from P1. Yt. 11 in Pt is already much influenced by the Valente.

A transcript or an excerpt from Ex is the little Yasht collection in Kx6. In this the copyist has partly incorporated the corrections which were made in Ex by the second hand. The following comparisons will make the relation clear:

	Pr:	Ez. K:61:

14.40 Ft and Et have pr. m. 2007, Et see, m. and Kt6 with the Volgate Tarm; 14.40 Ft and Et pr. m. 2007 downly, see, m. 2007 downly and so Kt6; 14.43 Ft. Et pr. m. 4007 pp., Et see, m. Kt6 4007 pp.; 14.56 Et see, m. and Kt6 pr. m. have the addition Tarmbon etc.; 16.5 Et has grandow in added see, m., Kt6 has this addition pr. m. In 14.39 the development of the reading is:

A second transcript of Ex is the Yasht excerpt which forms the latter part of Ex5 and contains the Tir and the Mihir Yasht. Readings are:

	Fri	Br. Krg:
20,46	-ter-day	وتديمهمري.
(abov	e i the as corre	ction)
10,22	- All Marie Olympia	40 milliften
10,103	- And Control of	و الكانام الب
10,44	السالهموردس	الداسهسلطود مان
10,100		mån mångr
10,9	معميدرإزات	ىند. بىلىۋات.
(the first "in F1 str	nek out and ^{also} abo	ve it as correction)

¹ Kz6 itself has been extensively corrected after Persian manuscripts. Only the readings pr. us. come here into consideration.

The three words "" of " of \$,17 stand in Bz as in Kz5 sec. m. in marg. The four missing words in 20,00 in Fz (and Ptz) are supplied in Ez in marg. and copied thence into Kz5 pz. m.; so also the four words omitted in Fz at 10,65. In 20,105 Bz, Kz5 insert community.

Fz. At 10,18 Ez has firming corrected sec. m. to firming:

Kz5 accordingly firming.

More numerous is the progeny of Ptz. The Mas. Lz8 and Pz3 are offspring of it. In the latter the Yasht collection has remained incomplete, the Ms. moreover is much more carelessly written than Lz8.

In Ptr-Lis-Pig are wanting 13,140 -no-man, 13,27 -region, 2, 3,5 -report, 8,5 three words.

	Fx:	Ptr. L18. P13
10,61	-fear-was 4	- (100*****)*
5,130	- the philosope	-tonged-
10,104	frajamper.	Stanfallere-
13,102	ashillow is.	-ascidiano
10,123	- Eiman	-En-safe
13,88	· WHITH HE COURS	-1260 h-181-18

In 14,09 all three read from the Tope Fr. Ptr. L28 uniformly formly from Property. At 10,00 Fr has made of this from At 10,00 Fr has resonant to likewise Ptr; but in this will is twisted into a ligature which resembles a st. L28 makes out of this from and the following begins with from, so that from has fallen out; L28 has resonant, P13 companies. 10,190 Ptr has quite rightly formular, but a peculiar cross-stroke is added to the 9; L28 makes of this from the fallowers, P13 strong, one.

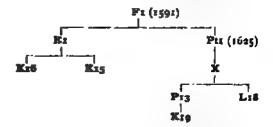

On the other hand, LES and PE3 cannot be copied directly from Ptz, for they have certain mistakes in common which Ptz does not alsare; to these belong the loss of three words in 10,75, the emission in 13.25. 119, the absence of "Ope in 23.223," the defective substitution of the words missing in Ptz at 20.50, the dittography of "Northly in 13.236, the repetition of the words Permissy as far as "Newstands in 5.700. There was therefore either an intermediate copy between LES-Pty and Ptz, or Pty is transcribed from LeS. The latter, however, is not likely.

A third descendant of Ptz is Kig, of which only a fragment has been preserved.

In Ptt, Las, Pag. Kap at 5,13 forminging is wanting; in Las, Pag. Kap Ya. 5,23 two words each. All three rand at 5,2 m/hm/hm/hm, 5,5 m/hm/hm/hm. Of the two, however, Kap stands nearer to the Page Ma. than to the London, and is probably copied from Pag.

The family tree of this entire group of manuscripts may now be clearly represented as follows:

To this group belongs also the small Yasht collection H3. It is probably to be placed under E1; cf. 10,60 n. 4; 104 n. 7; 105 n. 4 and s. I have been as little successful in assigning to this Ms. its exact position in the genealogical table as in the case of H4. The much corrupted text of H4 appears partly to come from a quite different and unknown source. I have also not been able to make out from what source is derived the modern transcript K40 which is related to H4.

[.] The scribe was therefore of opinion that the correction refers to $\Phi_{\rm c}$ and not simply to ${\bf L}$

stands in Fr.

The gap in 8,44 only in Pts-Les, but filled up in Pag.

⁴ m in Fr looks very like an ...

[#] stro in F1 is joined as a ligature, hence the mistake.

Evidently a slight mistake of Amida.

The case is significant for the pronunciation of the

³ H4 is probably a transcript of a manuscript that was not according to me but which Darmesteter made use of and designated as Jms; the motes, however, which he gives regarding readings are not sufficient to allow me to assign the Ms. its definite position.

Nearly the entire transmission of most of the Yasht texts culminates in the one Ms. Px. In this respect the codex remains unique. Whatever Asadin did not correctly read or copy from the Ma. that lay before himirrespective of course of slight errors—is irrevocably lost. Asadin, however, was in general a conscientious copyist. His carefully indicating the gaps he found in his original towards the end of the Ms. bears witness to this.1 Taken as a whole his text appears to be still fairly intact; it is only in the case of those Yashts which belong also to the circle of the Khorda Avestà, as in the fourteenth Yasht, that he is infected by the Vulgate. On the other hand, Fr has contributed much to the emendation of this very Yasht. In general not a single one of the maiden manuscripts has furnished such a number of new readings as the Asadin manuscript."

In the days of the copyist of Ex there must have existed for the entire Yashts another source beside Fx. The accidental omissions of Asadia and the damaged places in his original which he indicated by leaving an exactly commensurate vacant space, are partly supplied in Ex, sometimes pr. m., sometimes see. m. Attention has already been called to the fact that the scribes in all probability did not have a memorized text of the great Yashts beside their written text, upon which they could draw for such restorations. The four words missing in Yt. 10,30 are

supplied in Ex on the margin. The gaps which Fx shows in Yt. 19,48 and 49 are filled up in E1 quite correctly pr. m.; so also in 19,27, and by a second hand in 19,96 (the third time), and by both hands in 94. The restoration in 19,51 is probably approximately correct, so also the second restoration in 67; on the contrary, the first in 67 and the first and second in 36 are failures. These restorations in the nineteenth Yasht agree almost exactly with the text given in Jzo. 1 Jzo, which is a codex about comparable with Pts in extent and contents, belongs in respect to the Yashts to a side line of the Fr family. This side line in its ascent appears to go still further back then Fr.* According to Jre we must assume a great omission in F1 and its kin at the beginning of Yt. 17,10. The text which Ito offers in this passage bears a thoroughly original stamp. The omission must therefore be probably laid to Asadin's account, and he went astray by passing from the first to the second many in 10,28 J10 has songe, the Fr family songer in Yt. 19,48 the gap is also designated in Ito. If the other restorations in Ito be also taken into account, one arrives at the conclusion that Iro goes back ultimately to a second and older copy from the original of Fg which was made at a time when the corruption of the original had not yet advanced so far as in Asadin's day.4 This older copy was probably used in places for the corrections in Ex. Between this older copy and Jio, however, there were probably many intermediate links which were influenced by the other line, and the text in Jze is accordingly considerably impaired but it is useful, off and on, for checking and correcting F1. It is probable that the transcript of the nineteenth Yasht which was made for Westergaard and which he deaignated as D, was derived from the original of Jzp. To the Fz group, as may be inferred from certain omissions, belongs also the Ms. Kra; its predecessors, however,

¹ X1 19,42, 44, 45, 43, 33, 31, 37, 87, 27, 24, 25, 05,

¹ In the Yashts the reading of Pa itself should at times have been set into the test instead of that of a second or third rate copy, e. g. Tolling 10,137; \$27,000 P 13,100. In general it would be well in doubtful cases always to keep to this standard codes. I should now give preference to the readings many 5.5; pundles (i. e. appropriate) 5.015 ალანელენ 14 (4) მორუსლიცნ 19,38; ანმობლე (გ.დ. წყობლე) 27,25, and to several others. Somewhat different is the case where a later copylal in accordance with the general rules has removed a slight mistake in the original, especially in orthography. The case is by no mount rare and under such circumstances the editor it bound according to orthographic principles to give the copy apparently the preference to the original. Thus at 5.34 Ps reads worden, the edition, however, with Les gives the usual form - www.); 10,27 Fr may be edition with Ptr THOUSE Pr sometimes writes >00, whereas Ptr restores the more correct form >n or In Yt 5.1 > To green is required according to Y. 65,1, although it is supported only by the later copies P13, Kra. whereas the ancestral manuscript has Trape of

[&]quot; e. g. instead of the missing strangely in \$6 Ex pr. m. 49 400 and shot added sec. m., Jro strangely; Ex instead of colomy ib. strangely, so also Jro. In 67 Fx less 2749, Ex makes of this supply, Jro has colom-

The sixteenth Yasht shows evident traces of the relationship; I refer to "promp in 16,0 and sequential in 16,3.

a Conversely in Jun the entire Per. 9 has fallen out.

⁴ It is striking that at Yt. 10,00 five words more are left out in J to than in Fs. It is known to any where we are to look for the source of the error.

^{*} Cf. e. g. Yt. 10,00.

appear to have been corrected in places according to Mss. of the side line. In respect to text, however, K12 stands upon the lowest level; many words are disfigured almost beyond recognition.—The majority of the Yasht Mss., therefore, may be traced back to one single ancestral manuscript which is still preserved; all, in fact, to a lost archetype which was not far removed from this.

Although in the case of the Yasht Mss. and the combined Mss., the general relations are clearly established, it is no longer possible to bring any order into the mass of the Khorda Avestås proper. These have been produced apparently in India as in Persia in considerable numbers during the last two centuries. They vary much in compass. Hardly two Mss, are to be found which agree exactly in contents and arrangement. Their composition depended upon the pleasure of the copyists, who probably for the most part availed themselves of material from various sources. So much only can be said, that both of the Khorda Avestůs with Neryosangh's Sanskrit translation, Je and Ha, and the two with Bhasha translation, Le and Mbs, stand very close together. With few exceptions those pieces of text that really contain the least matter were the ones that were most in favour with the Khorda Avestà. copyists. In spite of the mass of manuscripts the restoration of the text has been but little furthered by these; a low estimate may be put upon the critical value of most of the manuscripts. An exception which lends a ray of sunshing amid the dreary work of collating and examining the Khorda Avestá Mas., is made by the Mas. of Iranian extraction. These stand in the same relation to the Indian ones as the Vendidad sadas of the two countries stand to each other; and beside being better prepared than the Indian manuscripts, they also presuppose a more solid written and oral tradition. For those Yashts, therefore, which are selected by preference for the Khorda Avestås, we have a threefold transmission: (1) the Yasht transmission proper in India, represented by F1; (2) the Persian source; (3) the Vulgate of the Indian Khorda Avestàs. These three transmissions stand in an analogous relation to each other to that is which the three sources of the Vendidåd stand. The Yasht transmission proper answers in this case to the Pahlavi Vendidad in the latter. As the Pahlavi Vendidad is more nearly related to the Persian Vendidåd såda, so F1 in many respects stands nearer to the Persian than to the Indian. The fourteenth Yasht is particularly instructive for textual criticism.

Again, M4, c. g. in Yt. 14, presupposes a separate source. It occupies an intermediate position between P1 and the Persian manuscripts. Of primary importance among the Persian manuscripts of the Khorda Avestà are F2, Mf3, K36, K38; of secondary importance are K18a, K37, W1, W3, Pd, Kh2, L25, Lb5, Lb56,

The favorite Yasht of the Iranian Khorda Avestås is the Fravardin Yasht (13), which was lost in the Indian Khorda Avestå transmission. The Ms. K13 was specially prepared in order to make good this deficiency. H5 is a careless copy of K13. It becomes evident precisely in this Yasht that the Iranian Yasht transmission and the Indian Yasht transmission represented by F1, form two equivalent factors for the criticism of the text. The same is true in the case of Yt. 14, but in far less degree of Yt. 3.

A complete Iranian collection of the Yashts has not yet made its appearance. The only manuscript that might perhaps make any such claim is the great collective manuscript MIs, the value of which, however, is a priori impaired by its being transcribed into the utterly inadequate Modern Persian alphabet. Yet certain Yashta, like the thirteenth and sixteenth, are wanting in MIs, and the rest appear to have been compiled from multifarious sources. In cases where the Iranian and the Indian manuscripts stand opposed to each other, as in the fourteenth Yasht, MIs follows the Iranian. But the remainder points to Indian origin, to a manuscript near skin to Izo.

Taking it as a whole, the text of the Avesta books, apart from mutilation by copyists, is the same in all manuscripts, as far as the order of the sentences and the words is concerned. In the case of connected texts, the

³ bosse of these may have been copied in India from Iranian originals.

² Cf. the remarks above under K13. The incident there told shows how little the Khorda Avesti transmission was in touch with the Yasht transmission, for at the time of Jimisp and Rustamji, the thirteenth Yasht was in existence in the Indian Yasht manuscripts.

exceptions to this rule are insignificant.1 The difference in Vd. 15.10, alight as it is, is something quite unusual. Only certain small pieces which are composed of mere formulas, especially the first Nykish, show traces of a double recension, an Indian and an Iranian. In the one recension of the first Nyaish, entire sentences have dropped out, are transposed, or are replaced by others. The first Yasht is preserved in a shorter and in a longer form, and the supplement in the latter is again in a double form. On the other hand, the radical differences in Yt. 3 and 16, and also in Yt. 14 and 11, are not really due to a difference in recension, but are occasioned by a marked and onesided corruption, in a single class of manuscripts, of what was originally the same text, and these differences concern far more the single words than the context. Elsewhere in cases where certain Mss. indicate additions, these are for the most part glosses that have crept into the text from the Pahlavi or the Sanskrit commentary. In the Pahlavi translation they are for the most part designated as such. Sometimes, however, it is difficult to distinguish gloss from original text. My endeavour has been as far as possible to free the text from these embarrassing additions, and in this endeavour I had the support principally of the Persian manuscripts which are almost free from glosses.

The higher criticism has therefore only a slight field of activity in the Avestà. The attempt to distinguish between what is old and what is new in the remnants preserved in the final Sassanian redaction of the Avestà canon, is a hopeless undertaking. An edition of the text must be kept free from any such attempt. Its sole effort must be to arrive at the stage of the ultimate and final redaction of the text, which took place, in part at least, a considerable time after the last Yezdegerd. In many cases, even this will remain an unattainable ideal, for we are obliged to rest content with what the manuscripts authenticate.

So much the more is there opportunity, however, for the lower text criticism in the Avestå. The form of single words fluctuates in the Mss., sometimes more, sometimes less. The method which I followed in reconstructing the text, or to speak frankly, the method which I acquired, like

Westergaard, in the course of the work, cannot be comprehended under short general rules. The chief principle of all textual criticism, to take as a basis the oldest Ms. of that class of Mss, which is recognized as the best, and with all possible consistency to make this authoritative in the edition, could be carried out in the present case only with great limitations. Although for the Yasna it must unquestionably be acknowledged that the Pahlavi manuscripts are the first authority, still in some respects there is a certain peculiarity with regard to this authority. The family is divided into two lines, the one of which has the advantage of far greater antiquity; the other, manifestly, the advantage of the more solid copyists. And both these lines are found to be in incessant antagonism with each other. Even within this narrow compass, therefore, an eclectic course is unavoidable. The experience acquired in the Yasna in regard to the value of the Mitro-apan manuscripts and as to the relation of the Hoshang line to the Persian manuscripts, gave in general a clew with reference to the relation in the Vendidad. Here the two incomplete Mss. of Mitro-apan are the only old representatives of the first class. Even if we grant that his source for the Vendidad may have been a little better than for the Yasna (at least for Ks), still, the two Mss. together would give no readable text without continual correction by means of the Vendidad sadas, especially the Persian. For the great Yashts, from the fifth onward, Fr gives a firm backbone, and the task is here a simple one, for there is seldom cogent reason for material departure from the sample codex.1 The case is different where, alongside of Fz, the Persian transmission lends itself to comparison. It then becomes evident that implicit trust may not be placed in Fz; in which connection, however, the special circumstances mentioned on p. xliv must be taken into account.

The meaning, so far as we are in position at present to understand it, the testimony of the Pahlavi translation, parallels, repetitions, and formulas, all these implements employed in textual criticism, compel an eclectic but cautious drawing upon all manuscript classes even where one among them has the acknowledged precedence. All classes of manuscripts have their stronger and their weaker points, their conservative tendences alongside of special inclinations to certain faults. In this respect also the

¹ The abbreviations and abridgments of the Pahlavi translator are not to be regarded as real differences in text.

In regard to ennocessery departures from F2 see note on p. xliv.

various copyists must be judged individually. It is necessary only to compare the repetition of a Gâthâ strophe with the original passage, or in a similar manner the text of one of the formulaic reiterations in the Vendidad, in order to become convinced how little consistent even the manuscripts to which priority is granted, often are.

In Y. 50,7 In, K5 read -woode, Pea, Mfa -wooder; but in 64.5 In. Pt4, Mf4 "Diorie, K5 "Directs -At Vd, 13,00-03 the same formulaic question and answer is four times repeated. Westergaard in both rentences uniformly reads to the mountain but not at all in barmony with K1-L4, which offer in all seven different forms, and contradict each other almost every time. This decided fluctuation immediately gave me the idea that it was the coming into play of two different forms that made Mitro-Apan confused, as was often the case. Min reads mession, and management in the question, and management in the answer: La reads . se winness in the former and monthlym or -no an adjuster in the latter. Here at least is convictency. I have therefore followed the best Vendidad sadas of both groups. In the choice of .me, however, I made my decision in consideration of Vd. 4,5 seq. and in accordance with my general observations in regard to the interchange of the and 1000 in the manuscripts. In the absence of other criteria it was simply the copulatency of one class of manuscripts that had weight with me, e.g. in Vd. 14,5; 18,73 where with Westergaard I took up into the text fur-me's after the Vendidad addes as against K1-L4. The latter fluctuate between dermond (Vd. 14.2) and id · (18,72) (18,72). The mistake of writing # for 3, 4 is just as possible as the reverse case, so far as itself is concerned, cf. firm. - for-Vd. 13,35; -600 16-600 16 Vd. 16,0.

The selection of this or of that reading has for the most part been made only after weighing the particular case individually and with the guidance also of experience and of a certain feeling which comes only after long-continued study of multifarious manuscripts. That I have made mistakes I have myself later recognized and shall hereafter more often find others.

There are, especially, two influences at work which tend to detract from the fidelity of the manuscripts. On the one hand, the copyists knew the majority of their texts by heart. The oral text, however, had become more corrupted than the written text and keeps constantly crossing the latter. Scribes who read and copied

word for word from the text before them, ran less danger than those scribes who grasped the entire sentence and wrote it off before looking again at the copy before them. To the latter class Mitrô-apan evidently belongs. On the other hand, many users of manuscripts had a bad habit of collating their manuscript with some other copy which often stood in absolutely no immediate connection with their own, as far as kinship is concerned, and then of correcting according to this.1 The next copyist wrote down sometimes the original reading, sometimes the correction, just as it might occur to him. In Ko, which is otherwise a very good copy of Mf2, we can see how the text in some places has suffered in this way. Both these influences tend to obliterate all sharply defined boundary lines. After a certain lapse of time the good old reading gradually dies out under the influence of the Vulgate, without distinction as to class. Sometimes it is preserved in one or two manuscripts alone,

Is Vd. 13.25 it is only L4 that still coads a receive quite correctly in harmony with the P.V. The Ms. K2 has at least granteen. But in both the Vendthial side classes as well as in the transcripts from L4 and K2, the reading appears as a resulting (in Mis a resulting). The way in which the Vulgate gradually crowds its way to the front is made clear by an example from Vd. 22,3. I arrange the readings according to their antiquity:

The old reading represented by L4 stands over against a double Vulgate: 27 for 47 occasioned by the proceding 27 for 47 occasioned by the fixed in K1, the other in the Persian manuscripts; while in the later Indian Vendidad sadas both appear simultaneously. In Vd. 5,40.44; 8,38 the later process has gradually crowded out the older 42 for in all classes, but most radically in the Indian Vendidad sadas.

In this connection I might not neglect to draw attention to an observation that may be of service in many

¹ Here, for example, belongs the case -forw in Y-34.5-

¹ These corrections, furthermore, are in earlier times the only obtrasive instances of a desire on the part of the scribes for improving. Apart from single attempts in earlier times, the epoch of greater textrevisions began in India in the third decade of the last century with the appearance of Jamesp (cf. Auquetil i, r p. 326). On the other hand, the Pensian revision of the Vendidid aids must be considered as a thoroughly conscientious revision, based upon manuscript authority.

places. There is a tendency in general for words to grow longer as the corruption advances.

An important aid in textual criticism is the Pahlavi translation. This was deserving of still more attention for the Yasna.¹ I now acknowledge without hesitation that my standpoint with regard to the native commentaries was at first a wrong one. The earlier low opinion which I shared with others in regard to this work has given place as my labours advanced to an ever increasing high esteem. I have West to thank above all for my conversion. It was this unrivalled master of the Pahlavi who with magnetic power first led me away from error and brought me into the right path through his many letters which often were veritable 'essays' and which form an inexhaustible store of valuable information.

The importance of the Pahlavi translation for reconstructing a correct text must, indeed, be modified in two directions. The different translations are very unequal, less in respect to age and transmission than in regard to their intrinsic value and the knowledge of the translators. At the head stands the Vendidad translation; second comes the Pahlavi translation of the Yasna and of the Khorda Avesta. But to the modern translations based upon the Pahlavi translation great mistrust, on the other hand, attaches.

According to the Persian translation with would have to be read in Afr. 3,4 instead of Fig. 3. But the reading Fig. is attented by the Persian manuscripts, which have a particularly delicate touch in orthographic matters; it is further supported by the passage, Y. 35,1; and finally it is substantiated by the Pahlavi translation in Fa. The latter translates Fig. by the same word as Fig. in the Yasaa passage.

Furthermore, in the case of nine tenths of all the variants, the Pahlavi translation cannot be placed in the scale, because the textual variations, in question, are of an orthographic or a grammatical nature. Variants in which the question is one of sense are not so common, and these are the ones in which the Pahlavi translation is naturally most authoritative.

Such variate lectiones are: "District - District - Dist

In regard to questions of detail, the Pahlavi translation cannot be fully serviceable until we have very exact Avestà-Pahlavi and Pahlavi-Avestà indexes prepared, and before a new edition of the translation itself is accessible.⁵

Its character in general is that of an interlinear version; the translation for the most part is made word for word; more rare it is, that the version paraphrases in a somewhat free manner. In matters, where the genuineness of one or more words comes into question, its testimony should therefore be important.

It makes clear in this manner that in Vd. 9,56, the words of we are a blander of Rüsiam or of his predecessor. But at V. 72,9, three Mm., Ja, K5 among the number, insert a superfuse into the Aventh text. The word is translated in Ja, and probably also in K5, but Pt4 does not recognize the word either in the text or is the translation. In Y. 12,9 the Ma. Pt4, M74 insert a

¹ With the P.V. is to be read e. g. ⇒man instead of ⇒magnoin Y. 34,1; 44,14.

³ Cf. Darmesteter, Einles franiennes ii, 331.

^{*} Neryosangh, however, has \$500 in view and translates it by sealysms.

³ For similar reasons in V. 34,52 (last word) I would not abandon the better attented reading on account of the Pahlavi version. Perhaps the Pahlavi translator himself mirred this word, that is when instead of where. One need not transcribe where into the Pahlavi script—which has been paleographically very much misused—, but simply to turn it only into the old ligature script of the Avesta to comprehend how the misunderstanding arose.

⁴ J refer to Vd. 7.04 B. s.

-6,100****(), which is wanting in the others. Js. Ptq. Mfq translate the word, but K5, judging from Spiegel's edition, and Neryonangh do not translate it. Our witness, therefore, in some cases leaves as in the large.

Not a few words of the Avesta text are not expressed in the Pahlavi translation at all, in spite of their being vouched for by all Avesta manuscripts.1 In such instances I have not ventured for a moment to throw any doubt on their genuineness. The Pahlavi equivalent may have been omitted through oversight on the part of the translator or by a copyiat, for we must not lose aight of the fact that the manuscript transmission of the Pahlavi translations rests upon a still weaker foothold than does that of the original text. Sometimes the translator seems to have had under his eye a different reading from that in our manuscripts.2 The text in his time was probably not altogether free from variant readings. In this case also I should prefer not to correct the text simply upon his authority as against the testimony of all manuscripts. unless for some special reason of weight. I have refrained as far as possible from conjectural criticisms and have preferred to offer that which was only half right rather than that which is wholly uncertain.4

It seems to me hazardous to call upon the P.V. in the following case: many clauses, especially of the Vendidâd text, are found only in the Vendidâd sâda, and not in the Pahlavi Vendidâd; these are, therefore, either an interpolation in the one after the manner of the glosses, or they are omitted in the other by oversight. The absence of translation seems to speak against their genuineness. In this respect we could have no better control

over the Avesta text than the translation, if the latter had only been transmitted independently of the former. But such is not the case. The Pahlavi commentary is always imbedded in the Avestà text. The latter is cut up into small sentences, to each of which the commentary is directly appended. The falling out of one of these may easily have involved the loss of the other. There are kindred cases which must be kept in view. It does not always happen that the text and the scholia belonging to it are uniformly missing in L4 and K1, or in their representatives M13, Pt2, where the old manuscripts are defective. Thus, for example, in Vd. 3,27; 19,451, the missing parts in the two versions often do not exactly coincide. In Vd. 13,47; 15,8, and often, an Avestà sentence is missing together with the P.V. of the preceding, whereas the translation of the missing Avestà sentence stands. If to this be added the fact that other sentences or parts of sentences are missing only in the Pahlavi translation (e.g. 19.30.45) or only in the Avesta text (c. g. 3.32; 13.48; 14.1). or again, that other clauses with or without P.V. are sometimes wanting only in L4, sometimes only in K1, sometimes only in the copies of K1 (e.g. Vd. 16.2), then, the conclusion is inevitable that this mingling together of Avesta and Pahlavi was particularly favorable to misleading the eye. Consequent omissions occurred, and the instances first mentioned, in the case of which alone there can be any question as to genuineness, are to be regarded simply as oversights of the copyists. If examined more closely, it becomes evident that most of the passages are those in which a similarity of sound, the same word at the beginning or end of two adjoining sentences, caused the copylist, to skip over, e.g. at 3.27. The genulueness is often proved indirectly. In the case of the missing clause in the P.V. at 8,95, the corresponding number is handed down in both versions. In Vd. 8.8, the P.V. gives no equivalent for the words as far as -0 -p, but the added explanations of the expositor presuppose the presence of the words. Thus in every instance, errors of the copyists! It is needless to

G

¹ e. g. 100€ Vd. 73,8; 160 200 14,13; ef. Vd. 2,29 n. 4; 7,25 n. a and 4 and often.

² e. g. Vd. 4,1 n. s.—A crux for the editor is the frequent wavering of the Mss. between **** and ****. The translation for the most part keeps the two separate and is decisive in doubtful cases, e. g. Vd. 18,19. In Vd. 5,42.41, however, where **** is ununimously transmitted, the translator appears to have had ***** in his eye. Even here I did not venture to make a change.

^{*} Except Y. 12,5 n. v and a few other instances where I have followed Westergaard, as Vd. 13,69.—In spite of what is said on p. 22vi in regard to Y. 10,4. I should even now healtate to take *** op into the test, innamuch as the reading is not positively attested.

⁴ Slight emendations were, of course, unavoidable, e.g. - τονώ Yt. 13.93, where only -υ-κό and -τογονό are attested; -τογονού Yt. 13.93 out of -τογονού and -τογονού; -ξεγγονού-λο Vd. 14,6 out of -ξεγγονούλο and -ξεγγονού-λου.

¹ For further examples, see p. zvin.

The large piece in 7,75 is wanting only in K1, not in Pt2. The first four words of the paragraph, although standing in the Avestá text of K1, are usualing in its P.V.; on the contrary, the last four words of the original text which is missing in K1, are nevertheless translated.

say that the connection of the sentence comes also into consideration; and, furthermore, that the numerous small repetitions which are scattered through the text in the Vendidad sada, as opposed to the Pahlavi Vendidad, do not fall under this category.

Among the many difficulties in which the Pahlavi translation can offer no assistance, I shall mention only one more. It is the fluctuation between active and middle forms.

In matters of orthography I shall, least of all, have satisfied very exacting demands. The lack of a native grammar has been especially felt in the question of correct spelling. The manuscripts in this respect present a very motley appearance and much of this polychromatic effect has passed into the edition. I have not hesitated to accept peculiar spellings like analyse, manufeld where they were either well or exclusively authenticated. A number of odd spellings which I have relegated to the apparatus should have been received into the text. In general, however, I have tried to be as consistent as possible without doing too much violence to the text as transmitted. Questionable cases must here also be individually judged.

Thus in Y. 55.3; 58.4; Vp. 21.3 I have written "The same form can be correct, and "The is always attested, if not always equally well. I. showing in Vd. 19.22 42 I have always written "The same is true of "The same in t

with $\hat{\mathcal{O}}_{i}$ but in Vd. I,4 regam with 2, because the Mas. In the one case and in the other rand only thus. This may be called pedantry, but what presente did I have, according to which I could correct the other? I have not eliminated slight orthographic differences like, starting by the side of starting, especially where the good Mas. offer the first form. In the constant variation of the Mas. between starting and starting, starting is chiefly Partian; both spellings are found in India, but starting is the more frequent; starting is only sporadic. The distinction between the and them is probably only external. In the one case the * is actually written, in the other case it is implied in the 4f.

The constant fluctuation between -- and -- a gives rise to a great deal of difficulty. In general the tendency of the manuscripts is to supplant the long yowel by the short.8 The shortening, however, has extended itself quite differently in different classes of manuscripts. The old Copenhagen Pahlavi-Vispered goes to the extreme in this respect, writing the short vowel almost exclusively. In this Ms. the long + and + occur not more than three or four times in all. Second in this matter comes Asadin (in F1) who interchanges the long and the short of these two yowels at pleasure. At Yt. 13,79 مراسم is written and is repeated again as catchword, but now pulp is written. In the two Pahlavi-Vendidads of Mitro-apan the tendency to use short vowels is more prominent than in the two Pahlavi-Yasnas of the same copyist. The old Höshang codex of the Yasna must have been very conservative also in this respect. The opposite phenomenon, a certain fondness for a instead of and a appears in all Persian manuscripts. One might at first glance be inclined to

e. g. Vd. 8,92

[&]quot; In the Penian Mos., on is well known, the two long vowels are not distinguished, it is only in Mfs that traces of a distinction are still to be found. On the other hand, the leadan Höshing order of the fifteenth century must have had two distinct signs, otherwise Pt4 would not have kept the two so strictly spart.

a. c. commit (so also Mf4) -- The Converse may be observed to a limited extent in the Indian Vendidid skins, e.g. in certain nominatives like observed (Vd. 15,10), -p.rrpumpfumf (Vd. 15,10).

think that the many longs are a mere hobby of the Persian new redaction and to look upon them with mistrust. But more thorough examination renders it probable that we have here to do with an old transmission, even if the manuscripts sometimes have gone too far in employing the long. In general, however, the lengthening is confined within certain limits.

The Persian Mes. quite correctly distinguish the acc. pl. in 1-10-7 from the nom. sg. in 2-10-7, -10-7. They write -10-15, -10-15, whereas the Indian Vendicki sides langthen the final. In Vd. 17,0 only the Persian Mes. write -10-1, the others -10-1; in Y. 10-15 -10-1 in the reading best attested. The same is true of -10-1-10-1 Vd. 15,0 compared with Y. 9,10, and of -10-1-4 Vd. 5,13 compared with Vd. 19,10.

I have therefore everywhere called in the aid of the Persian manuscripts for regulating the writing of vowels. Where Persian manuscripts are wanting, as in the great Yashts, it is indeed hard to strike the happy medium between emendation and following the text as transmitted. Common words I have restored for the most part to their ordinary spelling; in the case of forms in the part I have kept more closely to the text as transmitted.

There is a great deal of fluctuation in the employment of the signs for the s and the sis sounds. With reference to these signs I was obliged as a matter of course to place myself in a position independent of the changing habits of scribes, and to adopt a fixed principle. I have adhered chiefly to the oldest copyist Mitrô-âpân where I could discover such a principle in him; otherwise I have taken the older Persian manuscripts as a pattern.

Only the latter consistently distinguish between I and P; P stands before most consonants. The law which I some time ago a catabilished with regard to the usage of 22 and 70 is observed almost without exception in all the four Mas. of Mitch-Aplin. The real sign for at is 22 with him; T is its representative when final and also in ligature.

m without ligature, and T with ligature, may interchange at pleasure.

In Vd. 13.44-48 Kz has 'gro (ligature) nine times, '100 four times; L4

'gro (ligature) twelve times, '100 once. Vd. 13.10 £4 has '1000'-, Kz

'trod- with ligature; 19.4 £4 "-gri?" a, Kz has for this "1001'- At

the end of a word 1-400 is used so exclusively as ligature that I subsequently decided in favor of introducing this ligature for the Vendillid,
In all the later period, however, 'U is the principal sign and to the
more rare character.

On the other hand, in the choice of 70 I have kept more to the Persian manuscripts. 70 is at before 20, yet not in all cases, but is confined to a number of words; in these, however, it is consistently carried through only by the Persian manuscripts. All manuscripts write 200 Mitro-Apán sometimes writes 220, sometimes 220, homeon or 220, annetimes 220, annetimes 220, annetimes 220, the Persian black words have 70 with triffing exceptions. In 220, Mitro-Apán very rarely writes 70 (e. g. Le has 220, 220, 220, 15,8), the Persian always 70. As to details the notes, especially of the Yasna, give sufficient information with regard to 70.

The scribes frequently make use of longer or shorter ligatures after the manner of the Pahlavi script. As these are not obligatory, however, they could all be resolved in printing. I have made an exception solely in the case of we are, because this ligature belongs to one of the fixed habits of the scribes. Of the other ligatures, the only one that came seriously into consideration was that for far. The fact that whole classes of manuscripts, especially the Persian, make almost no use of this character, was decisive for me.

In the division of chapters and paragraphs I have adhered practically to my predecessor Westergaard, in order not to add to the confusion that already exists. In the Vendidad alone the separate chapters are numbered consecutively by the Mss. and carefully divided. In the Yasna and Vispered the numeration is wanting.⁵

⁴ Exceptions are found of course, e.g. - 1999-49 Vd. 16,2.

² Except such cases as "Oynum, where the length is required on account of n

¹ Drei Yacht, p. xii.

A For the most part also ----

With Mitro-Apin 1 employ 10 also as ligature for 10 in words like ~70 m; a confusion of both signs is not possible.

[&]quot;Within the word at Y. 40.4 I have proferred 100 of the Mes, to a 120 which seemed to me harbarous.

⁴ Only for the notes the following have been newly cut: <= 70 (used exclusively in Persia; employed promiscuously with 70 in India), 1=1, 1... 1 (both these predominating likewise to Persian Mss.; the cutting of 1 minutaried), ¹→ ** (especially in J3, 81).

Only Pr4 numbers the Vispered chapters, the last number is 26.

The number 72, however, is traditional for the Yasna. The Yasna Mss. sometimes do not agree in regard to the close of chapters, or do not mark the end distinctly. It is to be observed that the introduction to a new chapter is frequently drawn over into the close of the preceding chapter. In my edition the Vispered has one more chapter than in Westergaard. I have divided Westergaard's Karde 23 into two, in accordance with the Vendidad sada. The division of the great Yashts into Kardes is carefully carried out in the good manuscripts. The division into paragraphs is based everywhere upon Westergaard.

Punctuation is a weak point in the manuscripts. They have various signs of punctuation, indeed, but they have no system of punctuation. I had to devise a system for myself, based upon the signs that are found: thus, + is a colon, + semicolon or period, ** denotes the close of a paragraph or the end of a sentence, wa greater division, we the end of a chapter. In texts with Pahlavi and Sanskrit translation, this version takes the place of punctuation. The text is cut up by the translation into sentences of varied length, sometimes of only one or two words. For the most part, however, the explanation is inserted at an actual break in the sentence. It is only in the rarest instances that the manuscripts vary in this traditional division of the sentence.4 In the sada-texts, on the contrary, the text runs along without break until the first large division, with a mark of punctuation thrown in only here and there.* A general exception is made in the Gathas, where the close of the strophe is regularly denoted by the star. Where the translation was wanting I was therefore often thrown upon my own resources as regards punctuation. In that case the punctuation may be regarded in doubtful instances simply as subjective. In the Vendidad I have adhered almost absolutely to the division of sentences by the Pahlavi translation, and have indicated the same either by a larger point (.), or by + where the sentence ends. I regret that I did not do this consistently also in the Yasna; although even there the larger point for the most part denotes a division by the translation.5 Sometimes, however, I have departed from

the traditional division and have introduced a mark of punctuation on my own authority. These cases can easily be controlled, as I assume that the Pahlavi translation is always used by the side of the Avesta text. It is only the colon that I have everywhere supplied.

The metre which is plainly transparent in many texts, I have brought out clearly to the eye in print, although the diaskeuasts had no longer any idea of this metre." These verses, however, are not perfect, whether this be due to the mediocre character of the metrical skill of the composers, or to the fact that the texts have passed through a re-editing. The sign? is placed before such imperfect verses. The symbol "is used to mark words that are suspicious. For the reasons above discussed, however, I have grown more and more cautious and sparing in the use of these signs as the work went on. The symbol "is employed for a sign of abbreviation and repetition, exactly as it is in the manuscripts. In the notes, much more extensive use has been made of " for the sake of economizing space.

The short liturgical remarks that intervene in the text, I have given in Pazand; I have retained only the Pahlavi word & (vad "as far as") which is almost universally employed in the abbreviation of repetitions.

Compounds, which are written as separate words in the manuscripts, have been drawn together in printing.

however, turned out successfully, as in the proof shoets it sometimes could not be distinguished from the fine point used in dividing words.

¹ Examples are found in Y. 20 and 21.

^{*} More frequent in the Persian Vd. sidns as an after-effect of the P.V.

² The heavy point which was introduced by Westergaard has not,

^{*} Thus in 26,1 v is certainly erroneous.

^{*} With exception of the Gåthås.

for the sake of easier comprehension; but the point marking the division of the words has in all such cases been retained. In this also, a mistake may here and there have been made. The endeavour to furnish everywhere an intelligible text has conducted to more than one error from over-haste.

Enclitics and proclitics, likewise, which in the manuscripts are sometimes attached to the adjacent word, sometimes written apart from it, have been printed in the present edition in closer union with such words.

Finally, the imposing list of names of men and institutions to whose liberal advances and efficient support I owe so many thanks, may fitly be opened by the names of the magnanimous Dasturs in Bombay. Dastur Jamaso I Minocheherii Jamaso Asana was the first to open freely to me the treasures of his manuscripts. He not only contributed the most largely from those in his own possession, but he also induced many of his fellowcountrymen to do the same. It was especially due to his incessant urging that the important mamuscripts Fr. Jp1, S1 were intrusted to me by their owners. In the second place I have the pleasure of mentioning Dastur Peshotanji Behramji Sanjana. His four manuscripts accompanied the work from the beginning to the end. Among Dastur Hoshangji Jamaspji's manuscripts, I should have been especially unwilling to miss the old Yasna.

The Mulla Firux Library in Bombay did not place all their manuscripts at my disposal but their secretary, Khurshedii Rustamii Cama Esor., very obligingiy sought out the most important among them for my use. Of the European Libraries, the India Office in London and the University Library in Copenhagen stand in Avesticis at the head. R. Rost, that ever ready promotor of Oriental science, placed the entire manuscript material at my disposal from the first preliminary work on the edition almost to the completion of the printing. Only those who have had experience in such matters and know how important the personal examination of the manuscripts is while the printing is going on, will be able to appreciate the true value of this liberality. The Chief Librarian at Copenhagen, S. Birket Smith Esqr., generously sent to me to use at the library in Tubingen,

Halle and in Berlin, all transportable manuscripts. He extended to me the privilege of collating the others and accommodated me in every possible way during my stay in Copenhagen. The same praise, for like kindnesses, is due to the Administration of the Royal Library in Munich. Also the Bodleian Library, in spite of inconvenience at the time, arranged to send its three manuscripts to Tubingen. For the exception made in my favour I have to thank the request of the Curator, F. Max Müller, made in my behalf. The University Library of Bombay sent three manuscripts upon the spontaneous application of G. Bühler. The Cambridge codex was loaned to me after the late Professor William Wright in most generous manner had stood surety for me.

I desire to express my respectful thanks to the German Foreign Office which, upon intercession from high authority, arranged for the transportation of the manuscripts, and provided the Imperial Consul in Bombay with special instructions to this end. In like manner I desire to thank the Ministry of Public Instruction in Prussia and in Wurtemberg, which allowed the manuscripts to be deposited and used in the libraries under their charge.

This edition, indeed, would not have been possible if the Secretary of State for India in Council had not assumed the patronage of it and had not likewise given material support in the form of a very considerable subscription. I heg leave to express my profound obligation for such assistance, and once more to repeat my thanks to Reinhold Rost through whose kind help such arrangements were brought about.

Dastur Peshotanji and especially Dastur Jamaspji have taken great trouble about the circulation of the lists of subscribers and have thereby greatly obliged the publisher.

Whereas to me has fallen the modest rôle of a compiler and corrector, the honour of being the real creator of the work belongs to the enterprising and self-sacrificing publisher, Kommerzienrat W. Kohlhammer. Without imposing conditions, he undertook the great risk of the publication and left to the editor a free hand in every respect. To me he seemed at all times the ideal of a publisher. That his eyes have closed for ever, before the completion of the work, is to me a profound source

PROLEGOMENA.

of grief. The splendid get-up of the work alone, is a lasting monument to him and to his house. That excellent compositor, Herr A. Sævberlich, who already enjoys a great reputation in scholarly circles for his work, may look with pride upon this model performance. His work was done not only faultlessly and with the finest understanding, but he showed himself also a master in the artistic rounding off of what was often a stubborn piece of composition.

Among the friends who have stood helpfully by me in the work, E. W. West has contributed by far the most. It was thanks almost entirely to the great esteem and confidence which he enjoys among the Parsis and to his successful intercession, that the Dasturs allowed

their precious manuscripts for the first time to go out of their hands and to be sent to me who was unknown to them. During the entire work West has exerted himself untiringly in my behalf, advising, instructing, and correcting, especially in all Pahlavi questions, in deciphering the Pahlavi colophons, and in the dating of the manuscripts. To him I feel under the deepest obligations.

One word more in closing. In the list I wish also to include two younger names, friends and former pupils. E. V. Arnold gave his kind help in connection with the English version of the foot-notes in the edition, and A. V. W. Jackson has assisted me in the translation of the Prolegomens. To both, my sincere thanks are due.

BERLIN, August 1895.

K. F. GELDNER.

THE

SACRED BOOKS OF THE PARSIS

EDITED BY

KARL F. GELDNER

PUBLISHED UNDER THE PATRONAGE OF THE SECRETARY OF STATE FOR INDIA IN COUNCIL

PART I YASNA

STUTTGART
W. KOHLHANMER
1886

Preface.

preliciples review of the Manuscripts employed, and six examination of the documentary tradition, as well as an account of the Orthography and the principles of testinal criticism, will appear with the last part. The following observations may spoilitate the use of the first parts.

Of the estant Zand types the preference has been given to the Copenhagen type, as being more suitable for printing than the Vienna type, while the letters resemble those of the oldest Manuscripts most nearly in form and size. As compared with Westergaard's edition, the slohe-bet is increased by a few symbols; in scope it corresponds precisely to the alphabet of the four oldest and best Manuscripts Jr., Kr.s. La. The following new symbols are added:

tion of My (at), but where it done not stand before M, as in manager, denotes a combination of 1) (24) and 3, and is consequently equivalent to all.

a stodification of a (A) before * (y), is the good Manuscripts scrictly distinguished from p (As).

The and MED (she) have been added for squares so be discussed later.

The symbols of a posterous to to a the thereton of which is next, are supposed in the

notes only, and with special reference to the Per-

Westergaard has created for himself a peculiar system of punctuation, since that of the Manuacripts, especially those without translation, is altogether insufficient. I have extended his system, adding several new marks the form of which are borrowed from the Manuscripts. Thus v represents our colon and semicolon, " our full-stop, # a larger break, ## the end of a chapter. I have retained Westergaard's larger stop as the smallest punctuation. In many places I have employed the larger stop, for the sole reason that the Manuscripts with translation make a break at that point. It was impossible to follow slavishly the punctuation of the Manuscripts, which indeed do not agree among themselves, since they often split up matter which is closely connected. Where however the division into clauses in the Pahlavi and Sanskrit translation has any bearing on the interpretation, I have called attention to it in the notes. Lacunge-in the Manuscripts are indicated by in the notes.

As in the Mes, " has been used only as a symbol of allibrariation and repetition. If no mark of word-division (,) stands before ", a single word only is alibrariated, otherwise a sentence, or a whole formula. In the notes " is used much more extensively for economy of space.

* and * are critical signs. * marks such words as are to be found in all the Manuscripts, but are rendered suspicious by the context or their omission in the translation. Several such words are enclosed within * *. * marks incorrect or suspicious verses.

Compound-words which are written separate in the Manuscripts are distinguished by being run together in print, while the mark of division is retained. This plan has also been adopted with enclines and proclitics, which are written in many Mss, in conjunction with the preceding or following words respectively. If the first member of a compound happens to stand at the end of a line, a - is inserted.

I have followed the precedent of the later Manuscripts in transcribing into Pakend the most important liturgical directions, which are given in the best Manuscripts in Pahlavi. They are, who is the best Manuscripts in Pahlavi. They are, who is the best Manuscripts in Pahlavi. They are, who is the state of the state

"A "day", put "month". The Pahlavi word only P (rnd) "as far as", which is used to save repetition, has been retained.

In the division into chapters and paragraphs I have tollowed Westergaard, with the exception of a few quite insignificant alterations.

It is mainly due to the great assistance which has been generously afforded me on the part of the Parsis, and especially by the Dasturs Jamaspji Minocheherji, M. A., Ph. D., Peshotanji Behramji, Hoshangji Jamaspji, and the Management of the Mulla Firuz Library in Bombay, that my endeavours to bring together the Manuscript material in the greatest possible completeness have been crowned with success

The Manuscripts, which I have employed for the Vasna, are in alphabetical order as follows: B(ombay in the University Library):

Ba: Vendidàd sàda, rather old, the concluding pages are wanting.

Bg: Yasna sada; a careless copy of K5, about

Bb (Burjorji Bomanji, Mobed):

Bbz: Vendidåd såda, old, one of the best Mss. of this class.

C(ambridge):

Cz: Yasna sada in the Library of Emmanuel College, extends to Y. 50,3; closely related to Xzz.

E(rachji Darabji Rustaniji Sanjana, Dastur):

Br: Khorda Avestă, contains the entire Yashta, a good Ms.

E2: Khorda Avestå, of modern date.

P(ramji Fardanji Madun):

F1: Khorda Avesta, containing the entire Yashts.

Pa. Khorda Avestá, from Persia, good,

H(oshangji Jamaspji, Dastur in Poona);

Hs: Yasua sâda bâ Kiriya, no date, about 400 years old, the best Ms. of this class.

J(amaspji Minocheherji Jamasp Asana, M. A., Ph. D., Dastur in Bombay):

Jr: Vendîdâd sâda, 158 years old.

Ja. Yasna with Pahlavi translation, written by Mihirapan Kai-Khusro, finished on the 19th day of the 1th month A. Y. 692 (A. D. 1323). Next to R5 the most valuable Ms. of the Yasna, closely akin to K5; both however can scarcely be descended immediately from the same original.

J3: Yasna with Neriosengh's Sanskrit translation, a costly Manuscript, considered by Dastur Jamaspji to be 600 years old. It is unfortunately scriously damaged. K6. Prz. J4 are immediately or mediately descended from J3.

J4: Yasna with Sanskrit translation; cf. Is.

Is: Yasna sada, old, extends to Y. 35.

J6: Yasna sada, about 400 years old, very ornamental writing.

J7: Yasna bá Kiriyà, about 150 years old, good, closely akin to H1.

Preface.

J8: Vispered Gahanbar, more than 200 years old.

Jg: Khorda Aventa, a costly Manuscript with a peculiar typography; in the opinion of Dastur Jamaspji 500 years old.

Jz: Vishtåsp såda, a careful copy of K4. This Manuscript has been of great service to me when my collation of K4 failed me.

K(openhagen in the University Library):

K4: Vishtasp sida, written in Kirman A. D. 1723; an important Manuscript.

K5: Yasna with Pahlavi translation, A. D. 1323, a well-known old Manuscript.

K6: Yasna with Sanskrit translation, copy of Ig.

K7: Vispered with Pahlavi translation and Vispered Gahanbar (K7b).

K8: Vispered Gahanbar, copied from K4.

Ko: Vendidad sada, copy of Mfs.

Kro: Vendidåd såda; the date not filled in.

Kir. Yasna sida with Vispered and Siròza;
A. D. 1617, closely akin to Cz.

Kis: contains among other things several fragments of the Yasna.

K20. old Manuscript, contains a longer fragment of the Yasna.

R36: Khorda Avestà from Persia, A. D. 1704. In Westergaard's edition M1.

K37: formerly M2, from Persia, contains considerable fragments of the Yasna.

K38: Khorda Avestà, contams considerable pieces of the Yasna, especially in the Darfin Yasht.

K43: a Pahlavi Manuscript, contains a fragment of the Yasna from Persia.

L(ondon in the India Office Library).

L1: Vendîdâd sâda, without date.

La: Vendidàd såda, Samvat 1816 (A. D. 1759).

La: Vendidad sada, without date.

L5: Vendidåd såda, very incorrect, Samvat 1848 (A. D. 1791).

L6: Yasna sada, very carelessly written, full of Persian glosses; A. D. 1741.

L13: Yasna såda, beginning and end lost, a good Manuscript of medium date.

L17: Yasna sáda, a careless copy of K5; A. D. 1550.

Lao: Yasna bâ Kiriyà, of modern date.

L27: Vîspered Gahanbâr.

Lb (London in the British Museum):

Lba: Yasna såda; A. D. 1661. My thanks are due to Mr. E. V. Arnold, of Cambridge, for the collation of this Manuscript.

M(unich in the "Hof und Staatsbibliothek", llaug's collection; the original numbering is retained);

MI: Yasna with Pahlavi translation; A. D. 1733

M2: Vendîdâd sâda; A. D. 1656.

M4: contains the Srosh Yasht (Y. 57).

M6a: contains several strophes of the Gáthás.

M7: as M6a.

M25: contains the Haptanghâiti.

M26: contains several fragments of the Yasna.

M35: ditto.

Mf (Mulla Firuz Library in Bombay):

Mf1: Yasna såda, written in Persia A. Y. 1090 (A. D. 1721); one of the best Manuscripts of the Yasna.

Mf2. Vendidåd såda, written in Yazd A. Y. 987 (A. D. 1618); by Westergaard denoted by R. A very good Manuscript. Kp is a copy of it.

Mf3. contains several pieces from the Yasna, especially in the Darûn Yasht.

O(xford in the Bodleian).

Or Yasna sáda, A. Y. 1105 (A. D. 1736), is descended from the same original as L13.

Os: Vendidåd såda; A. D. 1681,

O3. Khorda Avestå; A, D, 1646.

P(aris in the "Bibliothèque nationale").

P1. Vendidåd såda, A. D. 1714; known through Burnouf's facsimile.

P6: Yasna sada, without date, carelessly written especially in the first half, strongly influenced by K5, critically of no special value Olshausen's collation.

P11 (Nr. 2 do fonds). Yasna with Sanskrit translation; copy of J3. The Ms. was accessible to me in a copy of Olshausen only.

Pd: a Manuscript in the public Library at St. Petersburg in the Dolgorukic collection of Oriental Manuscripts; contains among other things Y. 28 to 34.

After the collation published by C. Salemann.

Prefect.

Pt (l'eshotanji Behramji Sanjana, Dastur in Bombay):

Pt4: Yasna with Pahlavi translation, undated, not very old, but one of the most careful and best Manuscripts of the Yasna and entirely independent of Ja. K5.

8 (Mss. from Surat, the owner of which has not yet been communicated to me):

Sz: Yasna with Sanskrit translation, extends to Chap, 46 only, the end is wanting. An old and most valuable Manuscript. It could not be used till Chap, 10 on. I shall communicate the variants of the first chapters in an appendix.

82: Vendidàd sàda; 132 years old.

W(ilson's Mas., according to Westergaard):

Wz: Khorda Avestá, written in Persia.

Ws: modern copy.

Tuhingen, 1th December 1884.

- weight and the more work of the more discounting with the more discounting of the more discounting

I) This method of reciting the furnits "Ahuna-Vairya" is exclusively customary in the Yasma and and Vendidid shifts; it also recurs frequently in Ja. Rg, cf. Intend. 23 and Y. 8,9; 21,16; 14,4; \$7,0, \$9,30, 6\$,19, the formul. to the Yashis and Gibbs. The formula in Y. 7,26; 26,10 is shorter; Y. 15,14 and Vp. 3,6 give a different turn. The original strophe, of which the above furnation only contains the first line, is only written in full twice even in Jz. R5 (Introd. to Y. 15 and 27,13). — 2) This accord sentence, as well as the translation, is omitted in Jz, but is given in R5. — 3) Ja; g* K5. — 4) Ja; ** K5.

In this section the following additional Manuscripts have been used:

Dh(anjibhai Framji Patet in Bombay):

Dhr: Vendidhd shda. A. V. 1134 (A. D. 1765).

Jis: Khorda Avestà and Vispered. The Avestà texts with Pahlavi translation complete.

Ms.

Jz6: Khorda Avestå.

Jm (Jamshedji Mânckji Unwalfa, Mobed):

Jm: Yasna såda. Jm: Vendidåd såda. Jm: Vendidåd såda.

Jm4: Khorda Avestà. A. Y. 721 (A. D. 1352). Occasionally referred to as Rz in concenerce of a misunderstanding.

p (Jamshedji Peshotanji Sanjana, Dastur in Balsar):

Jpr: Vendidåd såda from Persia: very valuable nanuscript. Copied by Fredun Marzapán (cf. West, fundabish XXXIII) A. Y. 987 (A. D. 1618) and revised by Dastur Rustam Gushtasp (the copyist of Mfx and Fa). Although written in the same year as Mfx, it is not derived from the same original; it is more closely related with K4 than with Mfx, and was probably written in Kirman, like K4; on the other hand Mfx comes from Yard,

Mb (Mancherji Barzoji Powrl, Mobed*):

Mbs: Khorda Avestă.

MI (Manekji Limji Hataria in Teherant:

MIX: Vendidåd såda.

RI: see

For all these Manuscripts I am indebted to the untiring exertions of my friend, the Daster Jamaspji Minocheherji Jamasp Asana, M. A., Ph. D., who has supported me from the first in this undertaking with his aid and good wishes

* To the Mobel Mancheyl Barroll Powel belongs also the excellent Sanskrit-Yasna 82

Stuttgart, August 1885.

Nearly the whole of Chap, a4 rooms in other chapters of the Yasna. With the exception of the formulas Patr, 1 (from archecks) to 3 inclusive agree with Y. an, 1 (from archecks) to 3 inclusive. The first half of Patr, 2 and 3 occurs here only in the Yasna; the recurring formula is the same as in Y. 4. All the rest occurs word for word in other chapters of the Yasna: 24,4 4,2; the second half of \$4,3 \$6,6 (accound half); 24,6 \$ \$24,4-2; 9-27 \$4,4 \$2; 18 \$2\$ \$28,23-27; 33 and 24 \$4,44 and 35. Chap, 24 is found in an enlarged shape in Vp. 52, and is therefore omitted in the Vds. and the Vishthap shife (K4).

Yasna Haptenghäiti.

The Yasna Haptanghäisi proper extends from Y. 35,3 to the end of 42; 35,1 and 2 are added as preface, Chap. 42 as conclusion. Pt4 has the Pahlavi heading Yashto I Haft-hato, and has a special numbering for the single Has. The Man of the Yasna såda and Vendidåd såda divide the chapters into periods, marking the conclusion of each by T or These divisions almost always coincide with the paragraphs given in the text. Although the greater part of the H. is prose, the tradition finds strophes and verses in the periods and clauses, of M6a fol. 138 seqq. In Pt4 the number of

strophes (vecast) and lines (gas) in each chapter is given in Pahlavi at its end. The division of the sentences in the S.V. often differs from that in the P.V.

In this section the following additional Manucripts have been used:

Br (Hehmanji Rustamji Mnia Firos, Dastur in Bombay):

Brz: Vendidád sáda, Samvat 1805 (A.D. 1748).

Brai Yasas sada, written in the Iranian style, without date.

F1(ofence):

Firt Vispered sada (containing Yasna and Vispered), written in the Iranian style, modern,

but very correct; given by Bastur Khorshedji Bejanji* to the Indian Museum in Florence.

He: Khorda Avesti, old, closely akin to Jo.
Lbx6: Khorda Avesti, from Persia. Sir Henry
Rawlinson's Ms. My thanks are due to Mr. A. Stein
for the collation of this Ms.

Ptr: contains the entire Yashta, A. D. 1625, valuable Ms.

Ptg: contains Yasna and Vispered Gahanbar.

For the first-mentioned Mss. I am indebted to the untiring exertions of my friend, the Dastur Jamaspil Minocheherli, M. A., Ph. D.

Tubingen, March 1886.

Karl F. Geldner.

^{*} Another Vispered side of the Dester Khershedji Brjanji did not arrive in time to be used for the Vanna.

Uahtavaiti.

EDITED BY

KARL F. GELDNER

PUBLISHED UNDER THE PATRONAGE OF THE SECRETARY OF STATE FOR INDIA IN COUNCIL

VISPERED AND KHORDA AVESTA

STUTTGART
W. KOHLHAMMER
1889

Vîspered.

Manuscripts.4)

Ba: Vendidåd såda.

Brz: ditto. Dhz: ditto

Fir: Vispered såda with Yasna complete, written in Iranian style. A very good Manuscript.

H1: contains Yasna sàda, Sìroza, Vaspered sàda; a good old Ms.

J8: Vispered såda and Siroza, old, since it appears without date.

Jis: Vispered with Pahlavi translation, copy of K7a.

Jms: Vispered såda with some pieces from the Khorda Avestå

Jpr: Vendidad salda.

K4. Vishtasp sada.

K7: contains two Vispered texts: 1, the old Vispered sada (K7b), 2, the old Vispered with Pahlavi translation (K7a). The Colophon of K7a bears the date A. Y. 627 (A. D. 1257).

K8: Vispered såda, extract and copy from K4.

Kio: Vendidad sada.

Krz. contains Yasna såda, Shoza and Vispered såda

Khx (Khorshedji Ilejanji, Dastur). Vispered såda with Yassa complete, written in franjan style

Lx.2.3.5: Vendidåd sådas.

Lay Vispered såda.

Ms. Vendídád sáda,

M4 Vispered with Pahlavi translation, a copy of K78. A. Y. 1107 (A. D. 1737)

M6: Vispered with Pahlavi translation, a copy of K7a. A, Y, 766 (A, D, 1396)

Mf2. Vendidád sada.

Oz. ditto.

Pra. Vispered sáda.

P14: Vispered with Pahlavi translation, goes back to K7a.

Pt3: contains 1. Yasna såda, 2 Vispered såda, without date.

S2: Vendidåd såda.

The text is given according to the Vispered sadas. The passages omitted particularly at the beganning and end of the chapters in **K7a**, which are indispensable for the connection. I have enclosed in § §.

Khorda Avestå.

Manuscripts:

🗷 🗷 (Edalji Durabji Rustemji Sanjana).

Et: Khorda Avestà with the entire Yashts.

Ea: Khorda Avestà, modern,

F1: Khorda Avestà with the entire Yashts, best Ms. of this class. The Colophon copied from the defective original Colophon, gives for this Ms. the date A. Y. 960 (A. D. 1591)

Fa. Khorda Avesta with Pablavi translation, from Persia. A. Y. 1075 (A. D. 1705).

Ha: Khorda Avestá with Sanskrit translation. The characters are very similar to those of Jg. According to the Agirváda A. Y 784 (A. D. 1414). A very valuable Ms.

H3: contains Mihir, Ashi, Zamyad Yashts, modern

H4: Mihir Yasht, Samvat 1877 (A. D. 1820).

H5: Farvardin Yasht.

- Jg. Khorda Avestà with Sanskrit translation in 15th century of the Sansvat era.
- Jio. Khorda Avestà with the entire Yashts A. Y. 1202 (A. D. 1832)
- J15. Khorda Avestå and Vispered with Pablavi translation.
- Jz6 Khorda Avestå, modern.
- 3x7. Khorda Avesta, old but faulty
- Jm4 Khorda Avestà, according to the Açirvada A Y 721 (A.D 1381) and is also probably so old,
- Ky contains in the third part (Kyc) texts from the Khorda Avesta A. Y 1009 (A.D 1030)
- K12. Khorda Avesta with the entire Yashts, very careless; A. Y. 1170 (A. D. 1800)
- Kr3 and r4. Farvardin Yasht

^{*)} The unjurity have already appeared in the introductory fly-leaves to the Vasua

K15: contains some Nyhishes, Tir and Mihir Yasht.

K161 contains some Yashts.

K17: Siroza.

K:8: contains three Khorda Avestas K:8a and :8b with Pahlavi translation, K:8c with Modern Persian translation.

K19. part of a complete Khorda Avestà, which was divided probably through inheritance.

K20: contains the Srosh Yasht.

K22: ditto.

K25; Khorda Avestâ

Ka6.37.38; Khorda Avestås from Persia.

K40: modern copy of some Yashts.

Lg. Khorda Avestă with Bhâshă translation, according to the Açirvâda Samvat 1701 (A. D. 1644).

Liz Khorda Avestá, modern

Liz. Khorda Avestà with Pahlavi translation, a good Ms.; A. H. 1170.

L16, contains the Nylishes, quite careless.

L18 Khorda Avesta with most of the Yashts

L25: Khorda Avestà with Modern Persian translation, A. H. (223.

Lbi Khorda Avestá

Halle (Saale), August 1887

Lb16: Khorda Avestà from Persia. Brit. Mus. Orient. 1588 (Sir Henry Rawlinson's Ms.). Dr. Stein's collation.

M4.6a.2x.25: contain different texts from the Khorda Avestà.

Mb1: Khorda Avestá, according to the Açîrvâda Samvat 1745 (A. D. 1638).

Mb2: Khorda Avestå with Bhâshâ translation.

Mf3: Khorda Avestâ from Persia.

Mla: contains many Avestà texts in Modern Persian writing; interesting Ms.

03: Khorda Avestâ, A. D. 1646,

P8. Khorda Avestá, Samvat 1754 (A. D. 1697).

P13: Khorda Avesta with most of the Yashts,

P14: Vîspered and Khorda Avestâ

Pd: Khorda Avestà from Persia.

Pts. complete Khorda Avestà with all the Yashts, according to the Colophon copied by a later hand A. Y. 994 (A. D. 1624); a very good Ms.

Wr. Khorda Avestå from Persin,

Wa seqq. modern copies according to Westergard's statement.

Karl F. Geldner.

Vîspered.
